

BIRMINGHAM CITY
University

I AM BCU

Undergraduate Prospectus 2023/24

SEE FOR YOURSELF AT AN OPEN DAY

The best way to explore what Birmingham City University has to offer is to come and see us in person. Our Open Days provide the perfect opportunity to chat to our staff and students, and check out our first-rate facilities. Virtual Open Days will be held if in-person Open Days are not possible in light of government public health guidance.

WELCOME

I'D LIKE TO GIVE YOU A WARM WELCOME TO BIRMINGHAM CITY UNIVERSITY. I AM IMMENSELY PROUD TO BE THE CHANCELLOR OF THIS VIBRANT AND DIVERSE INSTITUTION.

Our University offers the sort of education I'd have loved when I was younger – right in the heart of the thriving city of Birmingham, with fantastic facilities that blew me away when I first visited. The teaching staff are incredibly passionate about their subjects and give our talented students the chance to go on and achieve their ambitions.

My advice is to come and see for yourself what's happening at the University and across the city. I did, and that's why I was thrilled to accept this amazing role.

I look forward to working with you, helping you become part of Birmingham City University's next generation of talent.

Sir Lenny Henry,
Chancellor, Birmingham City University

EVERYONE PICTURED ON THE COVER AND BELOW IS A STUDENT OF BIRMINGHAM CITY UNIVERSITY. IN THEIR OWN WORDS, THIS IS WHAT THEY LOVE ABOUT BCU.

BETHANY
BSc (Hons) Psychology with Criminology

"Before university I wasn't confident I could even pass a degree; now I am considering doing a Master's."

POLLY
BA (Hons) Media Production

"No matter what walk of life you're from, there's a place you can make friends and create memories!"

ELIN
BSc (Hons) Forensic Computing

"I am constantly challenged and now strive to do the best I possibly can."

KHANYA
LLB (Hons) Law with Business Law

"I saw that a lot of students were international students at BCU, so I didn't feel worried about being in a new country."

FLEUR
BSc (Hons) Learning Disability Nursing

"Since joining the University, I've become more resilient, more determined, and I've become more of an advocate and activist."

JINAL
BSc (Hons) Biomedical Sciences

"I've matured while I've been here at university. My two sisters back in Mumbai are so proud of me!"

NILE
BSc (Hons) Finance and Investment

"I feel I am more than a student; we are encouraged to approach problems from alternate and unique angles and offer opinions."

MICHAEL
LLB (Hons) Law

"I've made friends for a lifetime in eight weeks! I enjoy coming to uni and meeting people I work well with."

SAABIR
MSc International Sport Management

"The staff were really helpful from the Open Day all the way through to when I attended on campus."

MDLAYOSI
BA (Hons) Interior Architecture and Design

"I'm proud to say that I'm from BCU. We share each other's achievements and grow as people."

EMILIA
BSc (Hons) Radiotherapy

"I have matured and developed in such a great way, I have more pride and confidence in myself."

HAROON
LLB (Hons) Law

"I feel at home at BCU; I don't see myself anywhere else. The people are good here and it's a great place to be."

MARO
BA (Hons) Media and Communication

"The concept of going to a new city to study enticed me, and it's exposed me to new people and experiences."

SHOVON
BA (Hons) Business Management

"Being a student at BCU has enriched my life. I've had amazing opportunities. It's an experience I will never forget."

WHY STUDY WITH US?

HERE ARE OUR TOP 10 REASONS TO CHOOSE BIRMINGHAM CITY UNIVERSITY.

3 A GLOBAL CITY

Study with us and you will be located at the heart of the dynamic city of Birmingham – with all its social and employment possibilities. In fact, Birmingham is on course to be one of the 50 most competitive cities in the world by 2025 (Economist Intelligence Unit/Citi).

4 ENHANCING CAREER PROSPECTS

We offer career support and advice throughout your time with us and for up to three years after you graduate. Our Graduate+ scheme embeds career-related skills into every one of our degree courses, from becoming a course representative to studying abroad. See page 12.

5 LEARN FROM THE BEST

Many of our teaching staff come from and maintain links with industry. We have 11 National Teaching Fellows – a title awarded for excellence in university teaching and learning.

6 PRACTICE-BASED RESEARCH

Almost 90% of our research was judged to have delivered 'outstanding' or 'very considerable' external impact in the most recent review, the Research Excellence Framework 2014. See page 36.

1 WORK WITH GLOBAL BRANDS

We have a large number of industry partners and work with big-name employers to give you the best start in your career. We currently work with the BBC, the NHS, Jaguar Land Rover, Cisco, Microsoft and the Royal Shakespeare Company. All of our courses incorporate work-related experience, many with the option of a year-long placement.

7 GAINING REAL-WORLD EXPERIENCE

We provide the chance to gain industry and professional practice experience through work placements, mentoring schemes, exchange programmes and sandwich courses.

8 EARN WHILE YOU LEARN

Our student employment scheme allows you to apply for paid roles at the University, gaining experience in crucial aspects of job applications and valuable feedback on your work.

2 PROFESSIONALLY ACCREDITED COURSES

Professional accreditation gives you an advantage at the start of your career. That's why we have around 50 professional accreditations for our courses from such bodies as the Nursing and Midwifery Council, Institution of Engineering and Technology, and Royal Institute of British Architects.

9 INVESTING IN YOUR FUTURE

We have invested more than £340 million in industry-standard, state-of-the-art facilities to ensure you have the best possible environment for practice-based learning. See page 22.

10 HELP STARTING YOUR OWN BUSINESS

We have a designated entrepreneurship team and a new STEAMhouse incubator to help support students who want to work for themselves.

THE HEART OF THE UK

NOT ONLY IS BIRMINGHAM ONE OF THE UK'S MOST EXCITING AND DIVERSE CITIES, BUT IT IS ALSO ONE OF THE MOST ACCESSIBLE.

We are at the centre of the UK's road, rail and coach networks, so travelling to and from Birmingham is no problem, while commuting from the surrounding area to our centrally located campuses is easy to do.

Local transport is also excellent, with a network of trains, buses and trams providing easy access to all University sites. For more information on our campus locations within the city, see page 40.

ON COURSE TO A CAREER

GAIN A COMPETITIVE ADVANTAGE

Our Graduate+ programme allows you to build up experience through a range of extracurricular, employment-related activities. You will work with our Graduate+ team to undertake a skills audit, devise a personal programme of activities and collate evidence for what you've done, using an online e-portfolio.

WORKING WITH INDUSTRY

Many of our courses offer you the chance to work on live projects with businesses or get involved with community projects related to your course. Our collaboration innovation campus, STEAMhouse, features a range of co-working, artist production, incubation and networking facilities for small and medium-sized businesses in the West Midlands.

EARN WHILE YOU LEARN

Our students are given the opportunity to fill many part-time temporary positions within the University. This allows you to work while you study with us, fitting the job around your course. By taking part in the scheme, you will gain valuable experiences and employability skills, including taking part in a realistic application process, enhancing your prospects in the job market.

COURSES BUILT FOR YOUR FUTURE

Our courses were designed with input from current students and industry professionals, ensuring they meet your needs and those of potential employers. Employability skills, enterprise and practice-based projects are built into the curriculum where relevant, giving you experience of the career you may wish to pursue. A range of learning, assessment and feedback methods are used and you'll have the chance to study a range of optional modules, so you can tailor your learning to your own interests.

GET THE CAREER SUPPORT YOU NEED

We offer a wide range of online and face-to-face services to help you develop your employability skills, plan your career and access the latest job opportunities. This includes one-to-one support with job applications and interview preparation, and mentors from a range of sectors. Our students can access careers support throughout their time as a student and for up to three years after graduating.

ACHIEVE YOUR FULL POTENTIAL

To support you in achieving your full potential, the Centre for Academic Success is available to help with your study, literacy and numeracy skills. You can attend one of our workshops or book a one-to-one tutorial to discuss aspects of your work.

YOUR DEGREE YOUR WAY

TO MAKE UNIVERSITY AS FLEXIBLE AND ACCESSIBLE AS POSSIBLE, WE OFFER A NUMBER OF DIFFERENT STUDY OPTIONS ALONGSIDE OUR TRADITIONAL THREE-YEAR DEGREES.

FIND YOUR COURSE

Go to page 62 or visit www.bcu.ac.uk/courses

PLANNING TO STUDY FULL-TIME?

This is many people's idea of a traditional university degree. While you will not normally be in lectures or seminars all day every day, the time you are expected to allocate to personal reading or study means this degree is effectively full-time.

Even if you choose this option, there is still a lot of flexibility – a range of assessment and feedback methods are used and most courses include work placements, with some offering the option of a year-long placement in industry (a 'professional placement year').

WANT INDUSTRY EXPERIENCE?

While many courses include a work placement of some sort, professional placement courses take this a step further by allowing you to spend a whole year with an employer, usually between the second and third year of your degree.

This can be a great way to find out more about your chosen career, and some students even return to the same employers after completing their studies. Please see our course section from page 62 to check whether the course you are interested in has a professional placement option.

NEED TO BALANCE WORK AND STUDY?

Studying part-time on a flexible provision basis means that the course will cover the same modules as the full-time course but you have the flexibility to complete those modules over a longer period, for example five years instead of three years.

It is important to note that if you do pursue this option, you will study modules for your course alongside full-time students and must be available to attend the University for learning activities at any time during the week.

WANT TO KEEP YOUR OPTIONS OPEN?

Foundation years are a great option if you have the talent, ambition and potential to succeed at Birmingham City University but want a little more flexibility and choice than a standard degree.

Foundation years (sometimes called Year 0 courses) are perfect if you don't meet the entry requirements for a particular course, as they will enable you to develop your learning in preparation for the first year of a degree. See page 220 for details of our courses which can be accessed via a foundation year.

LOOKING TO LEARN ON THE JOB?

Higher and degree apprenticeships are an alternative to the traditional university degree if you prefer to study at the same time as you work and earn. You spend part of your time studying with Birmingham City University and the rest working for one of our partner employers.

To be enrolled on a higher apprenticeship, you will normally need to be employed by a company which offers them to its staff. For more information, see the Government's Find an Apprenticeship website or visit www.bcu.ac.uk/apprenticeships.

CITY CENTRE CAMPUS

This campus at the heart of Birmingham's fast-developing Eastside district, and just a short walk from the city centre, is where most students on courses including Music, Design, Media, Engineering, Computing, Digital Technology, Built Environment, Law, Social Sciences, Business and English are based.

The campus also features library, IT and student support facilities, giving a modern, dynamic space for you to learn in with state-of-the-art resources. An extension to the campus opened in 2018, with more learning space, another IT suite and an innovative group-working lecture theatre. It also provides a base for our Students' Union, incorporating the Grade II listed Eagle & Ball pub.

Our facilities are located alongside Eastside City Park – the first new urban park in Birmingham for over 130 years, which provides a superb space for relaxing in summer as well as a venue for events and activities. It is also adjacent to the new Curzon Street Station which is currently being built for high-speed trains to the city on the HS2 network.

The University is launching its £72 million STEAMhouse innovation campus in 2022, where new ideas will be explored, tested and enabled to grow in a fully equipped state-of-the-art digital and production facility. The overhaul has seen the restoration of the Grade A listed Belmont Works building, adjacent to our City Centre Campus, which has stood derelict since being gutted by a fire in 2007.

FACILITIES INCLUDE:

- Curzon Print Centre (charges may apply)
- Dedicated IT and student services support
- Four industry-standard TV studios
- Geotechnical soils lab
- Green screen Milo studio
- Cisco networking lab
- Hydraulics lab
- Mock law courts
- Replica City trading room
- Library with access to printed and online resources
- Noise and vibration cells
- Photography studios and darkrooms
- Print, textiles, wood, ceramics and glass workshops
- Radio studios and editing suites
- Recording facilities and vintage mixing desk
- Robotic laboratory
- Students' Union.

WE HAVE INVESTED £340 MILLION ACROSS OUR BUILDINGS AND FACILITIES TO GIVE YOU THE VERY BEST LEARNING ENVIRONMENT TO SHAPE YOUR EXPERIENCE.

STEAMhouse, City Centre Campus

ROYAL BIRMINGHAM CONSERVATOIRE

This £57 million building at our City Centre Campus, opened in 2017, provides a conservatoire for the 21st Century. Our music students benefit from a concert hall, private rehearsal and practice rooms, and teaching spaces for musicians from a variety of disciplines.

In the 2022/23 academic year, our School of Acting will be moving to new premises, just a short walk away from the City Centre Campus. The School's new home will offer teaching, rehearsal and performance spaces, including a Studio Theatre.

CITY SOUTH CAMPUS

STUDENTS ON HEALTH, SPORT, LIFE SCIENCES AND EDUCATION COURSES ARE BASED ON OUR STATE-OF-THE-ART CAMPUS IN THE LEAFY SUBURB OF EDGBASTON, WITHIN EASY REACH OF THE CITY CENTRE.

Our facilities replicate the real world of health, education, sport and life sciences, including an operating theatre, hospital wards and a fully equipped midwifery skills/birthing room, as well as sport and life sciences laboratories and replica classrooms for use by our teaching students.

We have invested £41 million in new facilities on this site, including specialist laboratories for the School of Health Sciences, as well as a new home for the School of Education and Social Work, which opened in 2018.

After securing £2 million from the Office for Students, we are spending £3.75 million on upgrading our skills facilities for health courses. This 5G-enabled skills suite will enable us to offer additional state-of-the-art simulation spaces to our nursing, midwifery and healthcare students, preparing them for the future of digital healthcare.

FACILITIES INCLUDE:

- Mock hospital wards and operating theatre
- Virtual radiotherapy and radiography imaging suites
- Simulated home environment
- Replica school classrooms
- Physiology, biomedical science and biomechanics laboratories
- Specialist fitness suite
- Sports therapy clinic
- Environment chamber
- Speech and language clinic.

Ward facilities, City South Campus

SCHOOL OF JEWELLERY

IN ADDITION TO OUR TWO MAIN CAMPUSES, OUR ART AND JEWELLERY STUDENTS BENEFIT FROM STUDYING AT SPECIALIST LOCATIONS IN THE CITY.

Our jewellery school stands in a modern and spacious building on Vittoria Street, right in the heart of Birmingham's famous Jewellery Quarter where much of the jewellery made in Britain today is manufactured.

Gemmology courses are based in a purpose-built area within Birmingham's new Assay Office, and there is also additional teaching space in the historic St Paul's Square.

FACILITIES INCLUDE:

- Specialist studio workshops
- Casting facility and electroplating laboratory
- Machine workshop including laser welders and laser cutters
- Exhibition space and specialist library
- Stores for materials and tools.

BIRMINGHAM SCHOOL OF ART

FACILITIES INCLUDE:

- Light and airy studios
- Gallery and installation space
- Fine art library
- Woodwork, metal, plaster, fibreglass and ceramics workshops
- Digital media, print and photography workshops.

THIS GRADE I LISTED VENETIAN GOTHIC BUILDING IN MARGARET STREET HOUSES A WONDERFUL COMPLEX OF TRADITIONAL-STYLE WORKSHOPS AND TEACHING AND EXHIBITION SPACE.

Floating mezzanine levels, glass lifts and cutting-edge workspaces sit comfortably beside the original stained-glass windows and mosaic floors of this glorious purpose-built art school.

We're right in the city centre, perfectly placed next to the city's main museum and art gallery. There are purpose-built spaces throughout the building to present students' work in a thriving, exhibition-oriented home.

THE FACILITIES YOU NEED

WHEN YOU CHOOSE TO STUDY AT BIRMINGHAM CITY UNIVERSITY, YOU CAN BE CONFIDENT THAT YOUR LEARNING NEEDS ARE OUR TOP PRIORITY.

In addition to high-quality facilities specific to your course, you will find a range of general learning resources which provide you with all the help you need to succeed.

TURN OVER. THERE'S MORE

IT RESOURCES

Once you have enrolled on a course and completed the account creation process, you will have access to your own email, free secure file storage and free University wi-fi, as well as the use of open-access computers within every library and faculty.

Our IT Help Desk is on hand to resolve any technical issues and offer help and advice in your use of our systems and services. Our printing system lets you print from any printer on campus (charges apply).

www.bcu.ac.uk/it

LIBRARY AND LEARNING RESOURCES

You will have access to a wide range of digital and print resources with 24/7 online support. These have been selected in partnership with your lecturers, so are quality assured and relevant to your course.

If you need help in person or online, our expert staff are there to help you get the best from the time you invest in developing your information-seeking skills.

We have been accredited to the Customer Service Excellence standard; we focus on delivery, timeliness, information, professionalism and staff attitude. We value collaborative working, and include the views of students as we work to improve your services.

www.bcu.ac.uk/library

MEET THE STAFF WHO INSPIRE

AT BIRMINGHAM CITY UNIVERSITY, YOU WILL LEARN FROM THOSE WHO HAVE BEEN THERE AND DONE IT.

Many of our 2,000-strong team of academic staff are practising professionals and experts in their sector, including 11 National Teaching Fellows.

You will receive first-hand and up-to-date knowledge directly from those in the know, be it health practitioners, real estate specialists or professional musicians.

To find out more, visit www.bcu.ac.uk/our-staff.

“I always tell my students to be themselves. The best seminars tend to be the ones that end up in unexpected places.”

DR ISLAM ISSA
Reader in Literature and History

Selected as a 'New Generation Thinker' by BBC Radio 3 and the Arts and Humanities Research Council, and researched a high-profile exhibition on Muslim contributions to World War One, which won the Times Higher Education Award for Research Project of the Year.

"I'm keen to involve students in my international human rights work, from learning about the practicalities of protecting and promoting human rights across the world, to working as research assistants on reports submitted to the United Nations."

DR ALICE STOREY

Senior Lecturer in the School of Law and Associate Director of the Centre for Human Rights

Lead Academic of The UPR Project at BCU, which regularly submits reports to the United Nations on the human rights situation in selected countries.

"I believe that improving access to education as well as creating innovative and inclusive educational experiences is key to achieving our shared goal, developing the current and future healthcare workforce."

DEZITA TAYLOR-ROBINSON

Associate Professor, Head of Department for Pre-Qualifying Healthcare Practice

Dezita started her healthcare career as a Nurse Cadet on an apprenticeship scheme and qualified as an Operating Department Practitioner in 2006. A proactive and dedicated ODP and Head of Department who has gained professional credibility for being a driving force for change within clinical practice and healthcare education.

"The staff-student community is second to none. At our weekly Game Night on Wednesday evenings we all take time to celebrate what we love – developing and playing games."

DR CARLO HARVEY

Associate Professor, Director of Future Games and Graphics

Teaches C++ coding and co-founded Curzon Software House, where students work on industry projects for various clients.

"I am passionate about encouraging our diverse students to develop their ideas through a range of media that suits them, whether that's writing, drawing, performance, or computer aided modelling."

OLIVER CHAPMAN

Lecturer in Architecture

Qualified architect having worked with clients across a spectrum of scales in three continents, from house extensions to masterplans. Having completed the postgraduate diploma at Birmingham School of Architecture and Design, he now leads Superstudio – a school-wide initiative that encourages cross-disciplinary learning through skills, workshops, wellness activities, and events.

"Everyone has the opportunity to succeed in nursing, which is why my teaching is more than just teaching a topic. It's about enhancing people's mindset to promote opportunity to develop personally."

KELVIN MCMILLAN

Lecturer in Nursing

A nurse with seven years' experience before moving to BCU as a lecturer, where he teaches across all three years of our undergraduate course and is also an advocate for mental health awareness. Shortlisted for Educator of the Year at the Student Nursing Times Awards 2021.

FIRST-CLASS SUPPORT

ACCESSING ADVICE HAS NEVER BEEN EASIER. THROUGHOUT YOUR STUDENT JOURNEY, YOU WILL HAVE ACCESS TO OUR FULL RANGE OF SUPPORT SERVICES, INCLUDING CAREERS ADVICE, MENTORING, ADVICE ON FINANCE AND ACADEMIC MATTERS, PROFESSIONAL DEVELOPMENT EVENTS AND MORE.

HOW TO ACCESS SUPPORT

If you have any questions, concerns or problems while at University, your School Office is the place to go. Our teams provide a personal, supportive and responsive service with staff on hand to answer course-related questions and point you towards where you can access any other specialist support you may need. You can also log an enquiry and book wellbeing sessions or advice appointments online.

MENTAL HEALTH AND WELLBEING

Your health and happiness are important to us and there are a wide range of support services available in areas including disability, counselling, mental health and wellbeing, and healthcare. We offer ongoing support, workshops and events such as our Mental Health Day which has previously included tea and talk sessions, music therapy, and therapy dogs!

Counselling

The Mental Health and Wellbeing team consists of counsellors, mental health advisers and wellbeing advisers. The team offers free, confidential appointments 51 weeks of the year, Monday to Friday, across both main campuses, on the phone or online.

HEALTHCARE

Register with a doctor

We strongly encourage students new to Birmingham to register with a GP practice in the area. You may choose to register with the University's own partner practice, but this is not compulsory. The most important thing is that you do register with a local practice so that you have timely access to healthcare whenever you need it.

CENTRE FOR ACADEMIC SUCCESS

The Centre for Academic Success aims to help you develop the skills you need to progress and successfully complete your course. They can help with:

- academic essay and report writing
- English
- referencing
- dissertations
- presentation skills
- mathematics and statistics
- computing and programming
- project management
- study skills.

This support is offered through a range of tutorial sessions, workshops, online resources and feedback on your assignment drafts.

Success+ assessment centre

Our innovative digital assessment centre uses specialist software to ensure that digital assessments can be undertaken using the most appropriate technology. The centre team supports students taking exams from home and also has a bookable on-campus space available for those who need to take their assessments on site.

STUDENT PARENTS

Childcare

We recognise the commitment required by student parents and want to help you focus on your studies to get the most out of university life. We can offer childcare advice on areas such as how to choose the right nursery for you and your child, and government support and benefits.

www.bcu.ac.uk/student-support

DISABILITY SUPPORT

Whether you have already told us about your disability or Specific Learning Difficulty (such as dyslexia), or you have a long-term health condition for which you think you may need some support at university, our Disability Support Team will be able to work with you to find the support you need.

We recommend talking to us as soon as you can so that you can get the greatest benefit out of any support we can make available to you.

If you're offered a place at the University, our Pre-entry Disability Adviser will contact you by email to provide you with information about support, and invite you to give details about your specific learning difficulty or disability.

We make individual recommendations to your School about the support you'll need from them, such as:

- particular exam arrangements
- extra time for assignments
- handouts in advance of lectures
- written material in a particular format.

We can also advise you on applying for Disabled Students' Allowances.

Applying to university with a disability

We are happy to arrange for you to meet with a Disability Adviser at the University before you make a formal application. If you're planning to attend one of our Open Days, the Disability Support Team will be available on the day, and you're welcome to contact us beforehand to make an appointment with a Disability Adviser if you wish. Students are invited to tell us about any disability as soon as possible, using the form at www.bcu.ac.uk/disability-form.

The decision about whether to offer you a place at Birmingham City University will be made on academic grounds and in accordance with our Admissions Policies. Your disability will not affect this decision.

OTHER SUPPORT

LGBTQ+ support

Talking about issues surrounding sexuality and gender can sometimes be difficult with friends and family. The Wellbeing Team offers support to students who are questioning their sexuality, are worried about 'coming out', are reconciling their sexuality and/or gender with their identity, and any other concerns they may be experiencing.

The Mental Health and Wellbeing Team can offer one-to-one confidential support and advice and can signpost to other organisations and support when appropriate. We also currently have a 'Pink Therapist' who can offer specialist LGBTQ+ wellbeing support, as well as LGBTQ+ awareness training.

Care leavers

The University is committed to supporting all of its students, and has a dedicated support service for those who come from a background in care. We recognise that some of these students may face particular challenges in relation to accommodation and finances, and may have experienced disruption in their schooling.

STUDENT GOVERNANCE

Complaints

Your time at university is important to us and we want to help you get the most out of your studies. If you think that we've fallen short in some way, you can let us know and we'll work with you to try to resolve it.

FINANCE/MONEY

With one in three jobs requiring degree-level skills and graduates earning an average of £9,500 a year more than non-graduates*, coming to university is an investment in your future career.

Money, fees and grants

Information on the relevant fees for each course can be found on our website at www.bcu.ac.uk/courses. Most students do not have to pay tuition fees up front and there are a range of funding options available to support you.

Loans are available for eligible students to cover the full cost of your tuition fees and there are also loans for living expenses, such as accommodation and travel, with the amount available depending on your personal circumstances. You start to pay the student loan back once you are in work and earning above a set threshold. Loans are subject to conditions and arrangements may change in future, depending on government legislation. There are also non-repayable grants available for some students with disabilities, students who are parents or who have an adult who is financially dependent on them, or students in receipt of certain benefits.

Student Support Service

We know that financial health can impact on your physical and mental wellbeing. To help you balance your budget we can offer advice and support on the money you have, help you seek paid work, and give you tips on making your money go further.

We run various activities during National Student Money Week aimed at checking your financial health and helping you to make the most of your resources including time and money. For more information visit, www.bcu.ac.uk/student-support.

Hardship Fund

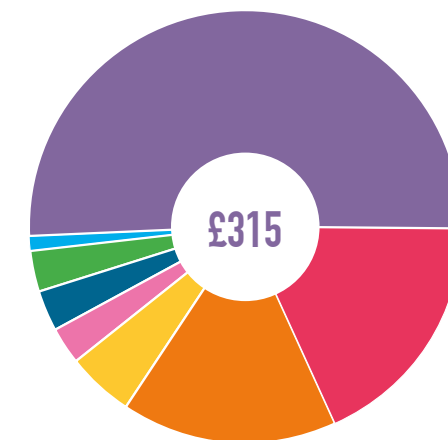

The University's Hardship Fund is intended to help students experiencing financial difficulties due to an unexpected shortfall in funding which is impacting on their success and/or progression. The Fund consists of a sum of money which has been made available to support as many eligible students as possible, who are engaged and committed to their studies, in achieving a positive outcome from their time with us.

There are limited funds available, and any award is made at the discretion of the University, with priority given to students in certain disadvantaged UK domicile groups. The Fund cannot help with the payment of tuition fees. An eligibility, application and selection process applies and is updated each academic year. As part of the application process an assessment of a student's income and expenditure will be carried out. For the latest eligibility criteria and terms of the Fund, visit www.bcu.ac.uk/hardship-fund.

WEEKLY ESTIMATED LIVING COSTS

Please see below for an example of what you might spend on living costs at university. These figures exclude fees, which do not usually have to be paid up front, and will vary from student to student.

Accommodation	£160
Food and toiletries	£55
Socialising	£50
Travel	£15
Telephone	£10
Books	£10
Clothes	£10
Laundry	£5

SOME FACTS TO PUT YOUR MIND AT EASE

Loans are available to cover the full cost of your tuition fees.

There are also loans to cover food, accommodation and travel.

You start to pay the loan back once you are in work and earning above a set threshold.

If your income falls back below that level, payments will stop automatically.

Anything you have not repaid after 30 years is written off.

www.bcu.ac.uk/finance

OUR RESEARCH

RESEARCH AT BIRMINGHAM CITY UNIVERSITY UNDERPINS OUR LEARNING AND TEACHING, IS DEMAND LED AND INCREASINGLY INTERDISCIPLINARY.

WE ARE COMMITTED TO DISCOVERING NEW KNOWLEDGE AND DELIVERING REAL BENEFIT TO CULTURE, INDUSTRY, SOCIETY AND THE ENVIRONMENT.

Our researchers work across disciplines and with collaborators locally, nationally and internationally to produce research of high impact to society, the environment, culture and the economy. We have launched the UK's first Centre for Brexit Studies, researching all aspects of the UK's vote to leave the EU, including the impact on the British and European economies.

Our Research Excellence Framework (REF) 2014 results demonstrate the public benefit of our research to society and the economy, with almost 90% deemed to have either 'outstanding' or 'very considerable' impact.

www.bcu.ac.uk/research-centres

CASE STUDIES:

HUMAN RIGHTS AT THE UN

BCU researchers are providing evidence for the United Nations, making recommendations for improving and enhancing human rights across the globe. Academics have submitted key reports to the UN to help bolster the support citizens in states receive from their respective governments.

ISLAMOPHOBIA IN FOOTBALL

Academics are researching the presence of Islamophobia in grassroots football. Interviews were carried out with 40 male and female players, with participants reporting experiences of hate crime from members of the public, as well as opposing players and managers. The research led to work alongside the Football Association to address and tackle issues of Islamophobia at all levels of the game.

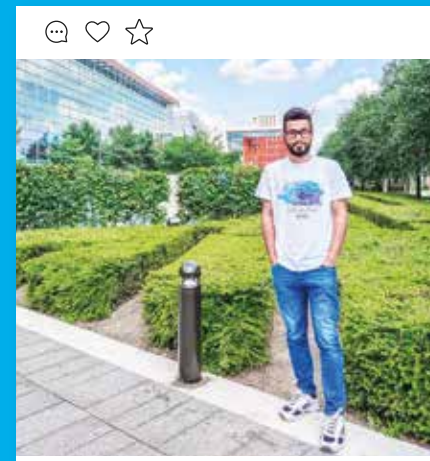

BIO FUELS

Birmingham City University researchers are working with partners across Europe to convert waste materials into sustainable resources including fuels, fertilisers and animal feeds. The research demonstrated that this waste biomass could effectively and efficiently be converted to biogas, to be used in homes as well as industry, reducing reliance on fossil fuels and driving a transition towards net zero.

MEET OUR VLOGGERS

Our students share their experiences and advice on all aspects of applying and preparing for university.

www.bcu.ac.uk/vlogs

Choosing your course for university

Whether you're looking to train for a specific career or wanting to study a subject you love, choosing a course is a big decision. Olivia shares her top tips in this vlog.

Why choose university

Can't make up your mind about going to uni or not? Vlogger Faustina made the video that will help you decide for good!

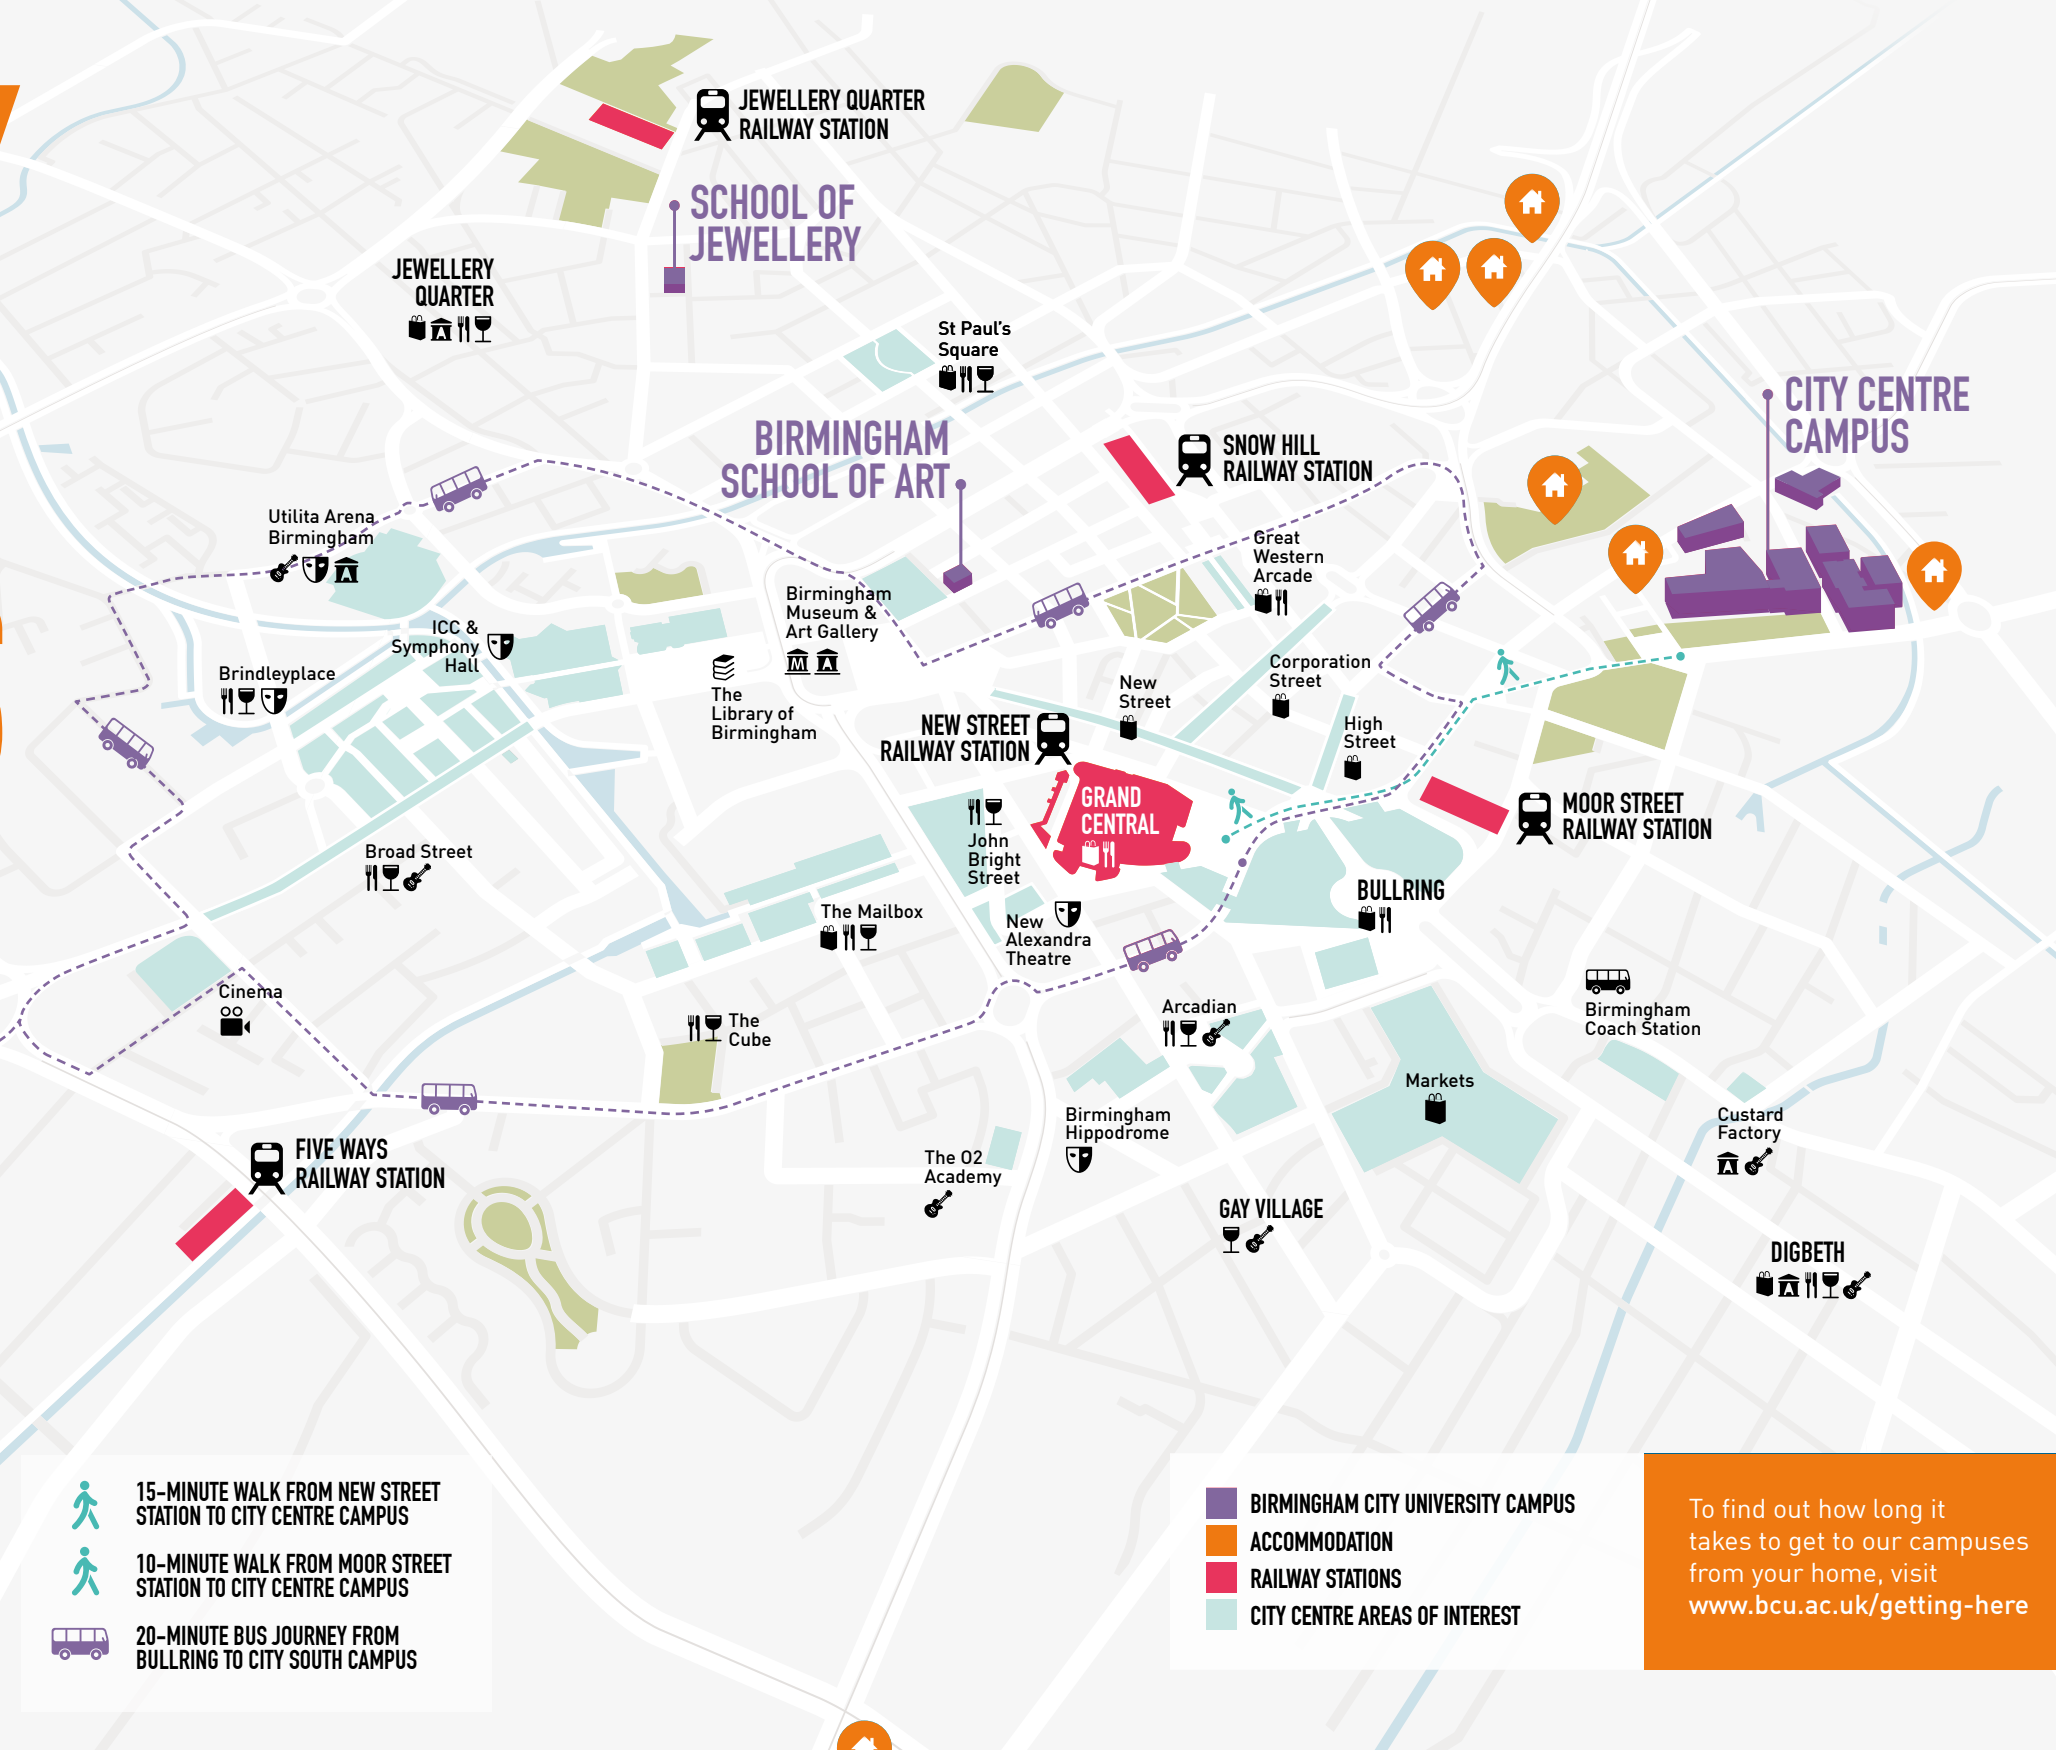

Five reasons to study at BCU

#1 - you'll become part of an incredible community! Watch Polly's vlog to hear her other reasons to become a student at Birmingham City University.

THE CITY IS YOUR CAMPUS

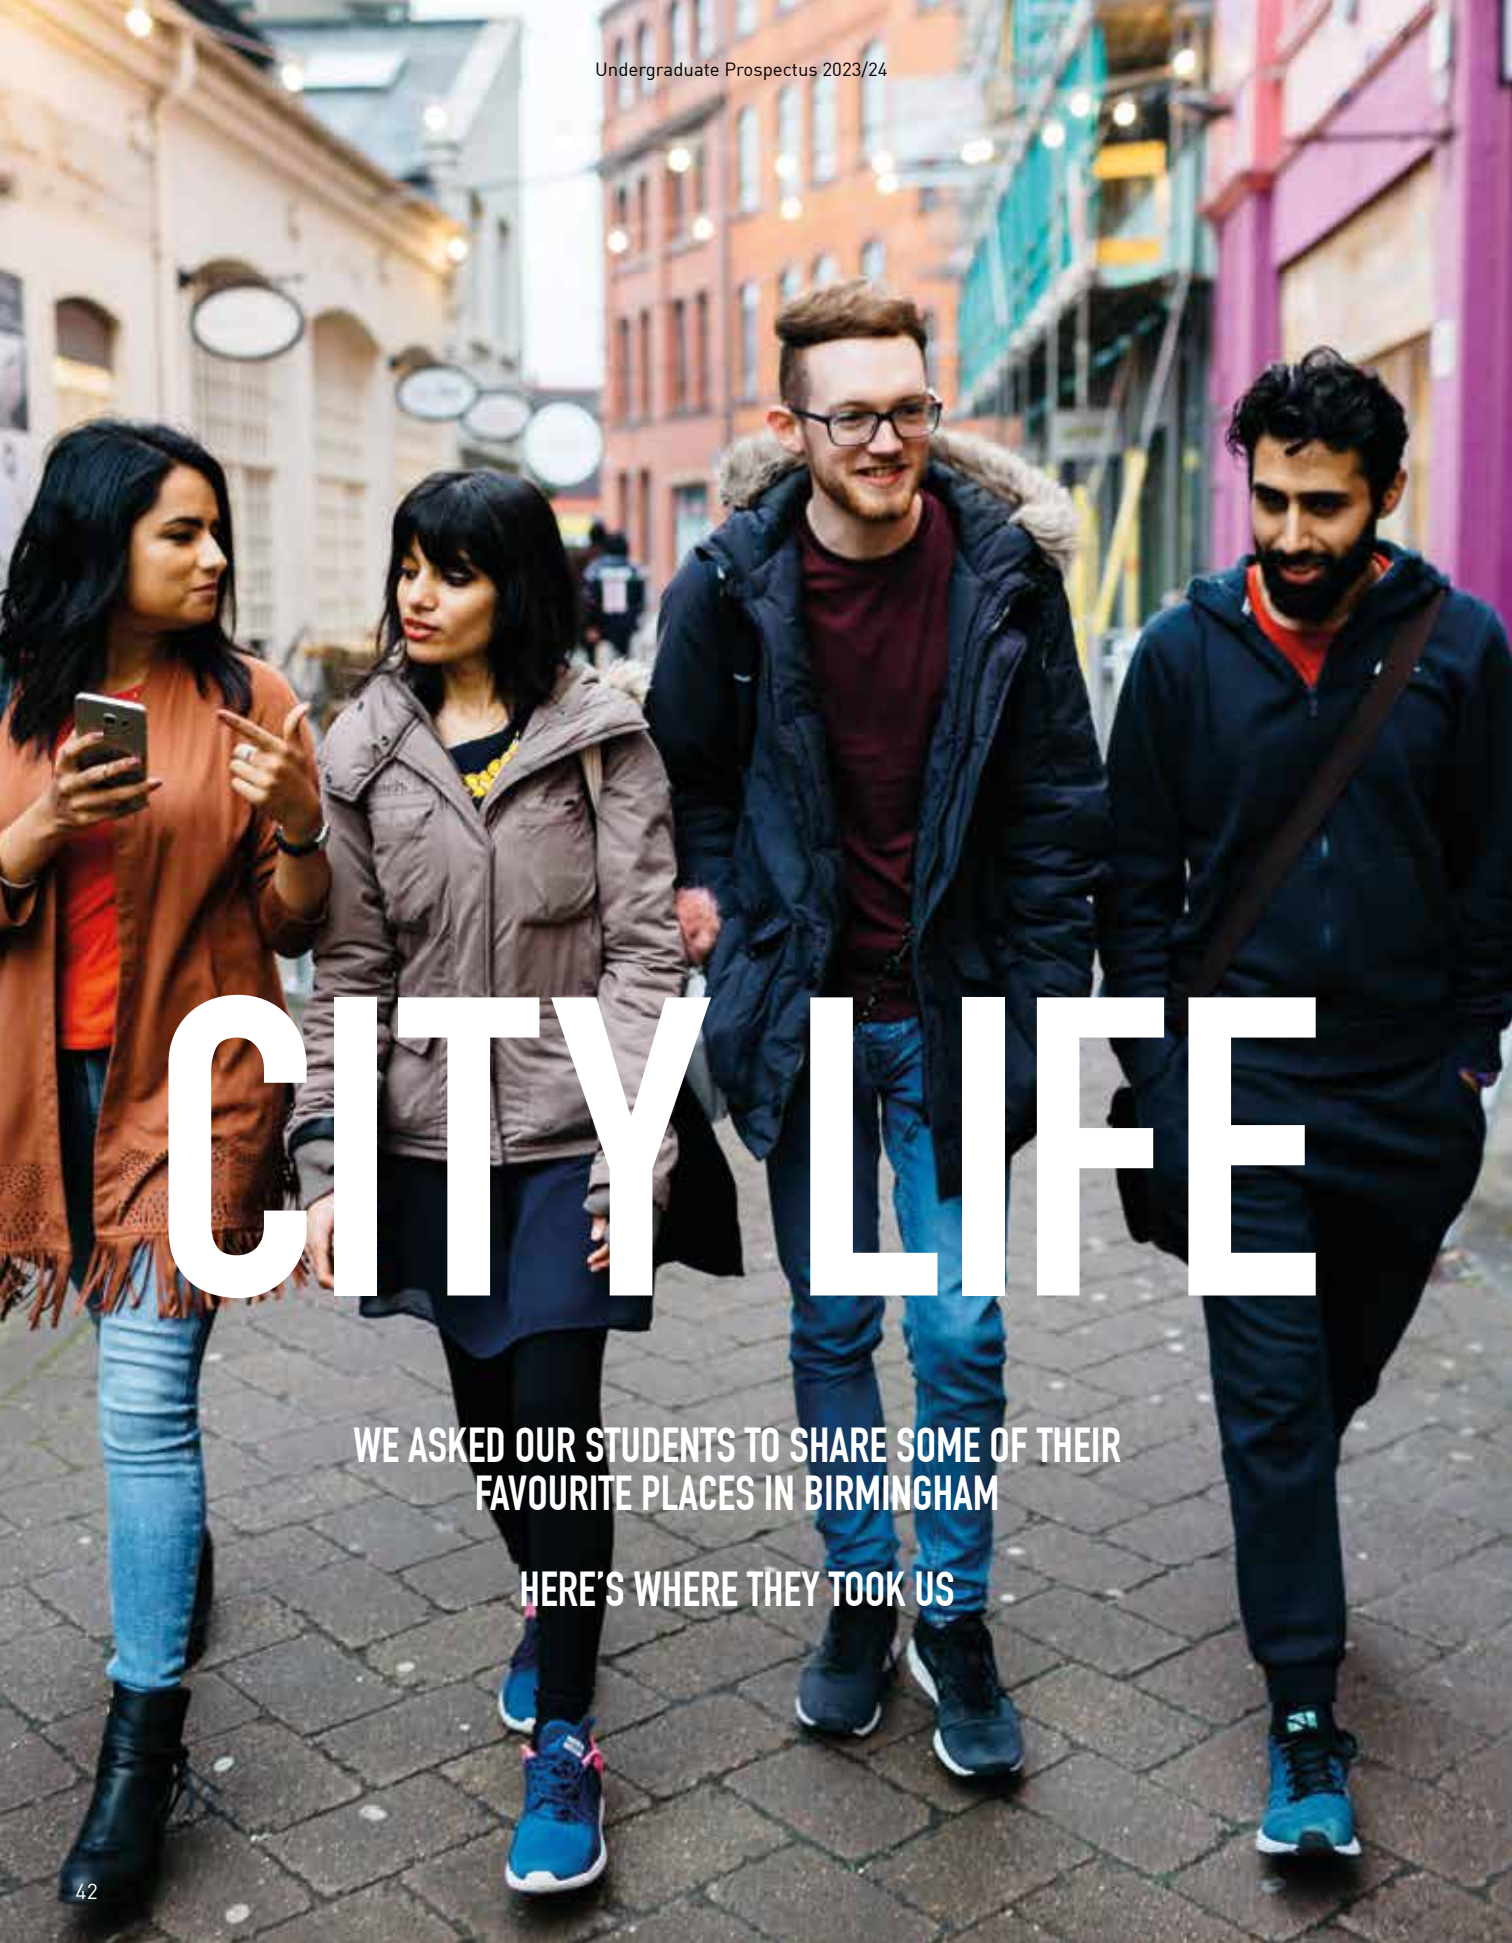

JOIN US AT BIRMINGHAM CITY UNIVERSITY AND YOU WILL BE RIGHT IN THE HEART OF A FORWARD-LOOKING AND VIBRANT CITY WITH PLENTY TO DO CLOSE AT HAND.

-  15-MINUTE WALK FROM NEW STREET STATION TO CITY CENTRE CAMPUS
-  10-MINUTE WALK FROM MOOR STREET STATION TO CITY CENTRE CAMPUS
-  20-MINUTE BUS JOURNEY FROM BULLRING TO CITY SOUTH CAMPUS

-  BIRMINGHAM CITY UNIVERSITY CAMPUS
-  ACCOMMODATION
-  RAILWAY STATIONS
-  CITY CENTRE AREAS OF INTEREST

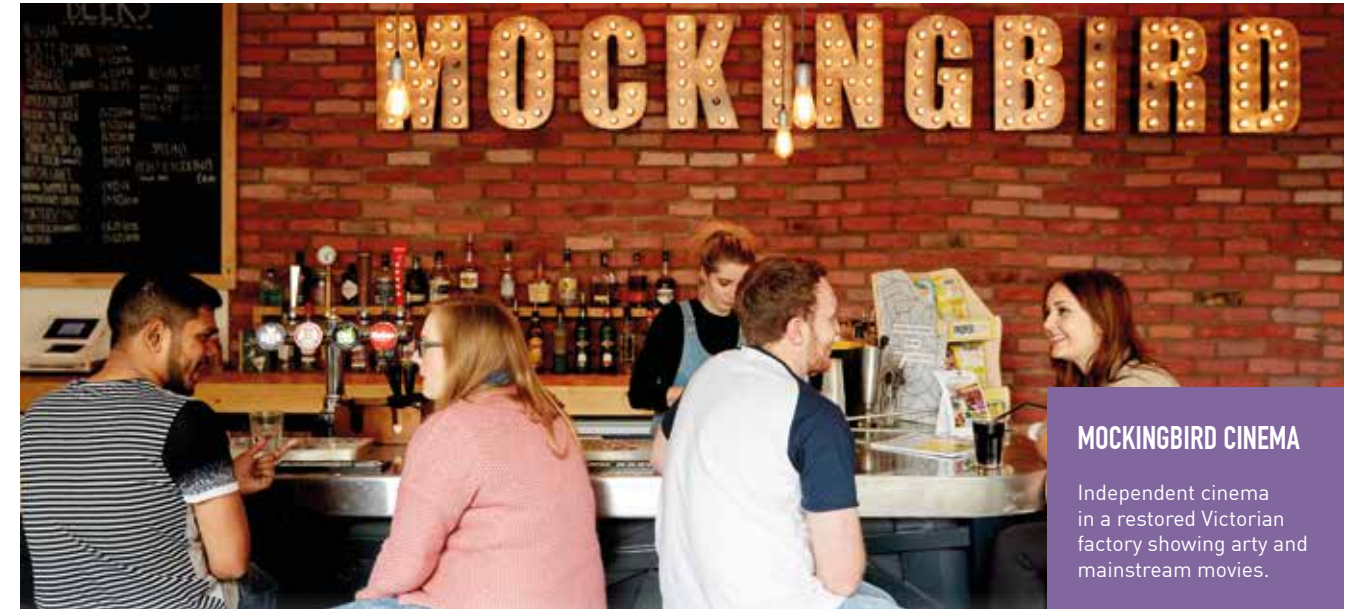

To find out how long it takes to get to our campuses from your home, visit www.bcu.ac.uk/getting-here

CITY LIFE

WE ASKED OUR STUDENTS TO SHARE SOME OF THEIR FAVOURITE PLACES IN BIRMINGHAM

HERE'S WHERE THEY TOOK US

MOCKINGBIRD CINEMA

Independent cinema in a restored Victorian factory showing arty and mainstream movies.

SHOPPING AT GREAT WESTERN ARCADE

Birmingham's arcades offer the chance to shelter from the elements while enjoying some interesting independent shops.

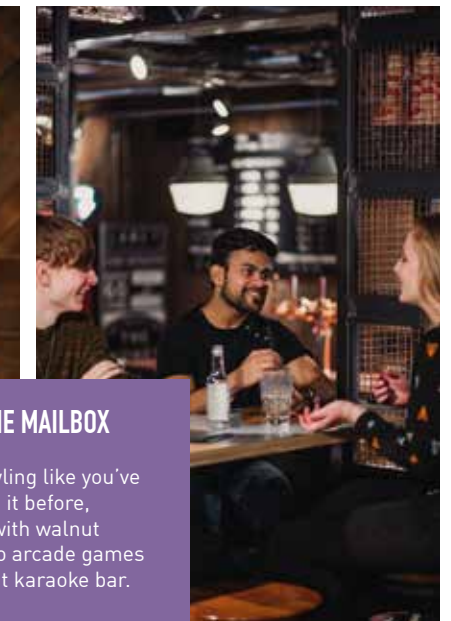

STREET ART IN DIGBETH

Digbeth is well known as Birmingham's cultural hub, with art studios, creative businesses and street art aplenty.

LANE 7, THE MAILBOX

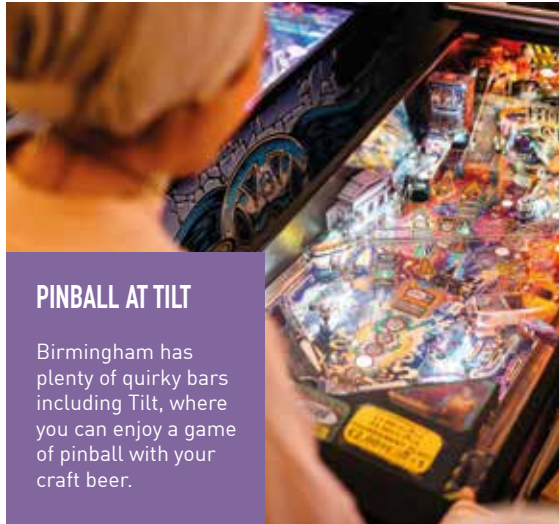

This is bowling like you've never seen it before, complete with walnut lanes, retro arcade games and a UV-lit karaoke bar.

GHETTO GOLF

This indoor crazy golf venue incorporates graffiti, street food and cocktails for a truly unique night out!

PINBALL AT TILT

Birmingham has plenty of quirky bars including Tilt, where you can enjoy a game of pinball with your craft beer.

PANCAKES AT CHERRY REDS

Set yourself up for the day with a tasty breakfast from one of Birmingham's popular cafés.

VINTAGE SHOPPING AT COW

Fancy a bit of shopping? As well as big-name stores in the Bullring, we have plenty of quirky independent stores like vintage clothes outlet Cow.

BURGERS AT ORIGINAL PATTY MEN

Having started out at Digbeth Dining Club, the OPM guys now have their own permanent outlet with some of the best burgers in town.

DRINKS AND JENGA AT RUIN

If you like to 'balance' games with a drink, the Ruin pub – one of many characterful taverns in the Digbeth area – has both!

THE NATIONAL SEA LIFE CENTRE BIRMINGHAM

From giant turtles to sharks and penguins, this aquarium in the city centre is a great day out with friends.

TAKE A WALK ALONG THE CANAL

Our huge network of canals stretches across the city and is perfect for strolling, jogging or cycling.

THERE'S PLENTY MORE TO SEE AND DO IN BIRMINGHAM – FROM MUSIC AND CULTURE TO TOP-CLASS SPORT, WE HAVE ALL YOUR INTERESTS COVERED.

MUSIC

There's a host of great live music destinations to be found across the city – from sticky-floored pubs and intimate jazz bars to the famous O2 Academy and Jools Holland's Jam House.

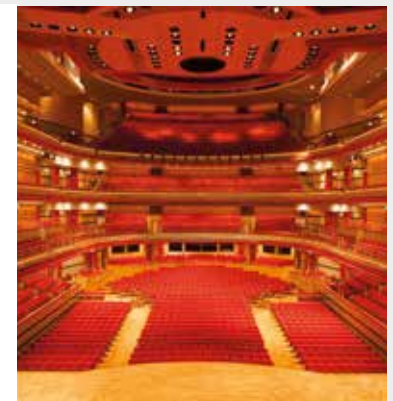

SPORTS

Whether you're interested in sport as a participant or a spectator, Birmingham has plenty to offer. The city is set to host the Commonwealth Games in 2022, underlining its reputation as a destination for major sporting events. There are three big-name football clubs nearby and international cricket takes place at Edgbaston.

CULTURE

With a world-class symphony orchestra, royal ballet company and theatres, Birmingham has some of the finest contemporary arts venues in the country, while one of the city's most exciting facilities is the state-of-the-art, £188 million Library of Birmingham.

RELAXING

If you want to get out and about, the city has over 8,000 acres of park and open space, making it one of the UK's greenest cities.

GO GREEN

AT BCU

PUTTING THE ENVIRONMENT AND SUSTAINABILITY AT THE HEART OF WHAT WE DO

We recognise the important role we play in being part of the solution to climate change and sustainable development through top-class learning, teaching, research and day-to-day operation.

GO GREEN EVENTS CANAL CLEAN-UP

HEDGEHOG FRIENDLY CAMPUS

SOLAR PANELS ON OUR BUILDINGS

INSTALLING THE BCU BEEHIVE

We have an Environmental Plan 2020–25, with a commitment to being a zero carbon institution and continually improving our environmental performance. Environmental sustainability is also a priority in our University Strategy 2025.

You can be part of our Go Green journey throughout your time with us by getting involved with green events, initiatives such as the Hedgehog Friendly Campus campaign and our allotment areas, and joining the Earth Society. We also have a Sustainable Students and Bicycle User Group.

 BEE HIVES INSTALLED	 ALLOTMENTS FOR FOOD GROWING
 ZERO CARBON COMMITMENT	 SOLAR PANELS INSTALLED ON OUR BUILDINGS
 WE USE 100% RENEWABLE ELECTRICITY AND GAS	 SUSTAINABLE CATERING POLICY
 ACCREDITED ENVIRONMENTAL MANAGEMENT SYSTEM (ISO 14001)	 HEDGEHOG FRIENDLY CAMPUS

A PLACE TO CALL HOME

University Locks flat

AT A GLANCE

Over 2,000 rooms available

Shared kitchen, living areas, laundry facilities and social/study rooms

Easily accessible – close to public transport links

CCTV coverage and security staff at each site

Access to free wi-fi

bcu.ac.uk

WE OFFER ACCOMMODATION AT VARIOUS LOCATIONS AROUND THE CITY. OUR HALLS OF RESIDENCE ARE NEAR TO OUR CAMPUSES AND PUBLIC TRANSPORT, SO YOU'RE IDEALLY LOCATED FOR STUDYING AND SOCIALISING.

Leaving home for university is one of the biggest moves you will ever make. With the excitement, freedom and independence of living in halls, it is the perfect way to meet new friends.

All first-year, full-time home, EU and international students are guaranteed University accommodation if they have firmly accepted an offer in the main application cycle and apply by the deadline date.

www.bcu.ac.uk/accommodation

Returning students in their second year and above are also able to re-book direct with some of our partner providers. If you decide that you want to stay in private accommodation, Birmingham City University Students' Union has its own letting agency, which we recommend to find private housing.

www.bcsu.com/homes

Classic room at Bentley House

Social space at Bentley House

WANT TO SEE MORE?

Visit www.bcu.ac.uk/accommodation to view our halls.

GO ABROAD

As a student at Birmingham City University, you may have the opportunity to study abroad at one of our partner universities as part of an international exchange programme linked to your degree.

You can also apply to study or work abroad with one of our funding schemes, where you may benefit from a grant that can contribute towards costs during your stay overseas. There are also a number of fantastic summer programmes which can be taken outside of your degree!

www.bcu.ac.uk/go-abroad

NICOLE WALSH
Mexico

I'd never travelled outside of Europe before so when I had the opportunity to go to Mexico, I jumped at the chance. I went by myself and learned how to meet new people and come out of my comfort zone. I've also learned that Mexicans are the friendliest people I have ever met!

VASILEIOS PANITSIDIS
USA

It was one of the greatest experiences I have had during my academic life. I surely recommend to any student to take the opportunity to do a study abroad programme during his/her student life. An unforgettable trip that I will remember for my whole life. I had the chance to travel to a whole new place and get to know new cultures, people and environments, and I would do it again.

DAWID FRONTCZAK
Germany

Studying in Cologne, Germany, was one of the best times of my life. I not only spent time at another fantastic university, but also met friends from all over the world; people who will be friends for life. Studying abroad and meeting so many people along with so many experiences helped me develop in my studies and as a person.

CLAUDIA FERRARETTO
China

I could never have imagined being able to take part in such an unforgettable experience, in an amazing, inspirational, and vibrant location. Thanks to the summer school at one of BCU's partner universities, I had the opportunity not only to grow as a person, but also to enhance my experiences and background to apply to my studies and on a future career!

KUSH LAD
Taiwan

Who knew such a tiny island could overflow with so much love, kindness and memories for a lifetime. Yuntech enabled us to learn basic Mandarin in just 10 days, guided and taught by the most passionate teachers. The study partners welcomed us, they immersed us into their culture, their families, and the beauty of Taiwan in each of their cities or districts.

HASSAN UL-HAQ
Australia

My experience in Melbourne is one that I will never forget and it has also allowed me to experience another country's creative industry. Not only this but it has allowed me to meet some incredible individuals who have inspired me and allowed me to think outside my own creative bubble.

YOUR STUDENTS' UNION

BIRMINGHAM CITY UNIVERSITY STUDENTS' UNION (BCUSU) IS YOUR STUDENTS' UNION. WE'RE HERE TO MAKE SURE YOU HAVE THE BEST POSSIBLE EXPERIENCE THROUGHOUT YOUR TIME HERE. WE'LL BE WITH YOU EVERY STEP OF THE WAY!

When you start at BCU, you automatically join as a member of the Students' Union. This means you have access to all of our services and facilities, including:

Top-notch support and advice from our specially trained advisers on a range of topics, including money, health, academia and housing.

A voice throughout your time here: we guarantee you will be listened to and represented by us! We campaign on your behalf to make your student experience even better.

Nearly 100 student societies for you to get involved in, including activities, religion, special interest and subject specific. As well as a great way to meet new people, being a member or leading a student group will look great on your CV!

Our very own lettings agency to help you find your next student home without the hassle.

Exciting entertainment, from nights out, to subsidised events and day trips. We've got something for everyone!

The Eagle & Ball, our **Grade II listed pub** on the City Centre Campus, with special prices on all our food and drinks and a special entertainment programme just for you.

Shops on our campuses, offering all of those essential items you'll need.

We're run by students, for students. Our Executive Officers, voted for by you, lead BCUSU to ensure your voice is heard in lobbying for change.

There are so many ways you can get involved in BCUSU. Join or create a society, become a Rep, work in one of our outlets, or even put yourself up to run the organisation in our elections!

www.bcusu.com

Top-notch support and advice

Help finding your student home

Running activities for you; from nights out, to subsidised day experiences

A unique, Grade II listed pub and The Social Kitchen

Campus shops for all your daily student essentials

A voice throughout your time here

Nearly 100 student groups to get involved in

INTERESTED IN SOCIETIES?

We have a number of societies for you to get involved in! See what's on offer at www.bcusu.com/get-involved.

GET INTO SPORT

WHATEVER COURSE YOU STUDY, YOU'LL BE ABLE TO ACCESS A RANGE OF SPORT AND PHYSICAL ACTIVITY OPPORTUNITIES HERE AT BIRMINGHAM CITY UNIVERSITY.

Whether you want to compete at a high level or just try something new, we have an activity suitable for you! From badminton to volleyball, we have clubs in over 20 different sports, with many of those sports offering the chance to compete in the interuniversity BUCS (British University and Colleges Sports) leagues.

If competitive sport isn't for you, our Active Wellbeing sessions allow you to take part just for fun, enhancing your health and fitness, making new friends and providing an occasional break from your studies.

We also offer the chance to take part in courses to become a coach or referee, allowing you

to contribute to the development of sport here or in the wider community.

The placement opportunities that arise from our contacts in the sporting world benefit all students, not just those on sport-related courses – from working for Aston Villa as part of the matchday media team to developing the software for an athlete monitoring app, there are a wide range of opportunities.

Our sports scholarship programme provides a range of support using our staff and facilities, such as sports therapy, conditioning and mentoring, potentially worth several thousand pounds. Any student who competes in sport at a high level may apply.

OUR PARTNERS

We have developed partnerships with a range of sporting bodies to enhance the student experience through placement, coaching and volunteering opportunities:

- Warwickshire County Cricket Club
- Team Birmingham Basketball Club
- Aston Villa FC
- City of Birmingham Swimming Club
- Moseley Rugby Club
- England Squash
- The Rugby Football Union
- Basketball England
- Edgbaston Priory Club.

 Over 25 sports clubs that you can join

 Complete beginners welcome

 Meet new people from different courses

STEP-BY-STEP APPLICATION PROCESS

1

FIND YOUR COURSE

Have a look at this prospectus, our website and our UCAS course profiles (Institution code: B25) to find out more about which course is for you. If you need a bit more help, the Pre-Entry Enquiries Team is a dedicated information and guidance team here to help you find out more about studying at Birmingham City University. We'll provide you with the information you need to make an informed choice about choosing the correct course.

2

COME AND SEE US

To really get a feel for life at the University, there is nothing better than visiting us in person. At our Open Days, you can chat with staff and students, view our fantastic facilities, learn more about the Students' Union and take a tour of our accommodation.

3

APPLY ONLINE

If you've been inspired by what Birmingham City University has to offer, the next stage is to apply to us, via the Apply link in the relevant course profile on our website. You apply for most full-time courses through UCAS (Institution code: B25); for part-time courses, and a few other programmes where indicated, you apply direct.

4

RECEIVE AN OFFER

Once we have reviewed your application, we may choose to make you an offer. We have a range of offers available based on your circumstances. For more information visit www.bcu.ac.uk/offers.

In some cases, an interview, portfolio or audition will be required first. If we make you an offer you will also be required to disclose details of certain criminal convictions you may have. For some courses (such as those leading to professional registration) you will need a satisfactory enhanced Disclosure and Barring Service Check and Occupational Health Assessment. A mandatory vaccination requirement may also be in place prior to placements in a health and social care setting.

5

KEEP IN TOUCH

We will communicate with you via UCAS Track and the University's Applicant Portal, using the email address provided in your application.

6

SELECT YOUR OFFERS

You use UCAS Track to choose which offers you wish to accept – one 'firm' and, if you wish, an 'insurance' offer, based on what is the best fit for you.

7

CHOOSE YOUR ACCOMMODATION

Once you've accepted a course offer, you need to apply for your accommodation, with applications opening in March. If you apply before the deadline, using the portal on our website, you're guaranteed a place.

8

SORT OUT YOUR FINANCES

You'll need to apply online for student finance, and may need to provide proof of ID and income. For more details, see the Student Finance England website at www.gov.uk/student-finance (or the equivalent in Scotland, Wales or Northern Ireland if you live there).

9

RESULTS AND CONDITIONS

Before your place is confirmed, you will need to meet any conditions in your offer – usually achieving certain exam results. If you get the results you need, great – you will soon be able to enrol! Even if you've just fallen short, we may still be able to accept you, or we operate an automatic alternative course offer process and may make you an offer for a different course if appropriate.

10

ENROLMENT AND WELCOME WEEK!

Before you arrive on campus, you'll receive an email to enrol online and officially become a BCU student. Your first week at university is then your chance to settle into your accommodation, meet your lecturers and make new friends.

Our Welcome Week – organised by the Students' Union – is a great opportunity to find out more about university life, join clubs and societies, and pick up some great student-specific offers and freebies!

WHAT HAPPENS NEXT?

Many courses require attendance at an interview, portfolio review or audition before an offer can be made as part of the selection process; an offer may be followed by an invitation to attend an Applicant Taster Day. We will communicate with you via UCAS Track and the University's Applicant Portal, using the email address provided in your application.

UCAS EXTRA

If you are not holding any offers from your first five choices, you can apply via UCAS Extra by referring yourself to one institution at a time. You might be asked for a revised Personal Statement if your subject area differs from that on which your original one was based.

CLEARING

If you apply to UCAS after 30 June or are not holding an offer from your five choices in the main UCAS cycle or UCAS Extra, you will be eligible for Clearing. The University's online Clearing support service opens in early July with a hotline available on the morning that A Level results are published. We also hold a Clearing Open Day on the Saturday following A Level results day.

Courses with vacancies will be listed on our website. If you don't have a confirmed offer and are in Clearing, please call our Clearing Helpline.

+44 (0)121 331 6777
clearing@bcu.ac.uk

FURTHER INFORMATION

Further information can be found in the How to Apply section of the individual course profile on the University website at www.bcu.ac.uk/courses.

ENTRY REQUIREMENTS

WE ARE COMMITTED TO PROVIDING OPPORTUNITIES FOR PEOPLE FROM ALL EDUCATIONAL BACKGROUNDS AND EXPERIENCES TO PARTICIPATE IN HIGHER EDUCATION.

That's why we welcome applicants with a mix of academic and vocational qualifications, and consider each application on its merits. Entry requirements vary between courses, with most using the UCAS tariff points system.

Please check our website for details of other qualifications accepted, at www.bcu.ac.uk/courses.

How can I get more help?

- Your teachers and advisers in school or college will give you advice on the best qualifications to take, based on what you enjoy and perform well in.
- You should check university entry requirements carefully. These are published on our website and on the UCAS course entry profiles.
- You can also speak to someone at UCAS by calling +44 (0)371 468 0468.
- See full details of the tariff at www.ucas.com/tariff.
- Work out your tariff points using the UCAS Tariff Calculator at www.ucas.com/tariff-calculator.

International students

For undergraduate courses, you should be educated to a standard comparable to British GCSE and/or A Level. Some qualifications may enable you to enter at a later stage, for example directly into the second or third year. www.bcu.ac.uk/international/your-country.

Data protection

The information you provide on your application form will be used to help us make a decision about whether you can be offered a place and to deal with the accompanying administration. Full details about how we process your information can be found at www.bcu.ac.uk/privacy-policy.

Deferred entry

If you are thinking about taking a year out before coming to Birmingham City University, we will be happy to consider an application for deferred entry for one cycle for most courses. Applicants have to have met all conditions of entry by 31 August of the cycle in which the application was made. If you do defer entry, you will need to pay the relevant course fee for the academic year that you start your course.

Direct entry to a later stage of a course

If you already have an advanced qualification or significant relevant experience, you may be eligible for admission with credit, in accordance with our Recognition of Prior Learning Process which maps current qualifications/experience against the BCU programme. This means that you can be admitted to a later stage of the course. Applications should be made via UCAS, UCAS Conservatoires or the online application process, and you may be required to provide further supporting information such as a transcript or reference, or be invited for interview.

Guidance for students who may need additional support

If you have a disability, long-term health condition, mental health difficulty, autism/Asperger's or a Specific Learning Difficulty such as dyslexia, please visit the University's Disability Support web pages to find out how we support students with a disability and what you need to do if you would like disability support at university.

To tell us about your disability, please complete our online profile and consent form via our website at www.bcu.ac.uk/disability.

If you are leaving local authority care to come to university or you are estranged from your family, the University can offer you additional support. Please visit the University's web pages or email sa.wellbeing@bcu.ac.uk for more information.

Birmingham City University strongly encourages you to tell us about any additional support you may need so we can help you to achieve your full potential at university.

The BSc (Hons) Accountancy degree at Birmingham City Business School is designed to equip you with technical knowledge and skills as well as a range of employability skills, attributes and attitudes. It will encourage your intellectual and ethical development towards becoming a professional accountant.

It provides a valuable introduction to the worlds of accountancy practice, commerce and industry, underpinned by principles of good governance and ethical decision-making. This will prepare you for a long-term financial career as an accountant, allowing you to progress in many financial and related roles as well as the accounting profession. We create graduates who possess a global outlook, with the conceptual and applied knowledge in the field of accounting that will enable you to make a positive impact on society.

This course offers an accounting curriculum that is up to date, vocationally relevant, and reflects the complex and challenging nature of the accounting and business environment.

You will build expertise in areas including financial and management accounting, corporate finance, international accounting and finance issues, data analysis and business technology. You will have the opportunity to use software relevant to the modern business environment, equipping you with the skills and experience sought by employers.

Looking for a career in a rapidly growing sector? The BSc (Hons) Accounting and Islamic Finance degree will see you graduate with the skills the finance industry requires.

Islamic Finance is a fascinating and dynamic multi-disciplinary area of the international financial services sector. As an established niche of the finance industry, it is set to grow at an exponential rate over the next few years. As a result of the rapid growth experienced in this emerging area, individuals and finance organisations find themselves with limited knowledge of its unique and profound nature, leading to a significant skills shortage which potentially offers graduates a range of opportunities.

This course will introduce and develop your knowledge in the various specialised areas such as Islamic Economics, Islamic Capital Markets and Islamic Social Finance. This will provide you with opportunities to gain industry experience, giving you the edge when it comes to competing in the graduate jobs market.

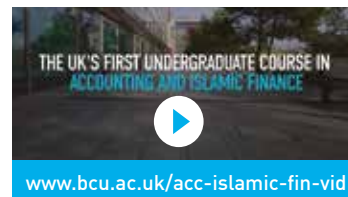

There will be potential opportunities to gain work experience in countries where Islamic Finance services are being set up, or where they are established but in need of qualified staff.

Full information:

www.bcu.ac.uk/accounting-islamic-finance

This course can also be accessed via a foundation year. Please see page 220.

The BSc (Hons) Accounting with Business degree at Birmingham City Business School will provide you with the skills, knowledge and expertise that you need to make an impact across all sectors of the global business environment. We equip graduates with the skills and attributes that will allow you to become future organisational decision-makers in the world of business.

This course will maintain the focus of accounting but will also provide an understanding of the wider context in which accounting operates within the global business world. It offers a curriculum that is up to date and vocationally relevant, examines ethics, sustainability and social responsibility, and reflects the complex and challenging nature of the accounting and business environment.

As you progress, you will be given the opportunity to become a more effective and creative problem-solver, and develop a set of graduate skills which will encourage you to become enterprising and employable. Furthermore, you have the opportunity to gain accreditation from the Chartered Management Institute (CMI), providing you follow the CMI pathway in your final year.

Completing the course will not only enable you to follow careers in accountancy, but careers in any aspect of business, as you'll have an in-depth understanding of all aspects of business operations.

Acting

Royal Birmingham Conservatoire

CAMPUS

The School of Acting is moving to a new location in Birmingham city centre in the 2022/23 academic year. Details will be available on our Acting course pages at www.bcu.ac.uk/courses as soon as they are available.

DURATION

20 weeks full-time
34 weeks part-time

UCAS CODE

N/A – apply direct

ENTRY REQUIREMENTS

There are no formal qualifications required, but you will be required to audition for the course, either in person as part of a workshop or via a self tape.

This course, with two pathways of delivery to choose from, allows you to increase your skills in and awareness of auditioning, and discover the essential requirements for many drama school auditions.

While gaining increased confidence towards performing, you will also be given skills classes in voice, movement, dance and acting. The Foundation Course in Acting, available both full-time or part-time, will give you a broad foundation in performance techniques and methods, and will be invaluable to anyone wanting to go to drama school or take up a place on a performance course at university.

The course offers students the chance to be entered for a Level 3 qualification which may be worth up to 65 UCAS points.

The 20-week full-time course includes two terms of 10 weeks, each week consisting of up to 30 contact hours. With potential opportunities for professional workshops at Shakespeare's Globe theatre, plus theatre visits and visiting masterclasses, you will be given valuable insight into a challenging but exciting profession. The 34-week part-time course is delivered over three terms, two evenings per week, with six contact hours per week.

Please note: At 20 to 34 weeks in length, this Foundation Course in Acting does not qualify for Student Loans Company funding/finance for fees or living expenses. Payment plans are available.

Full information: www.bcu.ac.uk/foundation-acting

Content includes:

- 20-week full-time pathway**
- Acting and Improvisation
 - Acting Through Song
 - Voice
 - Solo and Ensemble Singing
 - Movement, Dance and Fitness/Yoga
 - Text Analysis
 - Stage Combat
 - Audition Preparation and Professional Skills

You will undertake four projects as part of the course:

- Devised Storytelling
- Musical Theatre Showcase
- Shakespeare Project
- Contemporary Playwrights Showcase

34-week part-time pathway
Terms 1 and 2

- Acting and Improvisation
- Voice
- Solo and Ensemble Singing
- Text Analysis
- Audition Preparation and Professional Skills

Term 3

- Production-based Project

ACCREDITATION

"Training at Royal Birmingham Conservatoire has shaped me into the woman I am today. We are so lucky to be working with teachers, and external directors, who know their craft incredibly well and who want the very best for you."

HAYLEY HARRISON

BA (Hons)

Acting

Royal Birmingham Conservatoire

Content includes:

Year 1

- Acting Theory and Practice 1
- Voice and Movement Practices 1
- Rehearsal Exercise

Year 2

- Acting Theory and Practice 2
- Voice and Movement Practices 2
- Performance Exercise

Year 3

- Recorded Media
- Production
- Professional Development

Apply your passion and complete your training at Royal Birmingham Conservatoire – we offer drama school-level training to mould you into a versatile actor and help you launch your career. BA (Hons) Acting develops you practically, personally and professionally, and prepares you for the dynamic and challenging world of the dramatic arts.

We have carefully designed a contemporary course that will prepare you for a creative career in front of a stage, screen or radio audience, including specialist training in voice, movement and singing. We prepare you to be a professional actor and, as a vocational training course, full attendance for a minimum of 30 contact hours a week would be expected.

Our graduates have gone on to enjoy successful careers on stage and screen. They have worked on hit TV programmes such as *Bridgerton*, *Derry Girls*, *Coronation Street*, *Call the Midwife* and *Line of Duty*, as well as on stage at prestigious theatres such as The Globe, the Royal Shakespeare Company, the West End and regional theatres. We aim to produce graduates with the entrepreneurial skills to both survive and thrive in the creative industries. This has been demonstrated through them setting up new companies, writing their own scripts, shooting their own films and producing their own work.

The course is demanding and energetic, allowing you to explore your potential in a supportive, exciting and challenging environment. We encourage you to reach your full potential and become the best that you can be.

For full entry requirements and fees: bcu.ac.uk/courses

This unique and enterprising course is built around preparing students to work in the expanding world of applied theatre, creating new drama with and for young people and community groups, and using theatre as a way of making a real difference.

The focus is on developing all of the skills needed to create compelling new performances and valuable and effective theatre projects. You will cover all the various skills of performance – acting, movement, voice and singing – but beyond that also address the whole of theatre-making: group devising, writing, facilitation, producing, funding and administration.

You will be equipped to create your own work, telling the stories that are most important to you, and also with the skills to make it happen. The majority of what you will learn on the course will be through practical experience – working with professional practitioners – and in real contexts, with communities responding to actual need. The final year is all about preparing for employment or freelance work as a confident and skilled practitioner.

The course currently has important partnerships with the Birmingham Repertory Theatre, Big Brum TIE Co, The Playhouse, Loudmouth, Geese, Open Theatre and more than 60 professional companies in the Birmingham area. We also have strong links with a wide range of practitioners, both nationally and internationally. In the second year, every student has a full-time placement with one of these companies for six to eight weeks, which is a crucial part of your preparation to graduate as accomplished applied theatre-makers – to go out and change the world.

Full information: www.bcu.ac.uk/applied-theatre

Architectural Technology is where Architectural Design meets Construction Technology. Accredited by the Chartered Institute of Architectural Technologists (CIAT) and the Chartered Institute of Building (CIOB), this course provides modern and successful design solutions based on a combination of aesthetics and advanced technologies.

Learn how to create new designs – as well as analysing old ones – that have buildability, technology, procurement and contractual relations in mind. All of this is set within the social, regulatory, technical, sustainable and aesthetic context of both the UK and global development industry.

You will use industry-standard digital tools and technologies such as Building Information Modelling (BIM), Computer-Aided Design (CAD), 3D printer and a laser scanner, which will enhance your employability and career progression with skills that give you a competitive advantage. As an Autodesk Training Centre (ATC) we provide access to on-campus training by certified Autodesk instructors, giving you digital skills that will be highly sought after by employers.

We have excellent relationships with employers, meaning there is a range of opportunities for work placements. We have industry partnerships with engineering, management and development consultants, currently including Mott MacDonald and Birmingham City Council's Urban Design team.

Full information:

From lectures by leading industry professionals to cultural study trips, live project briefs and engaging with real sites, clients and practitioners, this course has been structured to help you respond creatively to the challenges of expanding urbanisation.

If you are considering a career in architecture, studying here will equip you with everything you need to participate in shaping the future of architectural design. As well as being vocational preparation for practising architecture, this course introduces you to the wider societal influences.

Throughout your time here, you will be taught a range of hand and digital drawing and model-making skills in both two and three dimensions, and introduced to the concept of building information modelling which helps equip you for entering the world of professional practice. With the city of Birmingham as your initial architectural reference point, you will work collaboratively with tutors, internal and external practitioners, theorists and designers to hone your skills and build knowledge.

The course is accredited by the Royal Institute of British Architects. It includes a comprehensive set of activities in professional studies, including a two-week work placement, construction site visits and into-work seminars.

Full information: www.bcu.ac.uk/architecture-riba-part-i

This course can also be accessed via a foundation year. Please see page 220.

Many innovative creative studios now define themselves as interdisciplinary, a word which we define as the fluid movement across the fields of art, design and technology. Rather than specialising in a particular discipline, this cutting-edge course reflects how these studios practise by exploring the intersection between art and design, with the implementation of new creative digital technologies.

Our course will prepare you to be ready for employment within the creative industries by providing you with long-term creative skills. You will develop the necessary self-awareness to question, make, play and create with others.

The versatility of our experimental studio environment will enable you to explore the necessary collisions that the creation of innovative ideas now requires. Whether you choose to combine creative coding with foraging for natural materials, or photography with artificial intelligence, you will respond to live briefs set by real-life clients.

The flexible, student-centred approach to the curriculum, informed by professional practitioners, will enable you to be imaginative, confident and convincing in designing and shaping your role in tomorrow's free-flowing, boundary-free creative industries.

Full information: www.bcu.ac.uk/art-design

AVAILABLE SPECIALIST ROUTES:

[Art and Design with Creative Technologies | BA \(Hons\) 1163 \(1164 prof. placement\)](#)

All students will be introduced to the fundamentals of interdisciplinary design practice which forms the core ethos of this course. In line with the development of our digital futures, we are introducing an optional pathway in Creative Technologies which will give you the opportunity to focus specifically on developing your digital skills through a breadth of technological approaches.

ENTRY REQUIREMENTS

- Level 4 and 5 in an art discipline with 240 credits by the end of Level 5
- HND in a related subject
- Applicants must attend a portfolio review in order to receive an offer.

For full entry requirements and fees: bcu.ac.uk/courses

The BA (Hons) Art Business (Top-Up) course will provide you with the understanding and professional skills needed to navigate the broad range of career opportunities in the creative and cultural industries. You will be introduced to the current challenges and emerging opportunities for creative enterprise, encouraging you to respond with innovative approaches for the future.

This course focuses on the dynamic relationships and intersections between art and business, management and creativity, and provides a combination of theoretical and practical study.

You will examine some of the definitions, systems and structures of the creative industries, helping you to identify a position for yourself within an ever-evolving landscape. You will be supported to critically reflect on societal, political and environmental shifts that have implications for cultural value and relevant stakeholders.

Located in the culturally diverse city of Birmingham, the course offers opportunities to network and foster external relationships through live and practical experiences, helping you to identify future opportunities. Building confidence and a repertoire of flexible, responsive, adaptable and transferable skills will help to future-proof your career.

Full information: www.bcu.ac.uk/art-business

» DEVELOP THE PRACTICAL AND PROFESSIONAL SKILLS NEEDED TO RESPOND TO THE EVER-EVOLVING LANDSCAPE OF THE CREATIVE INDUSTRIES.

Content includes:

Our Automotive Engineering course will encourage you to innovate and work collaboratively with tutors, experts and peers to gain practical and theoretical engineering skills that modern employers want.

You will learn how to use the Conceive – Design – Implement – Operate (CDIO) teaching framework, so you can work on projects from initial design to implementation, and address developing challenges in the industry, such as lightweight structures, energy efficient transportation and sustainable design during your studies.

Gain practical experience so you can work in every aspect of the industry, from suspension to chassis and manufacturing systems. Our graduates have progressed into roles with leading manufacturers such as Jaguar Land Rover and Ford Motor Company.

We are one of the UK universities taking part in the international Formula Student event at Silverstone, hosted by the Institution of Mechanical Engineers (IMechE). Our team is truly interdisciplinary, attracting students from a wide range of courses, all contributing towards our goal to bring engineering skills, team spirit and employment-relevant skills together.

Biomedical engineering is an exciting, cutting-edge and fast-emerging sector in the United Kingdom and overseas. It applies engineering solutions to meet the challenging demands of the healthcare sector, and plays a significant role in improving the quality of patient care.

Our Biomedical Engineering course pulls in many different subjects, from mechanical to electrical and electronic engineering, while embedding the principles of human anatomy and physiology.

This course offers you an enriched learning experience via its practice-led, knowledge-applied course. You will be supported in undertaking appropriate elective placement opportunities and work independently or in teams to solve biomedical engineering problems. You will interact very closely with a range of professionals, varying from medical engineers to medical practitioners working in private medical device industries and local healthcare trusts.

The knowledge and employability skills you gain will assist you to become an entrepreneur or engineer in the healthcare technology sector or use the research skills you have gained to emerge as a budding scientist.

Biomedical sciences embrace a number of important disciplines, including physiology, biochemistry, cell biology, microbiology and genetics. These subjects are important in the provision of healthcare and medical research, and underpin the biotechnology and pharmaceutical industries.

On this course, you will learn about how the human body functions in health and disease, and develop an understanding of the diagnosis, management and treatment of a range of diseases. You'll gain critical thinking and independent problem-solving skills, which will help you to navigate a successful career after graduation.

You will acquire important practical and scientific skills while being taught in our state-of-the-art life sciences laboratories. You will have the opportunity to take an optional professional placement in an industrial, clinical or research setting between Years 2 and 3 of this course. In the final year, you will undertake an independent Research Project where you will execute your own experiments under supervision.

Graduates may go on to a range of careers directly or after further training, as well as postgraduate study to obtain MSc, MRes, Physician Associate/Assistant and PhD qualifications.

This unique course is the first of its kind in Europe. If you are interested in the history, politics, popular cultures, artistic and social movements of people across the African diaspora, Black Studies will provide you with the big picture perspective through this growing discipline.

Your course will be taught by leading, research-active lecturers and tutors, where you will encounter a range of viewpoints, as well as gaining valuable experience outside the University.

Black Studies is an interdisciplinary subject that is committed to working with the wider community. Throughout the degree, we will engage you in the thinking and practice of contextualising your work within communities, and where possible, connecting you to projects and organisations outside of the University.

The course seeks to enable students with the capacities and skills needed to apply decolonising intellectual knowledge to a range of strategies for advancing community self-representation, social justice and global human rights.

Full information: www.bcu.ac.uk/black-studies

AVAILABLE SPECIALIST ROUTES:

Black Studies (Criminal Justice) | BA (Hons) 1050

Students will take Black Studies modules which explore the history, politics and experience of Black communities as well as examining the issues in society that produce such stark inequalities. Alongside these modules students will study Criminology-specific modules that explore the basis of, and issues with, the criminal justice system.

Full information: www.bcu.ac.uk/black-studies-criminal-justice

Building Surveying encompasses surveying, conservation, adaptation and repurposing of the built environment. By studying with us, you will embrace new innovations that will prepare you to support the development of a sustainable society. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

On this course, accredited by both the Royal Institution of Chartered Surveyors (RICS) and the Chartered Institute of Builders (CIOB), you will learn from building surveying experts with considerable practical experience, and develop your problem-solving, communication and interpersonal skills.

Benefit from our strong industry links by attending visiting lecturer talks and site visits, working on case studies and gaining work experience so you're prepared for employment. The skills we teach have helped our graduates secure roles with companies including Faithful+Gould.

Our excellent relationships with employers mean that you can undertake a work placement, helping you gain real insight about the work of building surveyors and make valuable professional contacts.

The course will provide you with the opportunity to develop specialist business expertise, while helping you learn key transferable skills, all of which will help you stand out when it comes to securing employment.

Your learning will embrace the development and operation of business markets and the management of key resources including human capital, as well as financial management, strategic management and cultural awareness, since we believe business can't be studied in isolation.

In addition, you'll gain an insight into digital business, exploring how technology has remodelled the business world, and reflect on accompanying issues around social responsibility and ethical behaviour.

Your course will foster your intellectual and ethical development and encourage your personal commitment to the socially useful purpose of becoming a business professional.

- Foundation Degree: 240 credits of appropriate prior learning (120 at Level 4 and 120 at Level 5), minimum of 60% overall
- HND in a related subject: Merit profile
- ABE Advanced Diploma: at least Grade B in two modules in a relevant subject
- GCSE Grade 4 or above in English Language and Mathematics, or equivalent.

For full entry requirements and fees: bcu.ac.uk/courses

This flexible and wide-ranging course allows you to tailor your studies to your interests, from Innovative Thinking for Organisation Development to Cross-cultural Consumer Behaviour. With a wide range of modules to choose from, you'll be able to follow a path that will help you to pursue your future career, with previous students progressing into roles with high-profile organisations such as npower and Zurich.

The course covers a whole range of areas with at least five modules for you to choose from. You will study full-time and be given attentive student support.

Working with other students from across Birmingham City Business School, you will develop and demonstrate your ability to collaborate, while other projects will require you to work alone and develop your independent learning skills.

You will work on a range of innovative and practical projects, including business reports, case studies, presentations and projects, all of which will help you to apply your knowledge to real businesses and real situations. Our staff will help to support and tailor your learning with expert industry knowledge and experience. They are researchers, authors and industry professionals who'll share their own practical and academic experience and expertise.

The applied nature of our BA (Hons) Business Economics degree prepares you to work across all areas of the economy, especially the private sector. Specifically, your degree combines the study of economics with a wide variety of applicable business-related theories/models, such as e-business, sustainability and innovation.

Economics is a major social science which studies the economy and its impact on society and the natural environment. Economics draws on and influences other social sciences and it is also a core business discipline, which is integral to understanding organisational behaviour, strategy and corporate performance.

This course will equip you with a firm foundation in economics, bringing to life diverse economic ideas and empowering you to understand the relevance of competing economic theories and their application to business decision-making.

This course provides you with a vast analytical toolkit, which includes mathematical and statistical analysis, critical thinking and the use of business tools and techniques to provide a richer understanding of the challenges contemporary businesses face within both the UK and international economies. During your study here you will have the chance to access our trading room and to work on a live client project with our Business Advice Centre.

The world of finance is rapidly changing, with new innovative financial products being developed on a constant basis. The present times have also witnessed an unprecedented number of companies failing because of poor financial management. All these challenges call for dynamic and brilliant people who can design financial solutions and make the world a better place.

The degree is designed to equip you with wider business and finance environment knowledge, offering you the opportunity to acquire key business and financial skills, and explore innovative practices and entrepreneurial skills.

The course team has years of industrial experience in the finance field as well as in academia. Therefore, students are assured of getting the help they need to excel on the course. You will learn from the course team's knowledge and experience, as you will be regularly engaging in inquiry-based and experiential learning, which has been designed to assimilate work-based scenarios.

In order to enhance your employability, extracurricular activities such as trading training, conferences and field trips will be arranged throughout the course. Outside speakers from industry will be invited to give presentations on how best to improve your employability, and you will also have the opportunity to gain industry experience by going on a professional placement.

Business Information Technology bridges the gap between IT and business to drive innovation and growth in the modern global organisation. This course embeds a systems philosophy of connectivity, to offer an in-depth understanding of business concepts and how to use IT to serve business needs.

It also provides essential skills that facilitate communicating and discussing technical and business ideas effectively. You will work collaboratively with tutors, researchers and businesses, applying practice-based skills to real-life case studies and live project briefs which will develop your problem-solving and analytical skills. Learn how to think like a coder, to influence the design, development and use of information systems and technology in organisations.

Work in our advanced software development and computer programming labs, using dedicated facilities for systems analysis, networking, e-commerce and business intelligence – all of which reflect advanced professional practice.

You will also gain an in-depth understanding of how organisations can harness the data to improve decision-making. In summary, this course will give you the skills and knowledge to make IT work for businesses. You will develop your technical, research, design and organisational ability, and leave with the skills employers want.

The Business Management course will offer you a practical-based degree applicable to a wide range of sectors. You will be able to contribute to critical debates on industry-related contemporary issues and understand the dynamic needs of business managers in the 21st Century to reflect current knowledge and best practices.

You will gain specialist knowledge on a number of core functions of management, building your self-confidence to prepare you for a progressive and successful career in management. You will have the benefit of renowned industry speakers and live projects to inspire and help you to develop.

The development and operation of contemporary and international business markets will be embraced in your learning. This will also include the management of key resources including human capital, financial management, strategic management and cultural awareness.

You'll gain an important insight into digital business, exploring how technology remodels the business world, and consider the accompanying issues around social responsibility and ethical behaviour.

www.bcu.ac.uk/business-management

This course can also be accessed via a foundation year. Please see page 220.

» YOU HAVE THE OPPORTUNITY TO EMBARK ON A YEAR-LONG PROFESSIONAL PLACEMENT AS PART OF A FULL-TIME DEGREE COURSE.

Content includes:

Year 1

- Insights into Management
- Principles of Marketing
- Developing Your Personal Brand
- Introduction to Entrepreneurship

Year 2

- Supply Chain Management
- One Planet Issues
- Management Development
- Business Analytics

Year 3

- Leading and Managing Change
- Continuous Innovation
- Strategic Management
- Integrated Research Project

Foundation year content includes:

Accounting and Personal Finance; An Introduction to Management and Leadership; Business in Context; Developing Business and Academic Skills for Success; Developing Interpersonal and Marketing Skills for Success; Foundation Practice Project.

ACCREDITATION

“Undertaking a placement year with consistent support from staff, and the opportunity to apply theory to the real-world working environment has proved invaluable. BCU has exceeded my expectations from an academic and professional perspective.”

JAMAL QURBAN

AVAILABLE SPECIALIST ROUTES:

Business Management with Enterprise | BA (Hons) N20C
(prof. placement 1120)

Business Management with Enterprise provides a route for those who are interested in the development and sustainability of new business operations and who are considering launching their own enterprise.

You will be exposed to key enterprise modules which will help you get from idea to launch underpinned by academic theory. This route, which will be embedded throughout your course, will look to develop your skills, abilities and behaviours, and provide you with the tools you need to become a future entrepreneur.

Full information: www.bcu.ac.uk/business-enterprise

Business Management with Supply Chain Management | BA (Hons) N20D
(prof. placement 1121)

Business Management with Supply Chain Management gives you an opportunity to undertake specific modules designed to provide a deeper insight into the operation and complexity of the supply chain.

You will explore contemporary supply chain initiatives and review corporate strategy, globalisation, international alliances and the key features of procurement and outsourcing. This course provides you with the opportunity to examine the tools and techniques used to sustain and develop global supply networks.

Full information: www.bcu.ac.uk/business-supply

These specialist routes can also be accessed via a foundation year. Please see page 220.

www.bcu.ac.uk/bs-study-vid

“Many of the modules on my course provided me with the knowledge I needed for industry. I also learned about the many roles in civil engineering and the importance of working alongside others in the field, to ensure a project goes smoothly.”

ENTRY REQUIREMENTS

- A Levels: BBC
- BTEC Diploma: D*D*
- BTEC Extended Diploma: DMM
- Access to HE Diploma: 60 credits with 45 at Level 3
- International Baccalaureate Diploma: 28 points
- GCSE English Language and Mathematics at Grade 4 or above, or equivalent.

For full entry requirements and fees: bcu.ac.uk/courses

Civil engineers design and construct anything from buildings and bridges, to dams, power stations and motorways. This course will prepare you to work on these projects. You will focus on structures, materials, geotechnics and hydraulics, and your studies will be enhanced with site visits, field trips and guest lectures.

You will learn in a hands-on style in a simulated workplace environment, using the latest CAD software so you are equipped to make an impact in an important industry.

Our outstanding industry links give you a competitive edge, to help you progress to a successful career when you graduate. You will be provided with knowledge of the scientific, technical, environmental, economic and managerial aspects of civil engineering so that you will be able to apply yourself to both the design and management of civil engineering projects.

During the course, you will also develop the key transferable skills that modern employers require such as problem-solving, project planning, presentation and communication.

On this course, you will develop a broad understanding of current technology and practice in civil engineering and construction management, covering the relevant aspects of civil infrastructure, systems, design, analysis and construction management skills.

This course is designed to give you employability skills to secure a career in civil engineering and the built environment, and will prepare you to become a civil engineer with construction management skills. You will study in a stimulating environment with access to outstanding links with industry that will give you a competitive edge, enabling you to progress to a successful career.

You will also develop key transferable skills that modern employers require, such as problem-solving, project planning, presentation and communication. Our strong links with employers will enable you to apply your learning to problem-based scenarios, ensuring that your intellectual and practical competencies are fully developed.

Over the next 10 years, increasing investment is planned in the UK in major civil engineering infrastructure such as the Thames Tideway Tunnel, Nuclear Power Station Build Programme, and HS2. The BEng (Hons) Civil Engineering and Construction Management degree develops graduates who combine technical civil engineering skills with the practical people skills needed by managers in the construction industry.

Do you want to have a successful career in the computer games industry? Our TIGA-accredited Computer Games Technology course has been developed with input and feedback from leading professionals working in the sector as well as our own students.

While studying for your degree, you will use our state-of-the-art computer games technology lab, which is kitted out with high-performance PCs, Xbox consumer units, Nintendo Switch Development Kits, Rokoko Motion Capture suits and Sony PlayStation development kits, as well as a variety of industry-standard software. You will develop a range of technical and professional skills, including advanced coding practices, graphics programming, game engine development and artificial intelligence.

Our current collaborations with Microsoft, Sony and Unreal (Academic Partner) ensure you have access to the most up-to-date technologies available, and our close proximity to independent game studios provides the opportunity for you to meet and network with industry experts. You will not only learn about mainstream and traditional video game development, but also explore allied and emerging disciplines, such as serious and educational game development, augmented and virtual reality, and simulations.

You will also have the opportunity to participate in game development competitions, such as Global Game Jam and Microsoft's Imagine Cup, which will give you a great opportunity to broadcast your talent on an international stage.

Secure communication technologies form the bedrock of our modern, mobile society. Computer and network security is a growth area within the wider remit of cyber security. You will learn to build, secure and maintain data communication networks.

The course takes a practice-led approach, making use of equipment and tools found in the industry to give you the best preparation for a successful career. You will develop the practical skills sought by industry, backing this up with a thorough understanding of theory.

It delivers the latest in computing, network and security technologies, with the opportunity to gain additional accreditation from Cisco, EC-Council, Juniper and the Linux Professional Institute (additional examination costs may apply). We are also currently home to academies for Cisco Systems and the Microsoft Academy Centre.

You will learn the latest in computing, network and security technologies, in a well-rounded curriculum that includes computer network engineering, programming, server systems, security theory and practice. You'll also gain a detailed understanding of network engineering and network security, along with modules on ethical hacking (based upon EC-Council CEH Associate) and information security.

Full information:

Work with cutting-edge technologies and achieve the skills valued by today's employers. You will develop your competence in using tools and techniques to produce solutions for computer systems. You will also obtain a sound mathematical and scientific understanding, while appreciating the professional responsibilities and quality issues that are present within the industry.

On this course, you will study the fundamental concepts of computer science including computer programming, data structures and algorithms, information systems, computer networks and computer architecture.

You will then strengthen your knowledge by studying advanced subjects that focus on software engineering skills. You will also be introduced to topics such as operating systems, cyber security, discrete mathematics, and web application development.

The course is taught by experienced academics with extensive links to the IT industry, who will ensure you are receiving the most current and up-to-date information. You will have the chance to gain valuable work experience through a placement after your second year, further developing your skills and increasing your appeal to future employers. We also currently provide access to the Cisco Systems and Microsoft Academy Centre.

This course produces Computer Science graduates skilled in artificial intelligence, machine learning operations and data analytics to build intelligent software for the 21st Century. These graduates will close the skills gap in the British and global industry.

Skills development in Data and Artificial Intelligence tops the list of four 'grand challenges' facing British industry, highlighted in the UK Government's Industrial Strategy and inspired by a global demand for this expertise. BSc (Hons) Computer Science with Artificial Intelligence will produce graduates who specialise in the most modern methods of artificial intelligence including machine learning, deep learning, natural language processing, machine learning operations and data science.

You will also learn a wide range of tools for evaluating, storing, integrating and processing data, to deliver high-value software solutions to the challenges faced by the modern economy. While the majority of these specialist subjects will be taught in the final year, the earlier years of the course will also have some modules on AI and related topics.

After studying this course, you can apply for job titles including the terms computer science and artificial intelligence, and roles such as Computer Programmer, Artificial Intelligence Engineer, Software Developer, Data Scientist and Machine Learning Engineer.

This broad-based course combines research and theory with application and development, enabling you to put your learning into innovative practice. You will develop the computing and information technology skills you'll need to design, develop, operate and maintain computer systems.

You will also be encouraged to develop a strategic awareness of the wider context of globalisation and societal needs, and develop innovative systems which provide business value and sustainable solutions.

This final-year top-up course will build on your existing knowledge and develop your technical skills in areas such as information security and IT infrastructure. You will also develop an awareness of the wider context within which professionals operate, exploring topics such as green IT, consultancy and IT management.

Your final individual project will give you the opportunity to explore a specific area in greater depth and develop your project management skills. The course will prepare you for a wide range of careers, both technical and managerial, and will also provide the possibility of progressing to postgraduate study.

Our Computing and Information Technology course will help you develop the mindset to address global challenges, the kind that businesses and communities face on a day-to-day basis. You will learn how to maintain the digital infrastructure of businesses in innovative and effective ways.

You will use dedicated industry-standard facilities to research and work on enterprise software and virtual environments, to develop business solutions and real-time systems. You'll take a practical approach, backed up with a thorough understanding of theory, to provide you with the skills and knowledge employers look for. You will also have the opportunity to gain additional accreditation from Cisco and the Linux Professional Institute (reduced costs for our students apply).

We prepare you for the workplace. You will learn computing and information technology skills that are needed to design, develop, operate and maintain effective systems. Your knowledge will evolve on a daily basis, and we will ensure you are able to innovate in order to deliver business value and sustainable solutions.

You will also learn management-level skills such as project and change management, to maximise your career potential. We'll help to develop your personal skills so that you can work effectively as a team member and problem-solve at the highest level.

Discover how to develop human potential as you seek to transform the lives of people with neurological motor disorders. This is a unique course that provides the only opportunity in the UK to qualify as a professional conductor to work with children and/or adults with physical disabilities.

You will train and learn at the Conductive College. The College is based at NICE – Centre for Movement Disorders, a charity located in Moseley, Birmingham, which is an acknowledged world leader for Conductive Education.

The course is based on acquiring the skills for a vocational profession. Qualified Conductor Status (QCS) is a globally recognised professional qualification and enables graduates to be employed as a conductor. In addition to QCS, successful graduates will receive an Honours degree in Conductive Education.

You will undertake practical work in groups of children and/or adults alongside experienced conductors. On graduating, you will be able to make a difference to people's lives and will be able to work in centres and schools where conductive education is practised across the world.

Full information: www.bcu.ac.uk/conductive-ed

Content includes:

Year 1

- Observation for Directing Active Learning
- Developing Professional Skills through Active Learning
- Principles of Conductive Pedagogy
- Conductive Facilitation for Learning

Year 2

- Conductive Pedagogy: Analysis and Development of Learning
- The Impact of Motor Disorders on Learning in Childhood and Adulthood
- Learning Theories for Conduction
- Practice-based Learning: Analysing Effective Teaching and Learning Styles
- The Social Basis for Learning

Year 3

- Conductive Pedagogy: Evaluation and Application
- Education Research Project
- Application of Conductive Education
- Practice-based Learning: Evaluating Learning

» THE ONLY COURSE IN THE UK TO TRAIN PEOPLE TO WORK IN CONDUCTIVE EDUCATION.

Gain a comprehensive introduction to the construction industry and advanced entry to our associated degrees on successful completion of this course. The course provides you with the opportunity to be flexible with your studies and build fundamental knowledge to explore a range of construction roles.

The HNC is an ideal gateway for progression from tradesperson to site manager and beyond. On successful completion, you may be able to progress to the second year of one of our full-time degrees or the third year of our part-time degrees or apprenticeships.

If you're seeking a career in property, technology, building surveying, building control, quantity surveying and construction management, this course is for you. It is also applicable to anyone involved with the design, production or management of buildings.

You will benefit from state-of-the-art facilities and traditional resources, and become accustomed to industry technology. The skills you gain are very much in demand and graduates of the School have secured roles with major engineering and construction companies such as Laing O'Rourke, Mott MacDonald, Taylor Wimpey, Birmingham City Council and Birmingham Airport.

Our Construction Management degree offers a collaborative approach to the industry, preparing you to work within an integrated project team and with industrial partners, as well as developing skills required by the Chartered Institute of Building and the Royal Institution of Chartered Surveyors. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

This course has social innovation embedded in its core. You will learn about the immediate and long-lasting effect which construction activities have on the environment, and discover sustainable and environmentally sound construction methods and innovative management practices.

Our strong links with employers such as Willmott Dixon allow you to learn in a practical context through work placement opportunities. You will also gain experience working on live projects for clients.

Study with us to gain a broad range of knowledge of the legal, technical, managerial, economic, social and environmental aspects of construction projects, becoming a confident professional who can manage both commercial and civil engineering projects.

Develop a range of career-specific skills within costume design and practise in a city culturally rich with dance, theatre and the creative arts. You will gain experience in custom pattern cutting, design and illustration, bespoke fitting and costume construction techniques, developing you into an active and engaged contributor to costume. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

Students have previously collaborated on live projects with Birmingham Royal Ballet, DanceXchange and Birmingham Repertory Theatre. Our staff have worked as costume practitioners within national and international companies, including the Royal Shakespeare Company and the Stephen Joseph Theatre with Alan Ayckbourn.

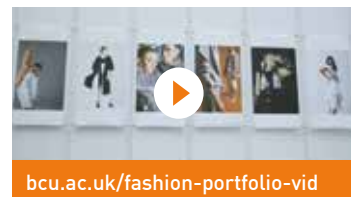

While studying with us, you will gain access to an archive of historical dress, bequeathed by the Arts and Crafts artist Kate Elizabeth Bunce, and the BCU Art and Design Archive.

There is an optional placement year between Years 2 and 3. You will be supported through the application process for the placement with CV workshops, portfolio building and careers tutorials, and the assessed outcomes of your experience will be submitted on return to the University.

Full information: www.bcu.ac.uk/costume-design

BA (Hons) Costume Design and Practice, BA (Hons) Fashion Design and BA (Hons) Garment Technology have a shared first year of study.

FY This course can also be accessed via a foundation year. Please see page 220.

The BA (Hons) Creative Advertising course is designed to prepare students for the exciting, fast-paced world of global advertising communications. Students will learn how to progress their ideas into viable concepts that can be applied to creative campaigns.

The course allows you to develop industry-relevant specialist practice that is dynamic, engaging, multi-disciplinary, collaborative and cross-cultural in its references, contexts and theories. It focuses on generating engaging and innovative communications. It also explores the relationship between conceptual thinking, ideation, copywriting, art direction, research and craft with the aim of helping students to develop an understanding of the integrated nature of effective creative advertising.

We encourage innovative thinking through idea generation, experimentation, collaboration, team working and problem-solving. Students have opportunities to work with a range of media, from digital and print to outdoor, ambient and motion-based advertising. Working on live briefs for international clients will help to equip students with the practical skills and insight needed to meet real-world challenges.

Primarily we aim to offer all our students a rigorous and challenging course which explores the contemporary map of advertising culture. The course is competitive and creative, and it favours innovative, persuasive, informed communicators.

Make sense of the world of criminal justice with our Criminology degree and get the big picture perspective on crime, punishment and victimisation. This course aims to develop knowledge and understanding of the core schools of criminological thought, their historical and political foundations and practical application.

Our curriculum offers you a variety of subjects, through which you will be able to develop your interests before focusing on specialised fields within criminology that appeal to you as a student.

The course's real-world applications are supported by its close links with local and national criminal justice agencies, including police forces, charities, pressure groups, criminal justice agencies, criminal rehabilitation, probation services and prisons.

You will be taught by expert staff in the fields of criminology, policing, and security, and you will also enjoy regular guest lectures from highly influential voices in the discipline.

Full information: www.bcu.ac.uk/criminology

This course can also be accessed via a foundation year. Please see page 220.

Content includes:

Year 1

- Key Debates in Criminological Theory
- Crime and the Media
- Crime, Punishment and Society
- The Criminal Justice System

Year 2

- Understanding Crime and Criminal Behaviour
- Experiencing Harm
- Prisons and Punishment
- Research Proposal

Year 3

- Human Rights: Theory and Practice
- Rehabilitation and Desistance
- The Extended Project

Foundation year content includes:

Sociology: The Foundations; Criminology: The Foundations; Skills for Social Scientists; Sociology and Criminology in Practice; Criminality, Crime Control and Society; Independent Research Project.

www.bcu.ac.uk/ss-facilities

» YOU HAVE THE OPPORTUNITY TO EMBARK ON A YEAR-LONG PROFESSIONAL PLACEMENT AS PART OF A FULL-TIME DEGREE COURSE.

"All of the Criminology team are actively engaged and at the forefront of their field, so they are extremely knowledgeable and able to provide helpful support."

SARAH NORMAN

AVAILABLE SPECIALIST ROUTES:

Criminology and Security Studies | BA (Hons) ML94

Our BA (Hons) Criminology and Security Studies course covers a range of topics, from war and conflict to counter-terrorism.

Make sense of global trends by getting the big picture perspective on political and historical issues which are leading to continued conflict and instability in the world today, focusing on subjects like surveillance, terrorism, and cybercrime.

Full information: www.bcu.ac.uk/criminology-sec

Criminology, Policing and Investigation | BA (Hons) ML9K

Make sense of contemporary issues in policing by getting the big picture perspective on crime, victimisation, and various responses to crime and deviance. Our course covers a range of topics, from the ethics of investigation to crime scene management, as well as practical criminal justice interviewing techniques.

The course's professional relevance is supported by its close links with local and national criminal justice agencies, such as West Midlands Police Force.

Full information: www.bcu.ac.uk/criminology-policing

These specialist routes can also be accessed via a foundation year. Please see page 220.

As we generate data at an ever-increasing pace, the security of this data has become paramount. In the 21st Century, data has become a necessary commodity, which has value in isolation and more so when viewed as a larger data set for trends and habits. Data is key to business functioning, and protection of this data is key to the ongoing success of the digital economy.

You will become equipped with technical knowledge, intellectual know-how, management capabilities and practical skills that will enable you to succeed in meeting the cyber security challenges facing modern organisations.

As the systems that both generate and consume data grow in capability and complexity, and as the Internet of Things continues to expand exponentially, the need to protect the data created, stored and transited across public and private networks intensifies. The need to protect this data increases with each advance in technology, as does the requirement to have suitably qualified cyber security practitioners.

This course is supported by a vibrant research environment within the Centre for Cyber Security at BCU and by traditionally strong industrial links which currently include Cisco, Oracle, IBM, Microsoft and BT.

Full information: www.bcu.ac.uk/cyber

BSc (Hons) Cyber Security can also be accessed via a foundation year. Please see page 220.

Content includes:

Year 1 (common first year with other computing courses)

2 years (Diploma)

UCAS CODE

N/A - apply direct

ENTRY REQUIREMENTS

CERTIFICATE APPLICANTS

- GCSE at Grade 4 or above in English Language (or equivalent)

PLUS ONE of the following:

- QCF or OCN Level 3 Specialist deafblind assessor course
- Level 3 NVQ or Diploma or equivalent (full award)
- A Levels (DD/48 UCAS tariff points) or a BTEC ordinary National Diploma
- Any undergraduate or postgraduate qualification.

OR

Applicants with relevant work experience may be admitted through the formal recognition of prior certificated learning (RPCL) or prior experiential learning (RPEL).

DIPLOMA APPLICANTS

For the Diploma in Professional Studies, it is also a requirement to have passed the Certificate in Professional Studies (Deafblind Studies).

This course is based on the belief that all people living with deafblindness have a right to be supported by professionals who have the requisite knowledge and skills to provide a high-quality service. The course aims to meet the requirements relating to the care and support of deafblind people under the Care Act 2014 (England) and the Social Services and Well-Being (Wales) Act 2014.

This course has been designed and developed by some of the most experienced practitioners and academics in the field of deafblindness, and is enhanced by the inclusion of teaching materials created by those with lived experience of deafblindness.

The course will cultivate your knowledge and skills to develop, challenge and question contemporary practice in the context of supporting deafblind children and adults.

You will develop knowledge of both congenital and acquired deafblindness as well as the definitions of the condition, its causes and the impact of the impairment, paying particular attention to the substantial diversity of the deafblind population. The course also covers relevant law and public policy, as it applies to deafblind people, their rights and their needs.

Full information: www.bcu.ac.uk/deafblind-studies

Content includes:

Certificate

- Understanding Communication, Movement and Mobility
- Law, Public Policy and Deafblindness
- Understanding Deafblindness / Dual Sensory Loss

Diploma

- Understanding and Assessing Deafblindness / Dual Sensory Loss
- Understanding and Assessing Communication, Movement and Mobility
- Deafblindness: Independent Study

Housing is a basic human right, but mass-produced housing doesn't always meet today's needs. Our homes should be smart, well designed and affordable; they should create a sense of community, respond to the urgent demands of the climate and biodiversity crisis and support changing family structures.

We need new and disruptive design thinking to revolutionise how we live. BA (Hons) Design for Future Living gives you the opportunity to lead the way in designing how and where we live.

Developed in collaboration with TV architect George Clarke's Ministry of Building, Innovation and Education (MOBIE), the course places you at the forefront of the next generation of designers tackling the design and delivery of new homes.

BA (Hons) Design for Future Living gives you the opportunity to lead the way in designing how and where we live. Through innovative ideas, new design methods, advanced technologies and entrepreneurial skills, you will critique, challenge and disrupt traditional thinking around the idea of 'home' to develop radical and sustainable alternatives.

Full information: www.bcu.ac.uk/design-future-living

This course can also be accessed via a foundation year. Please see page 220.

Have you ever wondered who designed and created your favourite stage performance, music festival, experimental film or exhibition experience? Are you looking for a course that can prepare you for a career in this expansive and growing industry? If so, this could be the course for you.

You will develop a clear understanding of the scope and breadth of contemporary design for performance, engaging with a variety of individual and collaborative opportunities. You will work with traditional and experimental formats from stage design to live arts, and site-specific festivals to themed environments.

Using hands-on making, technical skills, 2D and 3D design, craft techniques and digital platforms, you will be able to determine your own career path. You will benefit from the collaboration of ideas within a multidisciplinary school, in a course that reflects the dynamic crossover common to creative arts in the 21st Century. Imagination, experimentation and risk taking are fundamental to our students as the challenges and opportunities are so varied on this course.

Learning is demonstrated through an accumulation of individual, collaborative, realised, speculative and live projects along with a suite of high-profile industry opportunities. In previous years, these have included Live Nation, Merlin Entertainments, Casson Mann and Boomtown.

- Interview and evidence of a portfolio containing examples of work and your rationale for opting for this course.

For full entry requirements and fees: bcu.ac.uk/courses

Design managers are effective communicators, with strong collaborative, leadership and interpersonal skills. This role demonstrates the responsibility for the creation and management of design projects, teams, contracts and the operational practice of design. These qualities are recognised within design and non-design organisations throughout the world.

We welcome applicants from an international and multidisciplinary audience, to explore global/local, social and cultural design problems we face now and in the future. You will research the role of design and use design thinking to identify creative strategies and develop innovation. The course investigates themes of design sustainability, digital technology and human-centred design for clients, users and consumers.

The one-year BA (Hons) Design Management course is designed to develop your professional, creative, communication, research, problem-solving, critical thinking and analytical skills, while developing your confidence for progression into employment or postgraduate study, which is particularly encouraged through the MA Design Management pathway.

You will step into a challenging environment that reflects as closely as possible the behaviours of the design profession, and will develop and retain links with design practice through specialist guest lectures, project briefings and group critiques supported by industry partners.

Full information: www.bcu.ac.uk/design-management-topup

This course will develop your knowledge and technical skills to be able to use X-rays or magnetic fields to help diagnose a range of injuries and diseases. The course combines equal elements of theory with clinical practice focused on developing your knowledge and understanding of biological and radiation sciences, technology and the psychosocial issues of healthcare. This course is in the process of being revalidated by the Health and Care Professions Council for 2023 so content is likely to change. Check bcu.ac.uk/courses for the latest information.

A purpose-built and fully equipped radiography skills suite – including an X-ray room, PACS viewing rooms and 3D virtual reality room – allow you to improve your skills through simulation in a safe and protected environment.

You will spend approximately half the course undertaking clinical placement, which is structured to allow you to fully experience the realities of the profession. We support you in securing a placement at several clinical sites across the Midlands, with your assigned personal tutor visiting you regularly.

On successful completion, you will graduate with a BSc (Hons) degree and be eligible to apply for Registration with the Health and Care Professions Council.

UCAS POINTS:

112

On the BA (Hons) Digital Animation course, you will learn how core art fundamentals, the 12 principles of animation and principles of acting underpin the creation of engaging, story-led character animation, whether you choose a Film/Television or Games/Interactive pathway. The course also establishes industry-standard tool sets, project management and pipeline methodologies that mirror industry production procedures.

Depending on the route you choose you will produce a range of assessed materials including but not exclusive to storyboards, story-reels (performance animatics), animation foundation exercises (required to demonstrate principles within showreels), specialist portfolios (featuring short films made collaboratively) or game animation sets, demonstrated within collaborative game production within the game engines Unity and Unreal.

A key focus of this course is developing performance within character animation. You will develop acting techniques that will promote the development of your inner actor to project performance through your characters. You will also develop an understanding and demonstrate visual storytelling, with ‘show don’t tell’ philosophies.

Everyone who experiences this course will have the opportunity to work within a multidisciplinary team to create the highest quality work and portfolios that are required to enter specialist positions within animation industry pipelines.

Full information: www.bcu.ac.uk/digital-animation

Our Digital Film Production degree will equip you with a range of academic and technical skills relevant to technology in film. You will explore filmmaking fundamentals from narrative, composition and film theory to camera testing, designing digital production workflows and post-production.

Taught by an experienced team, you will explore the processes, practices and technologies of digital film production, enhancing your employability in the process. You will demonstrate your technical skills by planning, shooting and post-producing a range of digital films, using industry-standard practices.

You will exercise a broad range of technical and creative skills with the support of the University's cutting-edge facilities, which includes our 1,200 sq m Parkside Media Centre. There is also a focus on fundamental technical concepts, including the physics of sound and light being captured during production, as well as the tools and approaches used to do this. You will explore the techniques used to digitally store and manipulate both video and audio in post-production.

We provide access to three film and TV studios including a full-height permanent green screen studio, Da Vinci Resolve colour grading suite, high-spec DIT cart for on-set colour management, a full range of production sound mixing equipment, and two Arri Alexa Mini camera kits with Xeen lenses and wireless follow focus units.

With digital forensics playing a critical role in the world of modern criminal investigations, this course will help you develop the practical and professional skills needed by employers in the digital forensics, cyber security and law enforcement sectors. In addition, all major industries have a requirement for digital forensics, including, but not limited to, banking, social media and e-commerce.

Delve into the acquisition, analysis and interpretation of data recovered from computers and digital devices to establish factual evidence, with access to a dedicated specialist digital forensics laboratory, hosting industry-standard digital forensics software and tools.

The multidisciplinary nature of our course will foster the essential skills you require in data investigation, incident response, mobile device forensics, computer networking, ethical hacking, computer programming, and legal and expert witness roles complementary to digital forensic investigations.

Digital Forensics combines a highly rigorous academic qualification with real-life practical work experience, which will enable you to put your knowledge into practice as a computer forensics expert or forensics investigator.

This industry-focused Digital Marketing degree is a two-year fast-track course that immerses you in real-world, professional advertising and marketing communications. It's a powerful mix where you'll be working with professionals to learn key skills in the fast-paced digital communications industry.

You could find yourself making simulated advertising campaigns with agencies like Mediacom, or delivering marketing solutions to content brands which have previously included the BBC, or using the latest technologies to produce exciting events, interactive experiences and prototypes to showcase in your portfolio.

You will become part of an employment-led course that teaches a practice-based, knowledge-applied approach, where tutors and industry professionals work with you in classes and assignments to help you develop and grow your personal and professional development.

It's all part of a bigger picture that answers the creative industry's calls for savvy digital talent to exploit new opportunities and trends in emerging markets and technologies. This means you'll be looking for ways to reimagine trends, build brands, find fame, add value, optimise content, disrupt behaviours and monetise ideas across a range of media, platforms and channels.

Today's world revolves around the use of digital media technologies. Develop a highly sought-after mix of technical ability and content creation skills so that you have the edge in our digital age. This course will enable you to produce the next generation of digital media products.

Digital Media Computing is an intellectually challenging and highly rewarding degree that will prepare you to meet the professional and technical demands of industry. Delve into web technology, programming, animation, 3D modelling, video production, human-computer interaction and interface design to develop web and interactive digital media applications.

Roles in digital media involve bringing together a variety of skills, incorporating media such as still and moving images, 3D content, web coding, content creation, sound and text. You will have the opportunity to learn about equipment, workflows, processes and practices in various disciplines, and learn how to bring these together into media-rich, interactive content.

You will also develop key transferable skills that will help you in the workplace, such as teamwork, reflection and self-awareness, as well as learning how to code interactive media products. There is a fantastic opportunity to undertake an industrial placement after your second year, gaining valuable work experience and preparing you for employment after you graduate.

With a focus on understanding children and childhood, this course has a strong emphasis on research and employability. You will explore early childhood in a variety of contexts and prepare for a range of careers working with children from birth to five years old.

You will experience the value of a work placement in helping you to practically apply what you learn to the development, learning and wellbeing of babies and young children. Successful completion of placement will also enable you to meet the criteria for Early Years Educator, the professional qualification that means you can work with babies and young children as a qualified member of staff.

You will acquire a working knowledge of key documents, policies and procedures relevant to a broad range of professional settings working with babies and young children in Early Years. Study topics include children and childhood, child development, exploration and play, and working with families. This course considers inclusive practice, developing communication skills, and children and family social policy.

If you have already completed FdA Early Childhood or Early Years, or equivalent, and want to top up to a full Honours degree, you could be offered entry to the course in Year 2 or Year 3 (for entry at Year 3, a 60% grade average is required at Level 5), depending on the previous course studied and individual mark profile.

If you are already working in a childcare setting and looking to develop your skills and career, this course is the ideal place to start your studies. Studying in small, intimate groups, trainee Early Years practitioners get the chance to enhance skills and professional standing, while enjoying a practical, hands-on introduction to key issues.

This course supports the Early Years Foundation Stage (EYFS), ensuring you can deliver provision that complies with EYFS learning and development requirements. The course is carefully designed to offer appropriate skills and knowledge relating to professional practice and the application of work-based experience. It also focuses on your self-development and independent learning, as well as teamwork and your ability to manage others.

Applying your knowledge in real Early Years settings is a vital part of your learning, and you will need to undertake a work placement during the course. As a working, part-time student, you will normally achieve this through your professional commitments; if you study full-time, you get all the support you need to find a suitable work placement.

Although based at the respected South and City College Birmingham (Digbeth Campus), you have full use of University facilities and will feel part of our supportive student community. Equivalent to two years of degree-level study, this course offers entry to the BA (Hons) Early Childhood Studies course at Level 5 (Year 2) or 6 (Year 3), depending on your mark profile on completion of the foundation degree.

Full information: www.bcu.ac.uk/early-years

The applied nature of our BSc (Hons) Economics degree prepares you to work as an economist, or in a related role which is concerned with the study of the economy and its impact on society and the natural environment. Economics is a social science which informs major challenges faced by our societies today, including inequality, environmental sustainability and economic policy.

The course will provide you with a firm foundation of economics to interpret, analyse and question diverse economic theories and policies in a real-life context.

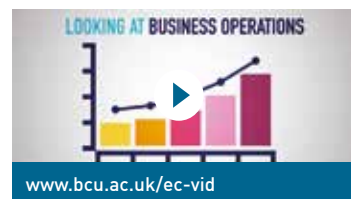

The course equips you with a vast analytical toolkit, which includes mathematical and statistical analysis, critical thinking, qualitative techniques, and proficiency in a range of industry-specific software packages that are relevant to the economics profession. You will also learn how to communicate results and ideas concisely to a variety of specialist and non-specialist audiences.

Economics is a global subject. You will be encouraged to look at situations from an international perspective. You will apply the knowledge learned in the course to examine global events and look at how different economic ideas help us understand and address global challenges such as poverty, inequality, climate change and the impact of new technologies on the economy and society.

Education is at the heart of the development of our society. To study education is to study the way society develops. Our BA (Hons) Education Studies course considers the concept of education from a variety of perspectives. You will engage in critical reflection on the aims, values, principles and policies of the UK education system as well as education systems around the world.

There is an emphasis on issues of equality and diversity, and their particular relevance to educational experiences and achievement. The central philosophy underpinning the course is a commitment to create a supportive and challenging learning environment in which you can thrive and develop.

You will be provided with opportunities to explore and debate ideas, encouraged and led by a diverse group of experienced tutors who have worked across a variety of educational backgrounds and disciplines. Tutors will engage you and your fellow students in a reflective and critical evaluation of educational practices, theories and research.

We also offer a valuable opportunity to embark on a variety of work-based placements in education. We are one of the foremost universities in the West Midlands for education courses (Guardian League Table 2022) with established connections across schools, colleges and training institutions.

Our Electronic Engineering degree will give you the practical and theoretical engineering skills that modern employers want. We will help you to understand the social, commercial, legal, ethical, economic and environmental factors associated with engineering so that you think like an engineer.

You will gain practical experience by working on project-based activities from design to implementation. You will also apply engineering science to real-world problems and develop your interpersonal skills in multidisciplinary teams, to help prepare you for modern engineering.

The course has been designed to develop key transferable skills like problem-solving, project planning, presentation and communication. There are also opportunities to help at the acclaimed annual Global Game Jam, where you can build and design your own creations.

All students have the opportunity to undertake a placement year to acquire real-life skills and experience. These opportunities have helped our graduates to progress into roles with companies such as Rolls-Royce, Jaguar Land Rover and Willmott Dixon.

The School of English is home to endless possibilities. Ours is a community where each individual is empowered to shape their learning, research and practice in creative, innovative and thought-provoking ways. We are ambitious in our creative and critical practice, in challenging convention and in developing an inclusive curriculum that reflects the distinctiveness of every student.

If you enjoy all aspects of English study and want maximum flexibility to shape your degree and develop your own areas of interest and expertise, this course is ideal for you. In your first year you'll gain a strong grounding in all areas of English study and then start to use this knowledge to build a degree which most suits your emerging talents.

Along the way you'll benefit from being a part of a vibrant community of staff and students who understand the impact that English has made and continues to have on regional, national and global cultures. Our teaching is student-focused and research-led, and learning takes place in a friendly and supportive environment.

You will be taught by expert researchers and practitioners who foster a community of experimentation, innovation and inclusion which will allow you to flourish and grow. Not only will this degree equip you with a strong subject knowledge, but it will also allow you to develop key transferable skills which are highly prized by a range of employers.

JO SHEMMANS

AVAILABLE SPECIALIST ROUTES:

English and Creative Writing | BA (Hons) QW38 (1210 prof. placement)

To be an effective writer you need to be an effective reader. This course combines the study of literature, enabling you to think critically about the work of published authors, poets and playwrights, with the development of your own writing craft.

In the early stages of your course you will have the opportunity to work creatively across a range of genres including poetry, prose fiction and drama. You will gain a thorough grounding in the craft of writing, focusing on elements such as setting, structure, dialogue, character formation and poetic form and technique.

Alongside the development of your creative writing practice you will study modules in English, gaining vital skills in research, critical analysis and argument.

Full information: www.bcu.ac.uk/english-cw

English and Drama | BA (Hons) QW34 (1209 prof. placement)

How does the staging of a play affect its meaning? How do plays interact with the world around them? What are the consequences of the choices directors make when staging a play? BA (Hons) English and Drama asks you to study not just the play on the page but also on the stage.

You will study plays from a range of historical periods and consider developments in performance and practice. You can attend a number of theatre performances, from those hosted by the Royal Birmingham Conservatoire to trips to theatres such as the Royal Shakespeare Company or the Birmingham Repertory Theatre.

Our graduates are able to adapt to a wide range of career paths and employment opportunities which reflect the skills and abilities they have acquired.

Full information: www.bcu.ac.uk/english-drama

English and Journalism | BA (Hons) Q30J (1211 prof. placement)

This course is ideal if you wish to follow a career in the dynamic and competitive world of journalism. You will focus on the development of your core knowledge and skills for English as well as gaining valuable experience working on live stories in media environments, which will teach you how to craft a story in a way that engages the audience.

It combines the study of literature, language, drama and creative writing from the School of English with skills essential to an

intelligent media professional from the School of Media. You will have access to our industry-standard media facilities throughout your studies, alongside guest lectures from industry professionals.

By the time you graduate, you will be a thinking journalist with a specialism in news, broadcasting, features or design.

Full information: www.bcu.ac.uk/english-journ

English Language and Literature | BA (Hons) Q300 (1207 prof. placement)

If you are fascinated by the way language works and is used in the world around us and if you love reading literature from different historical periods, cultures and genres, then this is the course for you.

You will combine core knowledge in English language and literature with the opportunity to develop your own areas of interest in language, literature, drama or creative writing.

English Language and Literature degrees are highly sought after by employers, due to the vast range of skills that they instil within graduates.

Full information: www.bcu.ac.uk/english-lang-lit

English Literature | BA (Hons) Q320 (1208 prof. placement)

Our literature degree takes you from the origins of traditional literary forms and ideas to the most contemporary issues facing societies and cultures today.

You have the flexibility to pursue your own personal interests, from Shakespeare's plays, Gothic stories, and the contemporary novel, to creative writing for the screen and teaching English as a foreign language.

We embrace the full breadth of English studies to cover aspects of history, politics, philosophy, psychology and sociology, to truly enrich our students' perspectives. You will gain valuable work experience and develop sought-after transferable skills as a problem-solver, critical thinker, adept communicator, and versatile writer – and you will learn how the power of storytelling and the impact of language profoundly affect people and the world around us.

Full information: www.bcu.ac.uk/english-lit

Start building towards a career in event management with our Event, Venue and Experience Management course. This innovative and on-trend programme, taught in the heart of the UK’s second city, will give you the skills, experience and insights to develop a career in this growing area.

Combining theory and practical application the course will draw heavily from practising event, venue and experience leaders to cover multiple aspects such as marketing, project management, design, operations, analytics, digitisation, and experiential and client management.

Building upon the insights and close business connections that Birmingham City Business School has made through its Academy of Multi-Unit Leadership (with over 600 graduate managers from industry-leading event and leisure organisations), this undergraduate course will provide the academic expertise and contacts to help you develop an exciting professional future.

Over the past decade there has been a surge of careers in the global leisure sector that require best-in-class event, venue and guest experience managers. The President of Genting UK, Paul Willcock, describes the course as “an exciting and innovative degree that provides exceptionally strong pathways into our industry”.

This vibrant mix of fashion communication and brand management includes creative direction and styling, fashion journalism, trend prediction and consumer behaviour. This will give you the skills you need to be a creative, confident, well-informed fashion communicator, ready for the industry. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

You will be taught by an industry-experienced academic team and by visiting professionals. There is also the opportunity to participate in live brand-based projects and competitions, including working with leading trend forecasters, magazines, and a range of high street retail names.

You will develop visual and written communication skills across a broad range of creative media (creative direction and styling, art direction and graphics, print and digital design, branding strategy and journalistic writing) associated with the fashion industry. There will also be the chance to showcase your final-year work to industry leaders, at events such as Graduate Fashion Week in London.

Based at our City Centre Campus, you will have access to photography studios and equipment, relevant software and computer equipment, as well as a Faculty of creative students to collaborate with. You can also choose our four-year professional placement option, which features a one-year industry internship.

Do you want a career in the business of fashion?

Then, this is the course for you. Our well-rounded modules enable you to graduate from this course with an in-depth and diverse understanding of the fashion industry, ready to secure your dream job. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

By the end of the second year you will have a clear view of the fashion industry from buying and merchandising a range, in store experience planning, to implementing a marketing and PR campaign, ready to focus your strengths and career aspirations in your final year.

You will develop an understanding of the world of circular economy and sustainability. In Year 2, you will have the opportunity to undertake a work placement or a collaborative project with other students from the School of Fashion and Textiles. Throughout your time with us you will explore new creative skills in packages such as Adobe Creative Cloud and develop business and research skills, applying theories and techniques to your projects as well as enhancing your presentation skills.

You will work on industry-led briefs which have been supported in recent years by Gymshark, Selfridges, Superdry and Next. You will be inspired by our recent alumni guests and supported by our dedicated academic team that have an extensive range of industry experience as buyers, designers, artists and marketeers.

This course will enable you to become a creative and innovative fashion imagemaker. By effectively embracing new and traditional technologies, with an open and experimental approach, you will learn how to create exciting and challenging fashion imagery.

You will be encouraged to experiment in technologies including photography, virtual and augmented reality, 2D and 3D drawing, moving image, animation and 360° video. In so doing, you will develop radical, sophisticated imagery within the fashion genre, an area that thrives on this approach.

You will also benefit from the University's state-of-the-art facilities, acclimatising you to industry practice. Collaborative opportunities with fashion students are plentiful and an important component of the course. As you progress, guided by staff with industry expertise across a range of disciplines, you will refine and focus your practice, supported by modules that have been designed to be tailored to your interests and specialisms.

Employability is embedded throughout the course. You will learn critical skills through working on live briefs and modules focused on developing your employability. Combined with your creative expertise, these will launch you into your future career.

Our BA (Hons) Film and Screenwriting degree will develop your skills across key film studies and screenwriting debates and conventions. You will be taught by noted film scholars and established practitioners, who will provide their knowledge of international film and screenwriting perspectives.

This course will teach you to consider a wide range of 'script to screen' traditions from theory, practice and industry perspectives.

You will gain an understanding of Hollywood cinema conventions and screenwriting genres (such as rom-com, thriller, science fiction and horror case studies). You will also be introduced to other international traditions that range from European cinema, documentary to smartphone filmmaking and beyond. Focusing on the aesthetic and creative aspects of film and screenwriting, you'll consider storytelling techniques, narratology and screen adaptation.

Modules on film festival programming and entrepreneurship provide core skills relevant to the film industry. You will have opportunities to work on established film festivals that are associated with the course and have access to film collections that will enrich your course of studies.

Full information:

Our cutting-edge BA (Hons) Filmmaking course will develop your skills across key filmmaking debates and practice conventions. You will be taught by industry-established practitioners and noted film scholars, who will provide their knowledge of international film criticism and filmmaking perspectives. This course will introduce you to the principles of filmmaking, alongside training in film industry perspectives and practice.

You will learn to become a visual storyteller, within drama or documentary, and will work collaboratively, within multidisciplinary teams to craft engaging narrative-focused films. You will also learn key skills and acquire practice-based knowledge within the filmmaking production processes, such as cinematography and post-production techniques.

You can also opt into a range of options allowing you to consider the skills of film entrepreneurship, the popularity of cult cinema traditions, and the appeal of Bollywood filmmaking.

You will be taught at the City Centre Campus, home to an impressive range of media resources, studios and edit suites, and your formal studies will be enriched by the possibility to work on a range of external events, such as the Cine-Excess International Film Festival.

Our BSc (Hons) Financial Economics degree prepares you for a career in the financial sector as a financial economist, analyst, planner, investment analyst, or similar role. Our degree provides both sound theoretical knowledge and technical skills which are highly sought after by employers. This degree is built on core principles of economics, which are then applied to financial markets and institutions.

The course will empower you to understand competing economic ideas, think critically, and apply your knowledge in your daily life and in your future workplace. Our degree is highly flexible, and apart from studying core economics subjects, you will be able to select optional modules which are most suitable for your own learning needs and career goals.

You will be taught by industry-experienced academics who bring real-world practical knowledge to the classroom. You will be able to work on live client projects with our Business Advice Centre that will give you exposure to challenges and issues faced by businesses, and a chance to develop successful solutions.

You will be right in the hub of a vibrant city and be surrounded by other likeminded students on a variety of economics, business, finance and accounting degrees.

Through the skilful manipulation of materials, processes and ideas, artists are able to offer creative insights which shape who we are and how we exist in the world around us. On BA (Hons) Fine Art, you will work with professional artists to develop your own ideas and creative journey, gaining valuable skills that will allow you to flourish in a range of careers across the industries, for example as an artist, curator, teacher or arts coordinator.

The ethos and values of BA (Hons) Fine Art are based on a four-pillar structure to emphasise its distinctive features and focuses. **Making Skills** is a central tenet of the course, facilitating the acquisition of skills through our workshops, studios and by working with fabricators from the industrial city of Birmingham.

Making Public will see you explore external-facing engagement opportunities in disseminating outcomes and generating participation with audiences. **Making with Communities** supports you in considering ways of sustaining meaningful relationships between your art practice and society while growing networks and links with others.

Making a Living focuses on creative career routes as you establish a professional context for your work through an understanding of the public and private art sectors in order to position yourself within the creative industries.

Full information: www.bcu.ac.uk/fine-art

This course can also be accessed via a foundation year. Please see page 220.

Learn to save lives and improve building safety as one of the next generation of fire engineers. Our academic team brings together expertise in teaching, learning and research, for one of the first courses of its kind.

Our Fire Engineering course will give you the skills needed to become a future Fire Engineer, as well as an understanding of the social, commercial, legal, ethical, economic and environmental factors associated with engineering.

The course will cover a wide range of subjects, including fire dynamics, the fire safety of different types of buildings, human behaviour, evacuation modelling and fire law. You will learn a wide range of transferable skills that are key to fire engineering, such as management, teamworking, leadership, and resolving engineering design projects and problems.

Our engineering courses focus on project-based activities, giving you lots of opportunity to work in teams on projects from design to implementation. This will give you practical experience of applying engineering science to real-world problems, working in multidisciplinary teams to develop your interpersonal skills, and prepare you for a key aspect of modern engineering practice.

Full information: www.bcu.ac.uk/fire-engineering

Content includes:

Year 1

- Engineering Principles
- Mathematical Modelling
- Introduction to Fire Safety and Accidents
- Fire Science and Risk Management

Year 2

- Fire Dynamics
- Fire and the Built Environment
- Project Management

Year 3

- Fire Safety Management
- Fire Design Project
- Thermodynamics

ENTRY REQUIREMENTS

- No specific entry requirements for the Foundation Certificate.
- You must have passed the Foundation Certificate before you are able to progress to the Gemmology Diploma.
- There are no specific entry requirements for the Diamond Diploma course but completion of the Foundation Certificate is advised.

For full entry requirements and fees: bcu.ac.uk/courses

Leading to a globally respected award, you can register to study for Fellowship of Gem-A on successful completion. You can take the Foundation Certificate before progressing to the more scientific study of the Gemmology Diploma, and then the prestigious Diamond Diploma.

Gem-A's Gemmology Diploma is the most prestigious gemmological qualification in the gem and jewellery trade, while the Diamond Diploma is the ultimate education in diamonds.

Content includes:

Foundation Certificate

- Careful handling of commercially important gems, such as diamonds, sapphires, rubies and emeralds
- Investigate imitation and synthetic gem materials
- Use basic gemmological tools
- Examine how gems are used in jewellery
- Learn about the value and durability of gems
- Identify features of commercially important gems
- Gain Cert GA status with the Gemmological Association.

Gemmology Diploma

- Gain an in-depth understanding of gemmology
- Develop competence in handling, testing and identification
- Interact with the jewellery trade
- On graduation, you are eligible for election to FGA Membership status of the Gemmological Association.

Diamond Diploma

- One of the world's most respected diamond awards
- Investigate diamond grading
- The 4Cs (carat weight, colour, clarity and cut)
- Learn how to identify imitations and treatments
- Successful completion allows you to apply for election to Diamond Membership of the Gemmological Association, and to use the letters DGA after your name.

Full information: www.bcu.ac.uk/gem-a

Study on our Gemmology and Jewellery Studies degree and gain the highest level of professionally recognised gemmological skills. Based in the heart of Birmingham’s thriving Jewellery Quarter, you will explore precious gems and all relevant aspects of the jewellery trade. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

This course offers a comprehensive education in all areas of gemmological theory and testing, diamond grading and jewellery valuation. With our fully equipped gem labs at your disposal, you will have the chance to test a wide range of gem materials with both standard and advanced equipment. There will also be a chance to learn complementary skills such as photography.

You will study at our world-class purpose-built facilities at the Assay Office, just a few minutes’ walk from Vittoria Street.

Our staff team are all experts in their field and have extensive industry experience. Our graduates have gone on to work in a wide variety of roles in the jewellery industry throughout the world.

The global sports market is estimated to be worth between £400 and £500 billion, and is growing at a significant rate year on year. Over the past decade, there has been a huge increase in career opportunities in the global sport sector that require graduates with the skills, attributes and experience to thrive in such a dynamic industry.

This undergraduate course will provide the academic expertise needed to help students develop an exciting professional future.

Combining theory and practical application, this course will draw heavily from practising sports leaders to cover multiple aspects such as technology and digital innovation, marketing, events, operations and analytics. Internships, placements, project fieldwork and workshops will enable students to start working towards their chosen career.

All modules balance a range of relevant theory and concepts with practical application, and throughout the course students reflect on and apply this content into real-life scenarios – enabling them to enhance and critique their learning. In short, this is a course designed to be the catalyst for students to forge a successful career in the global sports industry.

This exciting course is a must for creative mavericks and anyone passionate about graphic design looking to pursue a career in the industry. The course has been structured to provide you with industry-standard skills in the fields of communication, branding, strategy and design, in still and moving images, both in print and online.

You will benefit from our great links to major advertising agencies, publishing houses and interactive design studios, and receive commercially relevant guidance based on contemporary approaches and historical contexts from your enthusiastic and knowledgeable tutors. Graduates have gone on to become leaders in their fields and specialisms and often return to the University to share their knowledge.

This course will enhance your design skills and challenge your creative thinking, helping you identify the latest directions in design communication.

You will develop your skills by engaging with live project briefs with a variety of companies, both local and international. Previous students have worked on live projects with McCann, The Times, Chapter, Cogent Elliott, Birmingham Hippodrome, Hello Creatives and Saatchi & Saatchi.

For full entry requirements and fees: bcu.ac.uk/courses

If you are a healthcare assistant, support worker or equivalent within a health and social care setting, and want to take your career to the next level, this course will support you to gain the work-based skills you need.

This work-based learning course includes one protected university study day each week, with a high level of support from your personal tutors, workplace mentors and assessors. You can choose to study for one year and gain a Certificate of Higher Education, or two years to complete the foundation degree.

Move your career forward while working in one of the following areas: diagnostic radiography, maternity, mammography or surgical care support.

The School's belief in working collaboratively, and for mutual benefit, with employers and NHS Trust colleagues means your studies accurately reflect the hands-on operations of contemporary practice. Our facilities include simulated hospital wards, an operating theatre, home environment room and state-of-the-art laboratories.

» THIS IS A FULL-TIME WORK-BASED LEARNING PROGRAMME.

Content includes:

Year 1 modules:

- Principles of Personal and Professional Development
- Principles of Anatomy and Physiology

Plus:

- A pathway-specific skills module

Year 2 modules:

- Evidence-based Healthcare
- Becoming a Paraprofessional

Plus:

- A pathway-specific skills module
- Pathway-specific optional modules

"I have developed the skills, knowledge and competency to provide clinical support in delivery of care to patients. The support I received helped me to become a compassionate, confident and professional Assistant Practitioner."

JUSTYNA SMAZYK

PATHWAYS:

Diagnostic Radiography

Get involved in the pivotal role of supplying crucial information to medical and other clinical staff to help plan treatment. You may already be working in radiology/imaging departments so will have an understanding of the environment and the importance of radiation safety and accurate examinations.

Pathway-specific modules include:

- Diagnostic Radiography for Assistant Practice
- Physics for Radiography Practitioners
- Advanced Diagnostic Radiography for Assistant Practice.

Mammography

Examine psychological and cultural influences relevant to working in a breast imaging department. This pathway will be of interest to Assistant Practitioners or those in a similar role who are employed in a breast imaging service. You will develop the fundamental skills and knowledge required to undertake mammographic imaging of the breast.

Pathway-specific modules include:

- Mammography – Principles and Practice
- Physics for Radiography Practitioners
- Service User Journey in Imaging.

» 92% OVERALL SATISFACTION FOR THIS COURSE.

National Student Survey 2021.

Maternity

Maternity Support Workers are an integral part of the maternity workforce and play an important role in supporting midwives and the wider maternity teams, as well as mothers and their babies. If you are a support worker working within a maternity setting, this pathway will be of particular interest to help you develop your role and gain competence in the principles of caring for pregnant women.

Pathway-specific modules include:

- Knowledge and Skills to Practise in Maternity Practice
- Supporting Normal Birth
- Advanced Knowledge and Skills in Maternity Care
- Supporting the Transition to Parenting.

Surgical Care Support

This pathway is aimed at those who work within a perioperative setting and facilitates opportunities for you to develop responsibility, accountability and critical thinking and problem-solving skills, raising your awareness of issues that impact upon an individual's health, their safety and clinical practice in the perioperative care setting.

Pathway-specific modules include:

- Fundamental Perioperative Practice
- The Wider Principles of Perioperative Care
- Developing Perioperative Practice
- Contemporary Influences in Perioperative Practice.

» WE HAVE BEEN AWARDED THE SKILLS FOR HEALTH QUALITY MARK, WHICH RECOGNISES OUR HIGH-QUALITY LEARNING AND TRAINING FOR THE HEALTH SECTOR.

"I learned such a lot making my final masterpiece. I entered it into a young talent competition and won which meant that I could take it to the biggest watch fair in the world and show alongside some amazing, inspirational clock and watch makers."

This course is designed to train and create employable graduates in horology. It has been tailored to meet the growing demand for watchmakers and clockmakers, qualified to industry standards. Our outstanding industry links have included brands such as Cartier, Louis Vuitton Moët Hennessy (LVMH), Christopher Ward and the British Museum. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

Our undergraduate programme will enable you to study clocks and watches, both mechanical and electronic, and the art and science of time measurement. You will be supported by experienced staff and visiting tutors who will share their expertise in practice, research and design techniques.

You will be using industry-standard software, such as the Solidworks CAD package, to develop design and technical drawing skills, as well as both traditional and modern niche skills of repair, conservation and restoration.

You will have the chance to undertake placements and mentoring, and develop technical expertise in a commercial setting, alongside our unique partnerships with internationally respected names. You also have the opportunity to gain membership of the British Horological Institute, the Antiquarian Horological Society and the British Watch and Clock Makers Guild.

Our Human Resource Management degree equips you with the tools you need to develop the high-performing personnel and innovative teams demanded by business. This course teaches you about the importance of motivating and managing people within a business, showing you the link between successful performance and the people you employ.

You will develop your skills through real projects, field trips and interactive workshops. This work-integrated approach to learning means that graduates of this course leave with real, practical experience and can go on to work for a wide range of companies such as Virgin Media, CrossCountry Trains and the NHS.

This course draws on all aspects of people management, enabling you not only to build knowledge and understanding but also a high degree of professional competence in the field of people management and development. You will have the option to undertake a work placement to gain practical work experience within a business, ensuring you are prepared for a successful career from the moment you graduate.

This degree course is approved by the Chartered Institute of Personnel and Development (CIPD). This means that the course is as professionally relevant and up-to-date as possible, taking into account the very latest developments in the profession.

This exciting, energetic course will give you the skills you need to capture and communicate ideas through pictures, as well as finding your individual visual voice through experimenting, risk taking and critical reflection.

You will explore how your work can be applied across a wide range of contexts, from commercial work to personally driven projects. There will also be the opportunity to develop new skills and different ways of thinking, enabling you to find your own individual, visual voice and prepare you for the ever-changing creative industry.

This programme celebrates the synthesis between illustration and other visual communication disciplines and will help you to develop strong student collaborations that aim to reflect industry practice. You will become part of a lively creative community, encouraging the value of peer learning.

You will also supplement your learning through an integrated workshop programme that provides the opportunity to work alongside, and be informed by, industry experts from a wide range of disciplines. Live project partnerships have included Tiny Tree Books, Birmingham Repertory Theatre, DanceXchange, Flatpack Film Festival, The Emma Press, Moonpig and Asda.

Our Interior Architecture and Design degree is intended to encourage thinking and experimentation around reshaping and designing the interior of existing building elements.

The scope of the course aims to challenge you to formulate your personal style around the discipline of interior architecture and design, and to enhance your ability to critically reflect on a variety of elements: social, political, environmental and more. Your critical response to such fundamental concerns will be translated into innovative design solutions that form, shape and inhabit existing and new structures – rethink, reimagine, reform.

You will consider forms and shapes before completing the design circle with appropriate lighting, material and furniture application. You will have the chance to explore the spectrum of interior architecture as a discipline, from new formations within the space, to respecting, understanding and developing existing structures.

The course you follow is developed in a way to entice specialists from a variety of disciplines such as conservation, engineering, architecture, virtual reality and more to share their expertise with students. This will inspire you and help you gain valuable skills to develop your career as a creative new designer. Collaborative projects will also give you the opportunity to work together with students and lecturers of other disciplines.

- Foundation Degree: 240 credits of appropriate prior learning (120 at Level 4 and 120 at Level 5), minimum of 60% overall
- HND in a related subject: Merit profile
- ABE Advanced Diploma: at least Grade B in two modules in a relevant subject
- GCSE Grade 4 or above in English Language and Mathematics, or equivalent.

This alignment will be assessed via the University's Recognition of Prior Learning (RPL) policy and processes.

For full entry requirements and fees: bcu.ac.uk/courses

Global financial and business environments are becoming increasingly intertwined. We use our longstanding links with the world of finance to develop your knowledge and real-world practical skills in international finance. With personal tutor support, we will also help you to select course modules which reflect your own learning needs and career goals.

The programme is designed to equip you with technical knowledge and skills as well as a range of employability skills and attributes. The course will encourage your intellectual and moral development and your personal commitment to the social purpose of becoming a business professional.

Studying on our City Centre Campus, you will choose from a range of modules including international reporting, financial management, globalisation and statistical modelling. You are encouraged to choose areas of study best suited to your future career plans.

You will be taught by industry-experienced academics who bring real-world practical knowledge to the classroom. They've forged careers and worked with renowned companies such as KPMG and Vauxhall, which means you get great contacts and benefit from their industry insights. Our students come to their top-up year from a variety of backgrounds, providing the added opportunity to gain valuable learning experiences from your peers.

Our International Marketing top-up degree gives you the chance to broaden your knowledge of marketing within the global business environment. We'll teach you to apply your knowledge to real business scenarios, helping you to progress into employment, having already dealt with many situations you find in the working world.

You will take part in various activities to strengthen your expertise and learn from different cultures and experiences. During this top-up year, you will take a range of advanced modules that look at current marketing methods and contemporary business issues, such as contemporary advertising, e-business and marketing strategy, and planning.

Hands-on learning will go alongside more conventional teaching methods like lectures and seminars on this course. You will be put in a range of scenarios, such as assuming the role of an international marketing manager, strengthening your expertise in the areas employers want. There are opportunities to collaborate with students on other marketing courses and exchange different ideas and experiences.

The course combines business theory with exciting current marketing themes, such as emerging digital media and the importance of a positive consumer experience. From day one, you'll start to understand how organisations operate and what their current challenges and opportunities are.

The launch of our Eastside Jazz Club has helped strengthen the integral role that Royal Birmingham Conservatoire has to play in the city's thriving jazz scene. Our Jazz Department is based around the Club, where student musicians share a platform and get invaluable side-by-side performance experience with the best on the scene, whom we welcome to our stage on a regular basis.

This course meets the needs of the modern jazz performer – it places emphasis on practical work, with the majority of time dedicated to one-to-one lessons, small group coaching and private practice. You will study modules that have been specifically and skilfully designed for jazz musicians, and as part of your learning we encourage you to explore in depth the relationship between improvisation and composition, which is central to developing your individual voice.

You will graduate as a versatile, professional musician who is knowledgeable about the entrepreneurial opportunities available to you, and aware of the commercial realities for musicians joining today's UK jazz scene as a portfolio musician.

As well as having our own club that has taken its place in Birmingham's vibrant jazz scene, our students enjoy professional experience opportunities with external gigs that familiarise them with the industry, for example through our current partnership with Cheltenham Jazz Festival, one of many ways we prepare you for the future.

Pursue innovation, challenge conventions and push the boundaries of the discipline with this creative course. Individuality is fundamental to your creative development, personal philosophy and direction. The School is uniquely positioned in the heart of the Jewellery Quarter, enabling you to be fully immersed in the industry from the first day of your studies. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

You will be encouraged to create innovative designs to a high standard and have the chance to enter competitions and awards on this internationally respected jewellery design course.

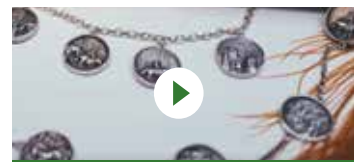

In your first year of study, the focus is on developing traditional processes followed by experimental materials investigation, allowing you to enter the second year with a range of skills and the confidence to explore various optional topics, and live and collaborative projects. In the final year, you will be guided by your own inspiration and supported by highly experienced tutors. You will also benefit from our rolling programme of Artists in Residence.

While studying on this course you will have the opportunity to gain commercial experience and develop key employability skills. There are various opportunities to promote your work to an external audience, through participation in live projects, competitions and real-life briefs throughout the programme.

Based within a stimulating and dynamic environment, this HND course has an excellent reputation within the industry, with our students and graduates employed at all levels locally and internationally. Being positioned in the Jewellery Quarter in Birmingham, we are uniquely placed to provide the education and skills that we know that employers and industry are looking for. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

As an HND student, you will be working on live, collaborative and customer-facing projects, broadening your jewellery horizons through our industry-focused curriculum. You will produce pieces by hand and by mechanical means, with a particular focus on manipulating metal and gemstones.

There is plenty of opportunity for hands-on workshop experience to develop and refine your skills. You will have practical challenges with materials and tools, alongside techniques in drawing and model-making to develop your design processes. Dedicated staff with professional expertise will offer advice, support and industry contacts.

You will be encouraged to enter national and international competitions, and you will also have fantastic opportunities to work on live projects with industry. After successfully completing the HND Jewellery and Silversmithing course, graduates continue onto BA (Hons) Jewellery and Silversmithing – Design for Industry or BA (Hons) Design Management, or pursue a career in the jewellery industry.

If you want to be a designer within the contemporary jewellery industry, our Jewellery and Silversmithing – Design for Industry degree will help you succeed. The course is unique in its technology-focused delivery and has a reputation for educating industry-ready graduates who have enabled companies to adopt and fully utilise CAD technology to give them an edge in the manufacturing world. The University is currently reviewing this course internally and there may be changes to its contents for 2023/24.

The course benefits from collaboration with an extensive network of partners linked to manufacturing, CAD software developers, service providers and retail outlets, ensuring that you receive experience within an exciting and varied programme to inform and direct your chosen specialism and future career aspirations.

You will get the chance to work closely with the Centre for Digital Design and Manufacture, providing access to experts in the field and cutting-edge equipment in a purpose-built facility. Industry-specific CAD software is explored to its full potential through a variety of live commissions in collaboration with leading industry companies, high-profile competitions and bespoke client briefs.

The studio is equipped to facilitate prototyping for a variety of materials and processes, enhancing the development of new products.

Get practical, professional preparation for a career in journalism with one of our Journalism degrees. You will develop the skills you'll need to cover stories for print, digital, TV and radio, as well as exploring the global impact of journalism on audiences.

You will be taught in our industry-standard facilities as well as on location thanks to our focus on mobile reporting. By tackling real stories, you will quickly develop a sense of the impact reporting can have. You will learn about the changing landscape of the industry, the importance of newspapers, and the domination of news in digital formats.

BA (Hons) Journalism offers you the opportunity to apply practical mobile reporting skills in a real-world environment. In our Live Newsroom module you will learn how to report the news across the many platforms that news appears: digitally, on social media, in podcasts, and on radio and TV.

You will be asked to undertake work placements, as well as embed yourself within communities to report on key issues in real depth. There is a focus on innovation and entrepreneurship in the industry, encouraging you to think critically about your journey out into the world of journalism.

As a combination of art, function and natural systems, landscape architects design the world outside. From urban squares, streets and parks, to natural forests, rail and roadways, they integrate solutions to combat global issues like climate change and ecological decline.

Landscape architects create rich, positive experiences for people and provide designed environments which engage users with dynamic experiences and a strong sense of place. This course covers all aspects of landscape architecture and is fully recognised and accredited by the Landscape Institute (LI).

Experience on-site with live projects and within the design studios of local practices will develop your design creativity and hone your professional practice skills. Work placements and competitions will give you fantastic opportunities to generate links to industry. There are also chances to compete for industry-connected awards.

A law degree is a great first step into a career in law, as well as an important foundation on the route to many other careers, and we are a long-established provider of legal education to the Birmingham legal community and beyond.

This course has been developed to enable anyone wishing to qualify as a solicitor or barrister to undertake this first, important academic stage of their career. The course has been designed to align with the subjects that you will need to study further in order to successfully undertake the Solicitors Qualifying Examination (SQE), while also meeting the requirements of the Bar Standards Board for an undergraduate law degree.

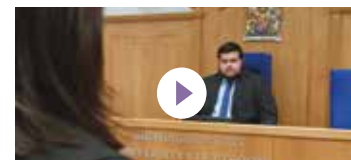

Theory and academic study are important on an LLB, but so too is the application of that knowledge, and so our degree offers plenty of opportunity for you to develop practical lawyering and transferable skills. You will also have the opportunity to put those skills to practical use, either through our programme of placement opportunities with providers such as Citizen's Advice and various legal advice charities, or our opportunities in the local legal community via BCU's own Law Clinic.

Please note, although the course is designed to align with the subjects that you will need to study for the SQE, it does not specifically include preparation for the SQE1 or SQE2 assessments that are required for students wishing to qualify as a solicitor.

Full information: www.bcu.ac.uk/law-llb

This course can also be accessed via a foundation year. Please see page 220.

www.bcu.ac.uk/law-facilities

Content includes:

Year 1

- Legal Systems
- Critical Legal Thinking
- Contract Law
- Tort Law
- Criminal Justice Process

Year 2

- Constitutional and Administrative Law
- Land Law
- Professional Skill and Practice

Year 3

- Equity and the Law of Trusts
- Law of the European Union
- Integrated Project OR American Legal Practice

Foundation year content includes:

Introduction to Law; Learning the Law; Developing Legal Scholarship; Introduction to Legal Practice and Process; Legal Professionalism, Skills and Attributes; Studying Successfully.

"My time at Birmingham City University has been truly enlightening. The support from tutors, the course content and the various extracurricular opportunities have all contributed to my self-development as an aspiring barrister."

IBRAHIM ILYAS

AVAILABLE SPECIALIST ROUTES:

Law with American Legal Studies | LLB (Hons) M130 (1125 prof. placement)

This programme provides a practice-based education in English law, with a selection of modules focusing on the law of the United States. Our course is delivered by a team of internationally recognised researchers and former professional practitioners, and also offers you the chance to apply to undertake an internship in the USA, gaining valuable international work experience.

The course provides comprehensive coverage of both the foundations of legal knowledge, and is beneficial to students wishing to undertake further study via the SQE to become a solicitor.

Full information: www.bcu.ac.uk/law-us

Law with Business Law | LLB (Hons) M10B (1124 prof. placement)

Delivered by a team of academics, internationally recognised researchers and respected former professional practitioners, this programme provides a practice-based education in English law, with the fundamental aspects of business law.

The aim of this pathway is to allow you to study the foundations of law, and to further develop your awareness of the mechanisms involved when considering business/consumer transactions. This pathway also explores other issues of the legal regulation of business, such as competition law, insolvency and tax law, and dispute resolution. The programme provides a rigorous academic discipline and is beneficial to students wishing to undertake further study via the SQE to become a solicitor.

Full information: www.bcu.ac.uk/law-bus

Law with Criminal Justice | LLB (Hons) M1MF (1123 prof. placement)

By studying this specialised programme, you will gain a practice-based education in law with a critical appreciation of criminal justice. The aim of this pathway is to allow you to study the foundations of law while exploring aspects of crime, punishment and criminal justice processes, making this course highly relevant if you are aiming for a career in the legal profession or more generally within the criminal justice system.

Beneficial to students wishing to undertake further study via the SQE to become a solicitor, the specialised criminal justice modules will also enable you to explore a diverse set of criminal justice issues, from evidence to crime and punishment and human rights.

Looking to enhance your work experience while at the same time gaining entry onto our LLB (Hons) Law degree? The HND Law and Practice is a standalone Higher National Qualification that provides you with a diverse range of legal knowledge and skills designed to enhance your career prospects or begin your career in law.

The course combines study of some foundation areas of English law such as crime, contract and tort with the study of skills-based modules such as litigation and professional practice.

While also developing academic skills to underpin your successful legal study, the course gives you the opportunity to create and refine typical transferable skills that are useful for working with others. By implementing established techniques of communication to present oral and written legal advice in a meaningful way, you will present legal arguments to a range of audiences based on a variety of simulated legal issues.

If you successfully complete the HND Law and Practice course, you can progress directly onto the second year of the LLB (Hons) Law course at Birmingham City University should you wish to continue your studies and gain a law degree.

Manufacturing engineering is an essential feature in the vast arena that is manufacturing. It is a fast-changing scene where the competition between industrial organisations is keen and lean; only those companies prepared to apply modern philosophies and technologies will survive.

On this course, you will learn through practical and industry-based project work so you can apply your manufacturing principles knowledge to real-life industry problems. You will address global issues that impact on society and the environment, and improve your professional skillset on a course which has been designed with input from industrial partners.

Your studies will help you to understand how to apply the fundamentals of systems management, engineering and information technology to the solutions of operational problems in industry and commerce. You will develop industry qualities so you can work in a wide range of engineering, educational and commercial organisations.

Talented, innovative, ambitious engineers are needed to give manufacturing organisations a competitive edge – this course can help equip you to progress to positions of responsibility in senior management and shape the industry.

Experience energy and ambition on our in-demand Marketing degree. Work on real-life projects with leading clients, study an array of modern marketing principles and learn from the wider world of business. Our suite of Marketing courses also enables you to tailor your interests to a specific area.

Businesses value marketing more than ever due to its ability to identify opportunities, shape customer experiences and drive profits. It is an ever-evolving discipline, constantly responding to changes in technology and consumer behaviour.

To be successful in this exciting area not only requires in-depth understanding of the core principles, but also relies on having the acumen and practical abilities to apply and adapt this knowledge in a wide variety of scenarios. This in-demand course has been designed to give you the practical and professional skills that employers seek through our practice-based learning.

This course is one of five marketing degrees that have been designed to meet the diverse areas of marketing. This suite of courses is distinct in that it offers you a set of pathways that you can choose from irrespective of the course that you entered on. This allows you to develop additional specialist skills of your choice and career aspirations, alongside the core underpinning concepts you will need in practice.

Full information: www.bcu.ac.uk/marketing-ba

This course can also be accessed via a foundation year. Please see page 220.

» YOU HAVE THE OPPORTUNITY TO EMBARK ON A YEAR-LONG PROFESSIONAL PLACEMENT AS PART OF A FULL-TIME DEGREE COURSE.

“The best aspect of my course is that it is practice-orientated and has connections with the professional world. I receive a lot of support from lecturers, who are ready to answer any questions I have and show me how I can improve my employability.”

DESLAVA BORISOVA

AVAILABLE SPECIALIST MARKETING ROUTES:

Marketing with Advertising and PR | BA (Hons) NLM2 (1116 prof. placement)

On this innovative and dynamic course, you'll be put on the front line of marketing, advertising and public relations. You will work on real-life case studies, acquiring the practical skills and real-world perspective seen as invaluable by employers.

We cover everything from design in marketing to communicating the right message, market research and PR planning. It's a creative course that has a solid grounding in business knowledge, so that you can apply what you learn to current business issues.

Full information: www.bcu.ac.uk/marketing-pr

Marketing with Commercial Management | BA (Hons) 1090 (1091 prof. placement)

Marketing by its very nature is a commercial management role. Marketers analyse data, launch new products, devise communication campaigns and manage brands, all to specific deadlines, targets and budgets. By combining marketing with commercial management, this degree focuses on key commercial skills needed for a successful marketing career.

This course covers a wide range of commercial skills from project management, performance management to leadership and management skills, along with the core skills and subjects you would expect on a marketing degree. This approach will enhance your business acumen, marketing knowledge and leadership skills, opening up a wide variety of future career opportunities such as a buyer, product manager or category management.

Full information: www.bcu.ac.uk/marketing-comm

Marketing with Consumer Psychology | BA (Hons) N50A (1117 prof. placement)

This innovative, interdisciplinary degree combines the theoretical knowledge and skills of the science of psychology with the creativity and communication of marketing. You will examine why people are drawn to certain brands and products, and what makes a message persuasive and powerful.

Taught by academics who have outstanding industry experience, this course will see you look at how businesses and organisations can convey convincing, enticing messages.

Full information: www.bcu.ac.uk/marketing-psych

Marketing with Digital Communication | BA (Hons) N50B (1118 prof. placement)

This degree allows you to gain the skills, knowledge and understanding demanded by employers. Combining academic theory and practice-based learning, you will develop your creativity, professional skills and strategic marketing knowledge.

You will specialise in the application of digital marketing techniques, providing you with the expertise to use digital media to develop successful marketing strategies. Taught by academics who also have outstanding industry experience, you will undertake interactive lectures and seminars that bring marketing principles to life.

Our Mechanical Engineering degree will teach you how to engineer a better future. Develop as a skilled engineer capable of undertaking mechanical engineering tasks within and across organisations, and enhance your strategic management and leadership capabilities so you can solve tomorrow's problems today.

You will gain knowledge and personal attributes that embody sustainable futures and the Government's STEM (Science, Technology, Engineering and Mathematics) agenda to thrive in industry. You will work on industry-standard tools for rapid prototyping and thermodynamics, as well as learning to use the Conceive – Design – Implement – Operate (CDIO) teaching framework to work on projects which build practical experience.

You may also have the chance to participate in the Engineering for People Design Challenge where you will have the opportunity to learn and practise the ethical, environmental, social and cultural aspects of engineering design, considering the UN sustainability goals while solving real problems for communities around the world, from clean drinking water to sustainable energy.

With opportunities to engage in extracurricular activities, such as Formula Student and Engineering without Borders, this course will help you to become a highly skilled and fully rounded individual.

Offering an inspiring introduction to the production, theoretical and professional aspects of media, this course gives you a solid grounding to progress your studies or move into employment in the media and communication industries.

Your studies cover key aspects of radio, moving image and journalism. You will explore broadcast journalism, photojournalism, radio production and radio drama, as well as short film and television studio production. The course also covers the crucial research and academic techniques you need to effectively source, collate and analyse information.

A placement allows you to absorb the day-to-day realities of a media production business and you get to focus on your future employment in a career development workshop. You also benefit from the experience, close support and encouragement of expert staff.

As a student on this course, you share all the facilities, contacts and advantages of a Birmingham City University student, and feel part of a dynamic, creative and enquiring media production community. Successful completion of the HND qualification gives you direct entry to the second year of our BA (Hons) Media and Communication or BA (Hons) Media Production course at the University. If you achieve a Merit or above, you will be given direct entry to the third year of our BA (Hons) Media and Communication or BA (Hons) Media Production course at the University.

Full information: www.bcu.ac.uk/media-com-hnd

» SHARE ALL THE FACILITIES, CONTACTS AND ADVANTAGES OF A BIRMINGHAM CITY UNIVERSITY STUDENT, AND FEEL PART OF A DYNAMIC, CREATIVE AND ENQUIRING MEDIA PRODUCTION COMMUNITY.

Learn a wide array of the skills you’ll need for a rewarding career in the media, on a well-established media degree course. As you work through your projects you will mirror the workflow of the media industry, gaining the practical, research and industry-standard professional skills you need to succeed.

With work placements to take part in throughout your studies, you’ll gain up-to-date and relevant experience in a whole host of media and cultural industries. Helped by strong links with many influential media organisations, the course offers an industry-relevant blend of production, theory and professional studies.

Our students benefit from industry talks from a range of guest speakers, only too happy to pass on their knowledge and experience. Previous speakers have included top names from the BBC and Sky. Our high regard across the creative sector means that you’ll benefit from the numerous contacts we’ve made on your behalf.

You will get hands-on with our industry-standard facilities as you create your productions and you’ll also become a part of our thriving and inclusive research culture. This broad media course will ensure you are industry-ready for whichever area of the media you choose to start your career in.

Launch your career in the fast-paced media industry with our BA (Hons) Media Production degree. You’ll learn from experienced lecturers with professional industry and academic backgrounds, guest speakers, and industry experts and make useful contacts to get a head start with your work placements, gaining professional skills as you use our industry-standard facilities to create your media content.

You will have ample opportunity to immerse yourself in the practical aspects of programme-making and content creation, making documentaries, dramas, music shows and studio programmes for television, radio and other platforms.

You will learn how to operate a TV studio effectively and how to develop and pitch your ideas, as well as put together live radio shows, documentaries, and podcasts. You will have the opportunity to work with Scratch Radio to develop your broadcasting and production skills and experience.

As well as the key skills you’ll need to enter the profession, you’ll develop a range of transferable skills, which will help you gain employment in a range of careers. Previous media graduates have gone on to employment in careers such as researchers, producers, editors, reporters and more.

With specialist teaching facilities, a diverse range of clinical placements and designed in line with Nursing and Midwifery Council (NMC) standards, successful completion of this course enables you to register with the NMC as a midwife. The course also includes qualifications in Neonatal and Infant Physical Examination and the Baby Friendly Initiative.

All teaching staff on the course are qualified midwives who have worked in practice, and many still do. This means tutors have a unique insight into issues which affect your academic and clinical experience. Placements usually take place across Birmingham’s NHS Trusts with continuous support and encouragement from both your personal tutor and midwifery mentors.

Our facilities include a home birth environment, mock wards and teaching tools such as the PROMPT birth simulator and neonatal manikins to help simulate a variety of birth scenarios.

You will gain broad and diverse experience within both consultant-led units and designated midwife-led birth centres during your studies.

We are passionate about developing the best graduate midwives who support women and families during the most uplifting and sometimes challenging times of their lives. This course will prepare you to become a midwife who is able to meet the needs of women, newborn infants and their families.

You will learn to work flexibly across a wide range of settings by developing critical thinking in order to plan and deliver high-quality evidence-based care. In your final year, you will specialise in public health issues, including global health issues and maternal and infant nutrition.

Our approach to learning and teaching embraces the wealth of knowledge of the course team, practice partners and service users. The course will incrementally build on the skills and knowledge you will gain in practice and at university in order to support you to achieve the necessary level of competence and ability to make evidence-based decisions. Every aspect of the course has been carefully aligned to the standards of the Nursing and Midwifery Council (2019).

We are committed to innovative learning and teaching strategies, which include flexible online and blended learning and simulation using new technologies.

Specialise in Performance (vocal or instrumental), Composition or Music Technology. We have invested £57 million in our innovative state-of-the-art music facilities with the aim of creating impressive functional spaces that combine tradition with cutting-edge technology.

The focus of our undergraduate Music course is to help you realise your potential and become the best musician that you can be; with the support of an encouraging creative environment, we help you achieve the extraordinary.

Featuring specialist tuition throughout all four years of the course, you will get the individual attention you need to prepare for a successful career in the music profession. Additional activities are provided to help support your studies and develop your skills in complementary areas such as playing on historical instruments, performance coaching and Alexander technique.

You will have opportunities to perform in our five public performance venues, including our stunning 500-seat Bradshaw Hall, and make use of our seven industry-standard recording studios and 100 practice rooms. Each year you will have more choice and opportunities to specialise in your studies. In your final year, you will work towards a final project relevant to your own professional aspirations.

Music is one of the UK's biggest cultural exports. It's worth an estimated £5.8 billion to the UK economy, and sustains almost 197,000 full-time jobs (Music by Numbers, UK Music, 2020). This degree will put you at the heart of music in the UK, with coursework designed to equip you with the skills, knowledge and experience not just to work in but to shape the music industries.

While studying with us, you'll have the opportunity to set up a record label, promote artists or organise a music event for a paying audience.

You will develop practical business knowhow alongside critical and theoretical knowledge, applying your skills to a creative music enterprise project, as well as exploring music entrepreneurship, music online, music promotion and PR, music video, and television and music programming.

Designing and working on real-world projects with clients will enable you to add professional jobs to your portfolio. You will also have opportunities for work placements with key organisations within the UK music industries and benefit from our membership of UK Music's Music Academic Partnership, designed to maximise the employability of students.

Do you want to work in the fast-evolving music and audio industries? Our Music Technology degree is aimed at the technical music producer and will train you to use technology to create, record and distribute music. We will provide you with industry connections, live projects and a wide, in-depth knowledge of the field.

You will benefit from Royal Birmingham Conservatoire's £57 million teaching and performance facility, a first of its kind for the digital age offering the perfect fusion of traditional and contemporary creativity. Featuring 9,000 square metres of purpose-designed teaching, rehearsal and state-of-the-art performance space, it offers you unrivalled opportunities. The audio and video digital infrastructure is designed to enhance and support live performance and allow you to experiment with new technologies.

There are also various opportunities for you to interact with industry professionals, through guest lectures and masterclasses, and work with musicians who are well versed in classical, folk, jazz and rock music. Discover a wide range of placement opportunities, enabling you to gain valuable first-hand experience, as well as the chance for work experience with reputable companies, some of whom provide specialist technical solutions for music festivals.

Our courses have an excellent reputation, and our graduates go on to shape the future of the music industry. Travelling abroad and broadening your horizons may also be an option; students have previously completed exchanges with the University of Rochester in the USA.

Our state-of-the-art simulation facilities and placement opportunities with Midlands NHS Trusts and non-NHS providers give you the ideal preparation for a rewarding career in nursing – and an opportunity to transform the way people are cared for in the future.

Our BSc (Hons) Nursing course is integrated for the first two years of the course meaning that, for university-based activities, all fields of nursing work together. Your final year of study will be specific to whichever field you have chosen to specialise in – Adult, Child, Learning Disability or Mental Health.

You will gain essential hands-on clinical skills through placements, all of which will be specific to your chosen field of nursing, and develop your skills in demonstrating care and compassion that reassures patients/service users and their families that a professional is at their side. You will learn how to assess, implement, plan and evaluate care for patients in a variety of settings during your training.

We have strong links with some of the largest NHS Trusts in the country, including University Hospitals Birmingham NHS Foundation Trust, Birmingham Women's and Children's Hospital, and Birmingham and Solihull Mental Health Foundation Trust, so you will gain a variety of experience and have access to a network of invaluable contacts.

This course can also be accessed as a degree apprenticeship. See www.bcu.ac.uk/nursing-apprenticeship

Content includes:

Years 1 and 2 (integrated):

- What Is Nursing?
- Assessing Needs and Planning Care
- Providing and Evaluating Care
- Introduction to Leadership and Teamwork
- Professional Practice
- Improving Quality and Safety in a Global Context
- Leadership and Coordinating Care

Year 3 (field-specific)

- Nursing Care
- Medicines Management and Applied Physiology
- Leadership and Decision-making in Nursing
- Delivering High-quality, Safe Nursing Care
- Professional Practice

Foundation year content includes:

Academic Skills for Success; Equality, Diversity and Inclusivity; Interpersonal Skills and Professional Behaviours; Negotiated Studies; Introduction to Human Biology; Health and Wellbeing in Society.

HARRY LOWE

AVAILABLE PATHWAYS:

Adult Nursing | BSc (Hons) B740 (Jan intake) B741 (Sept intake)

Throughout the course, you will develop a range of clinical skills and the underpinning knowledge to prepare you to meet the holistic needs of a diverse adult population. In addition to the core modules, you will undertake four adult field-specific modules and be assessed in a range of clinical placement areas across the West Midlands to develop your role as a competent practitioner.

Full information: www.bcu.ac.uk/adult-nursing

Child Nursing | BSc (Hons) B730 (Jan intake) B731 (Sept intake)

You will focus on delivering family-centred care across all age ranges with a wide variety of health and mental health needs in an ever-changing and increasingly technical and high-dependency healthcare system. The exposure to a diverse range of placements allows you to gain the knowledge and skills required to function as a caring, compassionate and competent nurse.

Full information: www.bcu.ac.uk/child-nursing

Learning Disability Nursing | BSc (Hons) B761 (Sept intake only)

You will learn how to meet the complex health needs of people with learning disabilities in a person-centred way by developing a range of clinical skills. Teaching and learning involves service users in classroom settings, ensuring that throughout the course, the experiences and health needs of people with learning disabilities are your prime focus which in turn prepares you sensitively for a variety of practice placements.

Full information: www.bcu.ac.uk/ld-nursing

Mental Health Nursing | BSc (Hons) B760 (Jan intake) B762 (Sept intake)

Develop the knowledge, skills and values you will need to meet the mental health needs of a diverse population. This may be empowering individuals on their journey to recovery, or providing ongoing high-quality care to support people of all ages so that they can experience a full, active and meaningful life.

Full information: www.bcu.ac.uk/mh-nursing

Adult, Learning Disability and Mental Health Nursing can also be accessed via a foundation year. Please see page 220.

ENTRY REQUIREMENTS

- A Levels: ABB
- BTEC Diploma: 128 UCAS points when considered with one A Level or equivalent
- BTEC Extended Diploma: DDD
- Access to HE Diploma: 60 credits with 45 at Level 3, with 30 credits at Merit or Distinction
- International Baccalaureate Diploma: 32 points
- GCSE English Language, Mathematics and Health and Social Care or a Science at Grade 4 or above, or equivalent.

All offers are subject to a successful interview plus satisfactory Occupational Health Clearance and Disclosure and Barring Service checks.

For full entry requirements and fees: bcu.ac.uk/courses

UCAS POINTS:

128

Our four-year MSci Nursing dual registration degree prepares you to practise in two fields of nursing. When you qualify, you will be able to apply for nursing posts in either field of practice, and for a wide variety of nursing posts which value a qualification in your specific dual field.

Available options:

- **Adult and Mental Health | 1047 (Sept), 1069 (Jan)** www.bcu.ac.uk/adult-mh-nursing
- **Adult and Child | 1046 (Sept), 1068 (Jan)** www.bcu.ac.uk/adult-child-nursing
- **Adult and Learning Disabilities | 1044 (Sept only)** www.bcu.ac.uk/adult-ld-nursing
- **Mental Health and Child | 1048 (Sept), 1070 (Jan)** www.bcu.ac.uk/mh-child-nursing
- **Mental Health and Learning Disabilities | 1049 (Sept only)** www.bcu.ac.uk/mh-ld-nursing
- **Learning Disabilities and Child | 1045 (Sept only)** www.bcu.ac.uk/ld-child-nursing

In your first two years, you will study with BSc colleagues on modules with integrated theoretical content, where you will learn with students from all fields of nursing, developing confidence and competence in working with and caring for people across their lifespan, with a range of health needs.

During your third and fourth year, you will take field-specific modules aligned to practice placements, which will help to develop proficiency in your chosen fields of practice. In Year 4, you will also develop your ability to use research to make well-informed evidence-based decisions, an important facet of leadership in nursing practice.

Content includes:

Years 1 and 2 (integrated):

- What Is Nursing?
- Assessing Needs and Planning Care
- Providing and Evaluating Care
- Introduction to Leadership and Teamwork
- Professional Practice
- Improving Quality and Safety in a Global Context
- Leadership and Coordinating Care

Year 3 (field-specific)

- Nursing Care
- Medicines Management and Applied Physiology
- Leadership and Decision-making in Nursing
- Professional Practice

Year 4 (field-specific):

- Delivering High-quality, Safe Nursing Care
- Nursing Care
- Professional Practice

www.bcu.ac.uk/msci-nursing-vid

ACCREDITATION

NMC Nursing & Midwifery Council

On successful completion you will be eligible to apply to be entered on the NMC register for both fields of nursing that you have studied.

“Operating theatre is like a little secret world with ODPs as the hidden, highly skilled profession that has a massive impact on people’s lives. This course has opened my eyes to new and exciting opportunities within the NHS.”

Operating Department Practitioner courses at Birmingham City University have an excellent track record of developing high-quality professionals who meet the needs of a range of care providers nationally. Your preparation for employment at the end of your course is maximised by exposure to quality placement learning experiences and the development of transferable skills. This is reflected in consistent and exceptionally high employment rates on graduation.

This two-year Diploma will prepare you to become a fully qualified Operating Department Practitioner (ODP) and apply for registration with the Health and Care Professions Council (HCPC) on successful completion of the course. The ODP is a vital member of the operating theatre team, whose role varies from day to day.

We will train you to work alongside surgeons, anaesthetists, nurses and healthcare support workers, with your job as an ODP being to ensure that every operation is as safe and effective as possible.

This course will help you respond to changes in healthcare needs and priorities – and even better, you can qualify as an ODP in two years. You will spend 60% of your time on this course on work placement, receiving hands-on training in the hospital environment.

Operating Department Practitioner courses at Birmingham City University have an excellent track record of developing high-quality professionals who meet the needs of a range of care providers nationally. Your preparation for employment at the end of your degree is maximised by exposure to quality placement learning experiences and the development of transferable skills.

This three-year BSc (Hons) programme thoroughly prepares you for safe and effective care delivery in the perioperative environment, and provides you with the transferable skills to work in other acute care settings.

All of your learning will be focused on developing you as a potential Operating Department Practitioner (ODP), and preparing you to work within the wider healthcare team to deliver safe, effective and high-quality care to patients. The course is taught by our highly experienced staff, using a variety of methods to help you get the most from your study. You will explore clinical care principles, leadership, values, ethics, research, physiology and healthcare policy.

The development of clinical skills, teamworking and leadership, underpinned by a strong evidence base, will ensure that you are ready to deliver optimal care on qualification and apply for registration with the Health and Care Professions Council (HCPC).

Paramedics are highly competent healthcare professionals who work in a fast-paced environment to provide urgent and emergency care across a wide range of challenging situations. You will learn to be part of an inter-professional healthcare team providing emergency and community-based care to a variety of patients.

As a modern paramedic you will develop interpersonal and communication skills as well as critical adaptive thinking and care provision within stressful situations. You will also develop decision-making skills to enable you to deliver high-quality, patient-centred care.

You will spend a significant amount of your time consolidating your theoretical knowledge and skills in practice placement settings which will prepare you to become a registered paramedic with the Health and Care Professions Council on successful completion of this course. Placements will form a large portion of your experience each academic year and this will include working alongside registered paramedic practitioners.

You will have access to the state-of-the-art training facilities at our City South Campus. You will use our breathing and talking manikins as well as frontline ambulance equipment.

Full information: www.bcu.ac.uk/paramedic

Content includes:

Year 1

- Introduction to Paramedic Practice
- Essential Biosciences for Healthcare Professionals
- The Professional Paramedic Student
- Risk and Wellbeing in Paramedic Practice

Year 2

- Developing Paramedic Practice
- Evidence-based Practice
- Care Across the Lifespan
- Diverse Service User Groups
- Applied Pathophysiology

Year 3

- Enhancing Paramedic Practice
- Independent Study
- Leadership and Management for the Paramedic
- Management of Unscheduled Care

BA (Hons) Photography combines creative, technical and theoretical knowledge in a vibrant and dynamic course. It is designed to help you develop and sustain your creative career as a contemporary image maker.

Throughout the course, you will learn to think about, engage with and produce creative photography. It will help you develop a wide range of skills, including the practical and technical knowledge needed to make engaging images today. It encourages and teaches you to think critically, solve problems and develop the skills that are essential for a career in photography or the wider creative industries.

You will undertake a range of practical projects, both in our industry-standard photographic studios and on location, calling upon our wide range of specialist equipment. You will discover how to select, edit and present your work and how to work professionally with picture editors, art directors and curators as well as learning other key employability skills. The course will encourage you in an exploration of many different kinds of photographic subject areas, for example fashion, portraiture, documentary, product, landscape, architecture, fine art and moving image.

Having found your specialism, the course then helps you to hone your skills so that you can be fully prepared to enter the industry. Previous graduates have worked for clients including Vogue, Adidas, Nike, BMW, The Guardian, Virgin and Universal Music.

This two-year course provides the training and skills necessary for a wide range of careers within the music industry. You will develop understanding of the commercial music sector, study musical output and techniques, and improve your creativity, professionalism and practical musicianship to a level needed for music industry employment.

The foundation degree is focused on developing the practical and transferable skills required to make you industry-ready. With experienced staff and excellent resources – including three recording studios, seven rehearsal rooms, two sequencing suites and a 600-capacity working venue on site – you will enjoy exciting, creative opportunities and a supportive environment.

Your principal study can be in performance, music technology, live sound or composition. All students receive weekly one-to-one instrumental sessions, delivered by our highly qualified visiting instrumental specialists in their chosen specialism of either vocals, guitar, bass, drums or keyboards.

This course will help you to develop a profile suitable for an artist looking for employment within the music industry and reflect on individual progress as an artist, learning how to improve along the way. South and City College Birmingham graduates have gone on to work with BBC Radio 1/1Xtra, BBC Introducing, Craig David and Sydney Opera House.

This course provides the training and skills necessary for a wide range of careers within the music industry. You will develop understanding of the global commercial music sector, study musical output and techniques, and improve your creativity, professionalism and practical musicianship to a level needed for graduate employment.

The full three-year Honours degree develops both the practical and transferable skills required to make you industry-ready, and the contextual understanding and academic rigour inherent in high-level study. With experienced staff and excellent resources – including three recording studios, seven rehearsal rooms, two sequencing suites and a 600-capacity working venue on site – you will enjoy exciting, creative opportunities and a supportive environment.

Your principal study can be in performance, music technology, live sound or composition. You will also develop the musical and creative skills required by a performer, composer or producer, learn how to work well in teams and demonstrate leadership, organisation and decision-making skills.

This course will help you to develop a profile suitable for an artist looking for employment within the music industry, and to develop a clear conceptual understanding of connected issues and narratives, researching deeply into current musicology and practice. All students receive weekly one-to-one instrumental sessions, delivered by our highly qualified visiting instrumental specialists.

Our BA (Hons) Primary Education with QTS course provides you with a variety of dynamic and diverse opportunities that will equip you to engage, motivate and inspire learners in a wide range of schools.

This innovative programme is responsive to new initiatives in primary education and will enable you to become a highly effective and reflective teacher. Successful completion of the course offers you a degree and a teaching qualification.

The course comprises five strands that combine to enable you to develop your skills and knowledge to become a committed, creative and confident primary school teacher. The strands are as follows:

- Core (English, Mathematics and Science and/or the prime and specific areas of learning from the Early Years Foundation Stage Curriculum)
- Professional Studies
- Foundation (all other National Curriculum subjects and/or the prime and specific areas of learning from the Early Years Foundation Stage Curriculum)
- Subject Study
- School-based Training.

These strands are repeated in each year of study to enable you to build up your knowledge, understanding and skills in each key area. The school-based and University-based aspects of the training course are interlinked and interdependent.

Product and Furniture Design is the ideal choice if you are interested in a career as a designer, maker and developer of products and furniture. Learn a range of research and design methods alongside continual practical skills development while live student projects enhance your employability.

Our BA (Hons) Product and Furniture Design course focuses on the design and development of creative, contemporary and innovative products and furniture, considering user-centred design, sustainability, social context and commercial understanding. You will be encouraged to explore materials, techniques and processes in relation to scales of manufacture, from one-off bespoke design to design for standardised mass production.

Live projects with external partners and exposure to professional designers/makers take place throughout the course to develop personal practice, communication skills and develop your understanding of potential career paths. Working on live projects provides you with invaluable skills, enhancing your employability.

Studying in the ‘manufacturing Midlands’ provides a valuable opportunity to discover and develop your own identity as a product and furniture designer in the heart of one of the UK’s most creative regions.

This course is a national pre-join degree course licensed by the Policing Professional Body, the College of Policing, and will be delivered by subject matter experts and experienced practitioners (including retired police officers) with a wealth of subject expertise to prepare you with key transferable skills required for the role of Police Constable.

It has been developed through consultation with a range of police service areas and the College of Policing, to give you the opportunity to examine the fundamental concepts of policing while also developing the practical and transferable skills you need for a career in law enforcement.

The course will help to develop your critical thinking about policing, policy and practice through complementary modules encompassing the theory and principles of operational policing, legislation and police powers, structured interviewing skills and much more. To develop these skills, you will be involved in practical activities, events and will be exposed to a range of guest speakers. These speakers will be from a range of criminal justice and public sector agencies as well as police officers of all operational levels.

Please note, successful attainment of the BSc (Hons) Professional Policing does not in itself provide any guarantee of recruitment as a trainee Police Constable. Further study/assessment will be required.

Full information: www.bcu.ac.uk/policing

This course can also be accessed via a foundation year. Please see page 220.

Our Property Development and Planning course will provide you with the skills you need to work towards Chartered Town Planner status on completion of a specialist qualification, such as our MPlan integrated Master's course. You will develop knowledge of the processes, procedures and practices required for the effective design, management and financing of sustainable places.

The course has been designed in line with the requirements of the Royal Town Planning Institute (RTPI). We will help you to develop professional skills so you can design, create and maintain places of high quality and strong design.

You will learn to assess how property development can affect individuals and groups and understand development plans, policies and projects. There will also be opportunities to analyse the physical, technical, legal, environmental and political factors affecting development decisions.

By studying this course, you will become aware of and sensitive to the complexities and variety within and between different communities, as well as evaluating community participation and empowerment.

Our BSc (Hons) Psychology degree is accredited by the British Psychological Society and allows you to take a year-long industry placement. Make sense of the real world through gaining a deep understanding of how the core and specialised areas in psychology contribute to our understanding of contemporary issues, as well as looking at the role of brain function across multiple psychological perspectives.

You will apply scientific reasoning and evaluate patterns of behaviour, gaining key transferable skills in communication, teamwork and problem-solving. This versatile course provides the opportunity for you to embark on a Psychology career or bring those skills to a wide variety of other career paths.

Explore how the six core areas in Psychology can explain factors that influence the mind, brain, behaviour and experience, and of the complex interactions between these. You will develop knowledge and understanding of quantitative and qualitative research methods. During your degree you will be given a range of optional modules to choose from allowing you to tailor your degree to your interests.

The staff teaching on the course are experts in the areas and topics they teach on, which further enhances your learning experience, as they bring with them their practice or research-based knowledge.

Full information: www.bcu.ac.uk/psychology-bsc

This course can also be accessed via a foundation year. Please see page 220.

ACCREDITATION

Content includes:

Year 1

- Introduction to Psychology
- Psychology of Individual Differences and Personality
- Contemporary Issues and Applied Psychology
- Introduction to Psychopathology

Year 2

- Qualitative Research Methods and Analysis
- Quantitative Research Methods and Statistics
- Neuropsychology

Year 3

- Lifespan Psychology
- Applied Social Psychology
- Integrative Psychology Project

Foundation year content includes:

Origins of Psychology; Controversies and Myths of Psychology; Real World Psychology; Developing Academic Skills for Success; Thinking Psychologically; Psychology Foundation Mini Research Project.

“The variety of lecturers means that you get to experience a variety of different teaching styles and tips on how to succeed. This variety also helps you find a technique that works for you!”

ABBY HOWES

AVAILABLE SPECIALIST ROUTES:

Psychology and Counselling | BSc (Hons) 1034

Our BSc (Hons) Psychology and Counselling degree will be of particular interest if you are thinking about a career as a Counselling Psychologist, Psychotherapist or Counsellor. It has been carefully developed to enable graduates to gain the required knowledge base, practical skill and emotional awareness and maturity required for these normally postgraduate professions.

An in-depth exploration of – among other things – human development, mental health and distress, and practical listening and relationship-building skills will prepare you for a range of people-focused roles with adults, young people and children.

Full information: www.bcu.ac.uk/psychology-and-counselling

Psychology with Criminology | BSc (Hons) MC98

Our innovative course will give you a deep understanding of how the core and specialised areas in Psychology and Criminology contribute to our understanding of contemporary issues. You will apply scientific reasoning and evaluate patterns of behaviour, gaining key transferable skills in communication, teamwork and problem-solving.

Additionally, you will also learn how psychology can be applied to explain certain aspects of crime and criminal behaviour.

Full information: www.bcu.ac.uk/psychology-criminology

Psychology with Sociology | BSc (Hons) LC38

Sociology helps us make sense of the societies in which we live and our place within them. Our Psychology with Sociology course brings together two closely interrelated areas, allowing you to gain significant knowledge and insight.

This versatile course provides the opportunity for you to embark on a Psychology career, or bring those skills to the domain of Sociology.

For full entry requirements and fees: bcu.ac.uk/courses

Our Public Relations and Media course is about how and why brands, businesses, charities and celebrities communicate with us. All organisations use PR to make people aware of what they do, what's new and why it matters. They do this through news releases, media briefing, social media such as Facebook and Instagram, as well as TV and radio.

We explain how the media works and we equip you with a wide range of technical skills, including campaign planning and producing persuasive content – words and visuals – for delivering messages in many different ways.

From the start, you will be in on the action – you will join our Eastside PR agency where you will work on real campaigns, creating exciting content, solving problems, posting to social media, influencing opinions and changing lives. You will apply the knowledge and understanding you develop in lectures and workshops to put your skills into practice, developing competencies and confidence as an emerging PR professional.

We are recognised by the Chartered Institute of Public Relations and have close links with industry, so expect regular guest speakers, many of whom work as practitioners across the West Midlands and beyond. Our course provides you with plenty of platforms to build on.

Our Quantity Surveying course meets the demand for highly trained professionals and practitioners. Work collaboratively with tutors, practitioners, theorists and designers. Acquire skills that will allow you to shape the future of the built environment.

You will learn from staff with a wealth of industry experience and gain expertise in cost management, procurement and quantification skills. You will advance your career prospects by using our strong links with employers, and apply what you learn in a practical context through work placement opportunities and work on live projects for clients.

By studying on a course accredited by the Royal Institution of Chartered Surveyors and the Chartered Institute of Building, you will become knowledgeable about the legal, technical, managerial, economic, social and environmental aspects of construction projects. You will graduate as a confident professional who can manage both commercial and civil engineering projects.

Students on the programme could have the opportunity to take part in our US exchange programmes and our international competitions such as the Associated Schools of Construction (ASC) Design and Build competition, giving you an opportunity to apply your skills to real-life projects. Our students have an impressive track record in these competitions and have had the opportunity to travel to competitions in locations across the world including Dallas, Texas.

Our Real Estate course comprises the skills and knowledge requirements for a successful career in the professional property industry. The programme provides the tools to make key decisions in property finance and investment, asset management, valuation agency and development.

By studying on an employer-focused course that is accredited by the Royal Institution of Chartered Surveyors (RICS), you will gain a detailed understanding of real estate, and learn with a team of industry and academic experts who are dedicated to both academic study and industry collaboration.

You will become equipped with the attributes you need to be successful in the industry by contributing to market research for a real estate client, or undertaking valuable feasibility studies. Learn through real-life projects and scenario-based case studies.

This course helps you to understand the complex world of property by studying management, technological, financial and legal issues so you can connect real estate theory with practice.

If you are a problem-solver and like working with people, a career enabling those with sight loss and blindness to be independent may be for you. This is the only course of its kind in England and Wales, and we are a major educator of rehabilitation workers.

Lectures and online support will enhance your learning but you will be putting skills into practice from week one. You will develop specific skills to help improve the mobility, independent living and communication skills of people with all levels of visual impairment.

People who have experienced visual impairment offer you a crucial insight and invaluable feedback on your progress, and you will gain a sense of personal satisfaction from supporting people to live independently once again.

Successful completion of this course allows entry to our two specialist top-up degrees. BSc (Hons) Specialist Complex Needs Rehabilitation Work (Visual Impairment) teaches techniques to enhance your practice with adults who have a wide range of additional complex needs including deafblindness, dementia, mental health conditions and learning disability. BSc (Hons) Habilitation Work – Working with Children and Young People focuses on how visual impairment can impact on the development of children and young people.

This course is an exciting opportunity for you to train to be an accomplished and effective physical education practitioner in secondary schools. You will gain an insight into the professional practice of a secondary school teacher while developing and embedding your subject and pedagogical knowledge.

You will explore the physical education national curriculum areas and discover approaches to teaching each area. You will reflect on your vision of what makes effective physical education and hone your pedagogical skills to match, while building evidence to demonstrate your professional competence and capability.

Your academic subject work will be undertaken alongside students who are pursuing degrees in other Sports and Physical Education disciplines, enabling you to widen your understanding as well as being taught by tutors who are leaders in their fields.

You will benefit from access to our wide range of specialist sports facilities. Please be aware that there may be a need to travel to teaching facilities at other sites for some aspects of the course. You will have opportunities to work with specialist teachers while on school placements. The course is designed around the Teachers' Standards and the award of Qualified Teacher Status (QTS).

UCAS POINTS:

112

This three-year course is a mixture of practical and theoretical study, focusing on two different, but complementary, areas. On successful completion of the course, you will gain a highly valued subject qualification that demonstrates an understanding of science, and biology in particular. You will also gain a teaching qualification that enables you to teach the subject in secondary schools.

This programme develops your subject knowledge to degree level in biology. However, there is the recognition that, as a teacher in secondary schools, you will be expected to be able to teach across the different science disciplines, so you will also follow a programme of study in chemistry and physics in the first two years of the degree.

You will develop your biology subject knowledge through taught modules within the Faculty of Health, Education and Life Sciences, studying alongside students who are taking degrees in life sciences. Therefore, you will work with tutors who are actively researching in their specialist fields.

You will gain the skills and understanding to take up positions in schools as a teacher of your subject. The course is designed around the Teachers' Standards and the award of Qualified Teacher Status (QTS).

Full information: www.bcu.ac.uk/secondary-biology

Prepare for a career in challenging situations, working to promote equality, diversity and social justice and making a real difference to people's lives. Develop and apply skills, knowledge and values in ways that use critical reflection, develop emotional resilience and empower service users.

This course covers all aspects of social work, enabling you to prepare for a career in a diverse range of settings. A significant part of the course is spent on placement engaging with the realities of social work.

Placements are in a range of social work-related settings in local authorities and independent and voluntary sectors. At least one placement will involve significant working and learning by undertaking statutory interventions.

The staff team are all registered social workers and have extensive experience of social work practice that brings insight, depth, expertise and realism. Through strong links with the profession on the front line, teaching reflects the current climate in social work practice. This course is regulated by Social Work England.

Our BA (Hons) Sociology degree is a radical and practical course, theoretically driven and empirically informed, as well as locally situated and globally focused. The discipline of Sociology helps us to make sense of the world and our place within it.

Studying Sociology at Birmingham City University is about not reading sociology but doing sociology, allowing you to explore and question social norms and discover the complex issues behind your everyday routines and social practices in a range of spatial contexts, applying what you learn to your own lived experiences.

The School of Social Sciences has links with local public and third sector organisations that will help you make professional contacts and be able to apply your studies to future career prospects when taking part in voluntary work or on placement. Employability is at the heart of our BA (Hons) Sociology programme, with placement opportunities embedded through the course of the degree.

Through the School of Social Sciences' Birmingham 2029 project, you will have the chance to explore such themes of sociology within the city of Birmingham, an urban context that hosts diverse communities perfect for sociological examination.

Full information: www.bcu.ac.uk/sociology

AVAILABLE SPECIALIST ROUTES:

Sociology and Criminology | BA (Hons) LM39

The inclusion of Criminology into the degree affords you the opportunity to understand how society makes sense of crime, criminality and its control as well as the relationship between crime and wider society. You will examine patterns and processes of inequality, crime, the structure and dynamics of social hierarchies and power relations, and ask why and how people shape their identities and the tensions and conflicts that these processes create.

Full information: www.bcu.ac.uk/sociology-crim

Learn to support people of all ages with communication or swallowing problems and qualify as a speech and language therapist. The course is designed to prepare you to achieve excellence and professional autonomy in clinical practice, and is delivered at the West Midlands' only training site for speech and language therapists.

Graduates from this course are eligible to register with the Health and Care Professions Council (HCPC) to work as speech and language therapists. The course is approved by the HCPC and endorsed by the Royal College of Speech and Language Therapists.

You will learn through a variety of formats, including workshops, interactive lectures, simulation sessions, and two long clinical placements. Simulation sessions are run in the state-of-the-art facilities on our City South Campus, which include two specialist clinic rooms with cutting-edge technology, a simulated hospital ward and a home environment suite.

In addition, you will benefit from the Virtual Case Creator (VCC), which enables us to simulate clinical scenarios in a virtual environment.

Our Sport and Exercise Science course will provide you with the theoretical knowledge and practical skills to succeed in a broad range of vocations within the sport and exercise industry. You will study a breadth of topics within the disciplines of physiology, biomechanics, psychology and nutrition from both a health and sport performance perspective.

There is a range of discipline-specific and multidisciplinary modules, equipping you with a variety of perspectives that will enrich your learning and enhance your career development. There will also be opportunities for you to gain experience and apply the knowledge and skills you learn on the programme to real-world issues.

We currently also boast partnerships including Warwickshire County Cricket Club and Kidderminster Harriers Football Club. You will undertake physiological, biomechanical, psychological, and nutritional assessment of sports performers and clients using cutting-edge technology and equipment.

Our state-of-the-art facilities include biomechanics and physiology laboratories, a fitness suite, and sports therapy rooms.

Full information: www.bcu.ac.uk/sport-exercise-sci

This course can also be accessed via a foundation year. Please see page 220.

This new course, delivered in partnership with Aston Villa FC, will develop your skills in coaching participants across a range of ages and abilities. You will have opportunities to work with the Aston Villa Foundation and gain hands-on experience to prepare you for a career in sports coaching and/or sports development.

This course will help you develop an understanding of your own coaching philosophy. You will gain an understanding of the theoretical underpinnings of coaching and apply these through practical activities and hands-on experience in various community settings. You will also learn the principles of sports development and how these align to community work, addressing contemporary societal issues.

Through working with the Aston Villa Foundation, you will understand the work of Football Foundations across primary school and alternative education settings, focusing on the work that community sport plays in complementing the national curriculum.

Placement experiences will help you to build your skills, gaining first-hand experience in a coaching and/or school environment, which will enhance your future employability and personal network.

This course is designed to ensure that you learn the pedagogical practice needed to coach athletes across the spectrum of ages and abilities. You will also develop knowledge of the landscape and practicalities of teaching physical education in schools.

By developing your coaching, teaching and leadership skills, you will be ready for a variety of careers in sport including sports coaching, management or teaching. This course will also prepare you to embark on a Master's in Coaching or a postgraduate course to gain Qualified Teacher Status.

Physical education continues to be an important part of government agendas, so with this in mind, you will learn relevant and up-to-date information that is linked and mapped to the National Curriculum for Physical Education (NCPE). You will be taught the contemporary information that educators within this sector require.

This course will help you develop a keen understanding of your own coaching and teaching philosophy, and provide information about the industry and cultural factors that influence the wider context of sport. In order to apply your skills, you'll go on placements, gaining first-hand experience in a coaching and/or school environment, which will enhance your future employability.

Underpinned by the latest research, and accredited by the Society of Sports Therapists, this course provides a chance to develop specialist skills in the prevention, treatment, management and rehabilitation of musculoskeletal injuries. Through the academic study of sports medicine and sport and exercise science, you will develop the skills to work with professional athletes and health-based patients.

We offer the opportunity to undertake a professional placement year, where you will take on a work placement providing you with invaluable experience, networking and real-life hands-on learning. On graduation, you will be eligible for membership of the Society of Sports Therapists.

We currently have partnerships with organisations including Warwickshire County Cricket Club and Kidderminster Harriers Football Club, providing placements, trips and case studies. You will also have the opportunity to run your own sports therapy clinic from Year 1 of the course, practising your skills on university staff and students.

Our specialist facilities include state-of-the-art laboratories, sports therapy rooms, sports therapy clinics and a fitness suite.

Prepare yourself for a successful career in stage management through in-depth, practical training. We aim to produce confident graduates who are ready for the industry as soon as they leave us.

You will develop an understanding of the core skills needed in technical theatre and design, widening your knowledge and ability to work in the fast-paced, demanding environment of stage management and further afield. Taking on the essential duties of assistant stage manager in your first year of study, deputy stage manager in your second year, and stage manager in your final year, you will learn through authentic experience on internal productions and within the industry.

Your final year also includes a six- to eight-week placement, where you experience the rigours and responsibilities of a busy stage management job. Recent placements have included the Royal Shakespeare Company, the Royal Opera House, Birmingham Hippodrome, Birmingham Repertory Theatre and the Royal Opera House Muscat in Oman.

We encourage you to take part in as many in-house show allocations as you can so that you can engage with ideas and theories in a practical setting, while developing your communication skills and working in an authentic environment. Graduates have gone on to work on large-scale national tours such as *Les Misérables*, *Phantom of the Opera*, West End residencies like *Harry Potter and the Cursed Child* and seasons at The Royal Shakespeare Company, as well as working in a variety of stage management roles within different aspects of theatre and entertainment.

This course prepares you for the rewarding role of therapeutic radiographer. You will gain knowledge and learn skills which will support your future role as a member of the multidisciplinary cancer care team which requires you to provide effective patient care together with the safe and practical administration of radiation treatments. This course is in the process of being revalidated by the Health and Care Professions Council for 2023 so content is likely to change. Check bcu.ac.uk/courses for the latest information.

You will develop specialist skills through clinical placements in hospital cancer centres, and will consolidate those skills at University using our Virtual Environment for Radiotherapy Training (VERT) and advanced treatment planning facilities.

Your academic studies will include subjects which form the scientific basis of radiotherapy practice and include an in-depth study of human anatomy and physiology, radiation physics and radiobiology.

You will also study the social and psychological aspects of cancer care and the needs of patients. As you advance your knowledge of radiotherapy practice and the science of oncology, you will develop analytical skills and explore the research evidence that forms the basis of current and emergent practices.

This Sony PlayStation First endorsed, two-year course responds to this exciting and fast-growing industry by developing you into a highly skilled, team-oriented professional ready for employment.

You are guaranteed a video game development placement in our in-house studio over the summer term. Teaching takes place in a modern production studio at our City Centre Campus.

Our Video Game Design course focuses on digital media asset production and communication and will provide you with:

- a grounding within the industry’s design and production disciplines
- the opportunity to put your creative skills into practice within the video games and wider interactive entertainment market
- the opportunity to work with others in multidisciplinary teams
- the opportunity to develop, hone and assess your own skill development and plan your future.

Building on your design and production skills, in the first year you will be tasked with a specific role within our in-house game development studio. You will be taught by staff with significant experience in the video game industry who have worked with developers including Codemasters, Rare, Traveller Tales, Sega and EA Games.

This Sony PlayStation First endorsed, two-year course responds to the growing, innovative video game sector by developing you into a skilled, team-oriented, and reflective graduate who is equipped to succeed.

Interactive entertainment and video games development are key sectors for contemporary culture, economic growth and employment locally in the Midlands, nationally and globally. This course develops you as a professional artist by covering both core and technical art skills. Once we have covered the fundamentals, we will move on to supporting you to develop your technical and digital art skills where you will focus on 2D and 3D game art disciplines.

You will also be tasked with a specific role within our in-house game development studio over the summer term, giving you the opportunity to apply the knowledge and professional practices you've learned in a safe and supportive environment.

Typically for these projects you'll be using industry-standard game development tools such as Unity and Unreal Engine. These summer projects have in the past been mentored and supported by external partners such as Codemasters, Rare and Rebellion. The work you produce can act as excellent portfolio pieces, demonstrating your ability as both a professional artist and effective team member.

Do you want to produce visual effects for film and television or work on cutting-edge CGI projects? On our Visual Effects degree you will learn about computer graphics, produce visual effects and develop your technical, creative and production skills while preparing for a career in a range of roles within visual effects production and CGI.

You will study all aspects of visual effects production including shooting video, computer graphics, matchmoving and compositing, while modelling creatures, building digital environments and producing visual effect shots. The course emphasises Technical Director (TD) roles such as Matchmoving, Rigging, Dynamic Simulations, Motion Capture and Python/Pipeline Development, all of which are in particular demand within the visual effects industry.

We provide excellent facilities including a range of industry-standard software, high-specification computers, cloud-based rendering facilities, a Vicon motion capture studio, a large fixed green screen studio, a Milo motion control system, and a variety of professional camera, lighting and grip equipment.

You will do a mixture of hands-on productions and technical investigations which will teach you the practice, process, craft and technology of visual effects.

If you are looking to pursue a career that supports and makes a difference to the most vulnerable children, young people and their families, this multidisciplinary degree is for you. We offer various opportunities to engage with professional practice in the areas of education, social care and health, in an integrated way.

This programme has at its heart a strong commitment to social justice and equalities. We will provide you with a range of teaching and learning experiences to build on your existing skills and motivation so that you can contribute to a changing society, particularly with services who work with, or for, vulnerable children, young people and their families.

Our multi-professional teaching team will help you to explore the opportunities for working with children and young people, and find the right option for you. Previous students have achieved positions in education welfare as attendance officers, as family support workers, as project managers for charities and as voluntary providers of children's services.

Many of our students go on to postgraduate study in the field of education, social work, psychology and counselling.

The Youth Work and Communities degree at BCU is a contemporary and exciting course, which has accreditation from the Joint Negotiating Committee, which is the professional body that accredits Youth Workers in England and Wales.

The course has been designed to integrate the core knowledge and skills required to jump-start a successful career working with young people and communities, whether that be in the public sector, non-governmental organisations/voluntary field or private sector.

Practice skills, cultural competencies, communication, placement and community engagement opportunities have been built in throughout the programme to ensure students incrementally develop the essential and specialist skills and expertise to build thriving careers working with diverse young people and communities.

A core focus of the course is diversity, equality and social difference. We offer opportunities to learn and work on placement in Britain's second biggest city, with highly diverse young people and communities, in a vibrant urban context of rapid social change.

Full information: www.bcu.ac.uk/youth-and-community

FY This course can also be accessed via a foundation year. Please see page 220.

FOUNDATION YEARS

Look for the icon on individual course pages to confirm whether the course you are interested in is available with a foundation year.

FOUNDATION YEARS ARE A GREAT OPTION IF YOU HAVE THE TALENT, AMBITION AND POTENTIAL TO THRIVE AT BIRMINGHAM CITY UNIVERSITY, BUT WANT A LITTLE MORE FLEXIBILITY AND CHOICE THAN A STANDARD DEGREE.

Why study a degree with a foundation year?

- If you want the flexibility of a year's study on a more general course to find out the best degree choice for you.
- If you have changed your mind about your career since you chose your A Levels or BTECs and need to improve your skills in a different subject area.
- If you would like extra time and support to help you build your knowledge, skills and confidence before starting a full degree.
- If you don't quite meet our entry requirements but know you have the potential to succeed at university.
- Although you apply to a specific course with a foundation year at the start of the process, you may switch to a course within the same subject area at the end of your foundation year, if you decide that better suits your interests and ambitions.

If your chosen course is regulated by a professional body such as the Nursing and Midwifery Council, Health Care and Professions Council or the Department for Education, you will be required to pass the University's selection process via an interview during your foundation year in order to proceed onto year one of the full degree programme on successful completion of your foundation year. Entry onto year one of the degree programme will also be subject to a satisfactory Disclosure and Barring Service (DBS) check and Occupational Health Assessment. A mandatory vaccination requirement may also be in place prior to placements in a health and social care setting.

For BA (Hons) Architecture, an interview will be required to progress from the foundation year to year one of the full degree programme.

For the latest information and to apply, please visit www.bcu.ac.uk/foundation-years.

Foundation years are available in the following subject areas:

ARTS, DESIGN AND MEDIA

Foundation routes in these subject areas offer the opportunity to progress to over 25 BA (Hons) programmes spanning Architecture, Art and Design, Design, English, Fashion and Textiles, Film, Fine Art, Graphic Communication, Illustration, Jewellery and Silversmithing, Journalism, Media and Communication, Music, Photography and Video Games.

www.bcu.ac.uk/adm-foundation-years

BUSINESS, LAW AND SOCIAL SCIENCES

Foundation routes in these subject areas offer the opportunity to progress to BA (Hons) programmes in Business Management and Sociology and Criminology, BSc (Hons) programmes in Accounting and Finance and Psychology, and LLB (Hons) Law.

www.bcu.ac.uk/foundation-years

IMPORTANT LEGAL INFORMATION

If you receive an offer from Birmingham City University and you accept a place to study with us, you will enter into a contract with the University. Birmingham City University's Terms and Conditions are available on the Student Contract web page (www.bcu.ac.uk/student-contract) and contain the principal terms of the contract.

DISCLAIMER

The information in this prospectus is aimed at applicants starting their course at Birmingham City University in 2023/24 and should be read in conjunction with the information available on the course pages. We have taken every effort to ensure the information contained within the prospectus is accurate for the 2023/24 cohort at the time of being finalised in February 2022.

We may need to make changes to our courses or other services that we offer in certain circumstances. It is therefore important that you check the most current information on our course pages and website before you apply to study with us. Further details of the type of changes we are able to make and the approach we will take can be found on our important information about the prospectus page: www.bcu.ac.uk/prospectus-information-23-24.

It is possible that the 2023/24 academic year may be affected by the ongoing disruption caused by the Covid-19 pandemic. Any arrangements to be put in place by the University for the 2023/24 academic year in response to Covid-19 will be in accordance with the latest government public health advice, pandemic-related/health and safety legislation, and the terms and conditions of the student contract. Further information will be provided on the Student Information section of the University's website.

It is important to be aware that some of our courses may be affected by any mandatory requirement for those working in a health and social care setting, including students on placement, to have been vaccinated against Covid-19. At the time of going to print, this requirement is being reconsidered by the government and may no longer come into force. This reconsideration will be subject to a government process which will include further consultation and a vote for any change to be passed into legislation. Further information, and updates on the requirement following the consultation, can be found on our FAQ page at www.bcu.ac.uk/vaccination-requirements.

Alternative formats are available on request. Please contact creative.services@bcu.ac.uk.

THE MATERIALS AND PRODUCTION METHOD USED IN THIS PROSPECTUS WERE CAREFULLY SELECTED TO SUPPORT OUR COMMITMENT TO SUSTAINABILITY

Here are just a few of the decisions we made, balancing the environmental impact with quality and usability:

This prospectus is made of material from well-managed FSC®-certified forests and from recycled materials.

The pages are made from Carbon Balanced Paper, which means any carbon emissions resulting from its production have been offset through the World Land Trust.

Two-Sides gave us guidance based on their paper sustainability research, advising us to focus on the recyclability of the paper, which is why we can use their Love Paper logo.

www.lovepaper.org

Our print management partner, Cubiquity, through their social and environmental initiative RISE, has supported us with the selection of sustainable materials and processes to bring you this prospectus.

RESPECT INNOVATE SUSTAIN EMPOWER

The inks used are made from renewable raw materials, and are free from mineral oils and cobalt.

PLEASE RECYCLE THE PACKAGING AND PROSPECTUS WHEN YOU HAVE FINISHED WITH THEM.
